THE LANCET, October 31st, 1896, says:—"Undoubtedly, from a medical point of view, that accessory of the cycle which chiefly stands in need of improvement is the saddle. Much has been said and written on the subject of perineal pressure, and not a few inventions claiming to obviate the injurious effects of the ordinary saddle have been placed on the market. But none, we think, so nearly approaches the ideal as the Pattisson, two of which (one designed for men and another for women) have been submitted to us. \* \* \* From a trial we have made of the saddle, after careful adjustment of the interval, we are inclined to agree with the claims of the inventor, and we note that that excellent authority on cycling matters, Mr. E. B. Turner, F.R.C.S. Eng., is cited as being of opinion that 'this saddle is calculated to obviate entirely the injurious effects caused by the unavoidable pressure on the perineum which an ordinarily-shaped saddle produces.' \* \* \* We think the saddle is one well worthy of the attention of the medical profession."

**The Cyclists' Touring Club—**or, as it is familiarly known, "the C.T.C."—is one of the largest athletic or quasi-athletic institutions in the world! It is international in its character, and its membership is rapidly approaching

**45,000.**

The Annual Subscription is the purely nominal one of **FIVE SHILLINGS**; the Entrance Fee is **ONE SHILLING** only.

**AMATEUR CYCLISTS—whether LADIES or GENTLEMEN—**  
ARE CORDIALLY INVITED TO ENROL THEMSELVES IN ITS RANKS.

**THE PRINCIPAL OBJECTS** for which the Club is established are:—

- To encourage and facilitate touring in all parts of the world.
- To provide riding or touring companions.
- To protect its members against any infringement of the rights and privileges to which they are entitled, and to extend those rights and privileges wherever possible.
- To secure and appoint upon special terms and at reduced rates Hotels and Inns in all parts of the country.
- To appoint a Consul in every town, who shall render to his fellow-members local information germane to the pastime unobtainable from other sources.
- To similarly appoint Official Repairers competent to remedy breakages and defects in machines.
- To publish monthly an Official "Gazette," to be supplied gratis to members only.
- To compile, and issue to members at reduced prices, Maps and Road Books especially adapted to the requirements of the cyclist.
- To inculcate and encourage an *esprit de corps* in the brotherhood of the wheel, and to uphold and promote the true interests of Cycling the wide world over.

Some of the Advantages to be derived from Membership are:—

- 1.—Intending tourists may procure from the various Chief Consuls, free of cost (save in the Districts to which the published Road Books of the Club apply), full particulars as to the best routes from one part of the country to another, as well as details of the chief items of interest.
- 2.—The assistance and guidance of the local Consul can be counted upon in every place of importance.
- 3.—The benefit of the special and reduced tariffs can always be obtained at the appointed Hotels and Inns in nearly every town and village in the United Kingdom, as well as in some of the countries in Continental Europe. The tariffs and discounts that apply to these houses result in a saving which, in some instances, is equal to thirty-three and one-third per cent. off the ordinary charges of the Hotel, and the annual subscription is in consequence frequently recouped in a single day.
- 4.—Companions of kindred tastes can be readily secured by the free advertisement which is given to the requirements of the member in the *Club Gazette* (for details of which see below).
- 5.—The member may purchase the Official Road Books and Handbooks of the Club. The former comprise a complete Continental Route Book in three sections, and a British and Irish Road Book in process of compilation (Vols. I., II., III., and IV., which include the whole of England, Wales, and Scotland, are now ready, and the remaining volumes dealing with Ireland, will appear shortly); the latter (published annually) contain exhaustive lists of appointed Hotels (licensed and Temperance)—with particulars of the special tariff and discount applicable to each—Coffee Taverns, Consuls, and Repairers; together with railway and steamboat rates, rules and regulations, a diary and riding record, hints as to touring, and repairing machines, and much other information indispensable to the tourist. One of the handbooks applies to the United Kingdom; the other to the Continent, the United States, the Colonies, etc.
- In addition to the above the Club publishes for the use of members a Farm House and Country Lodgings List, in which is incorporated a complete List of Coffee Taverns, Restaurants and Cafés. The *net charges* for certain specified items are given in all cases.
- 6.—The member has the right of purchasing and wearing the neat and serviceable Costume Cloths of the Club, and the Badge (a *fac-simile* of which is shown on the opposite page), both of which are known all over the world. The Costumes are procurable of any of the numerous Official Tailors (a list of whom is furnished upon application), but the badge is procurable of the Secretary only.
- 7.—The member is supplied *gratis* month by month with a copy of the *Club Gazette*, a magazine of from eighty to ninety pages, containing full details of the Club's progress, reports of the meetings of the Council and the membership, narratives of tours planned and undertaken, critical and absolutely independent articles on the construction and relative values of the various types of machines, together with much other matter of interest.

Apart from these material and personal advantages the member has the satisfaction of knowing that he is aiding, by his alliance therewith, a body which is ever on the alert to promote the best interests of cyclists, and which has already been instrumental in (a) reducing by fifty per cent. the charges formerly in force for the transit of cycles by passenger train, as well as in some cases securing special concessions in the way of reduced rates for both machine and rider; (b) removing all unreasonable restrictions upon the use of the public parks by wheelmen; (c) abolishing at one stroke the conflicting and anomalous county and borough bye-laws, and substituting therefor a statute law declaring cycles to be carriages within the meaning of the Highway Acts, and entitled to all the privileges and benefits applicable to other carriages; (d) upholding and improving the status of the wheelman by condemning furious riding, road racing, and every other practice likely to bring the cyclist into disrepute with other users of the roads and the community at large; (e) supplying, erecting, and maintaining warning notices on dangerous hills; (f) compiling the only reliable Road Book yet placed upon the market; (g) watching and opposing all measures restrictive of cycling introduced into Parliament or by local authorities; (h) agitating in favour of and introducing into Parliament a measure compelling all vehicles to carry lights at night, and—pending its passing into law—co-operating with County Councils in dealing with the matter by means of bye-laws in their own particular districts; (i) inducing hotel proprietors and other public caterers to study the special requirements of the wheelman, and to deal with him in a generous spirit; (j) revolutionising and perfecting the dress of the cyclist, and providing an ideal outfit for the use of each sex; (k) securing free entry for the machines of members *bona-fide* on tour in Belgium, France, Italy, Switzerland, and other Continental countries; (l) publishing and circulating with good effect tens of thousands of popular and technical pamphlets upon the only rational and economical system of road maintenance; and, in short, in rendering yeoman's service to the art and pastime of cycling.

Forms of Application for Membership are obtainable of the Secretary, at the Chief Offices, 47, Victoria Street, Westminster, London, S.W.

## PREFACE.

---

From the earlier days of cycling until now there have been published many road books, some of them excellent, which have dealt with Scotland, but none have approached in scope or completeness of detail the plan of the British Road Book of the Cyclists' Touring Club. Of that road book this Scottish section forms the fourth volume, and has been compiled on the lines so successfully laid down in the preceding volumes.

The aim of the Club, in this and in the other volumes, has been to gather information direct from its Chief Consuls, Consuls, and members, and in this way to obtain trustworthy and reliable information at first hand. The system pursued has been as follows. At the outset a small pamphlet was issued, giving an exhaustive list of all the roads regarding which information was required. Owing to the labour of writing reports on these roads being of a purely voluntary nature, several years elapsed before the greater number of the reports were received. During those years the Editor, Mr. Arthur Poyser, personally rode over a number of the more important roads between Carlisle and Thurso, to check and amplify the reports, and to obtain, at the same time, personal knowledge of those out-of-the-way roads concerning which it was found very difficult to gather any detailed information. As a considerable portion of western and northern Scotland is practically destitute of what might be termed a resident population, many of the roads in such parts of the country were reported on by members touring in the district. Many of these contributors, however, succeeded in writing very dissimilar reports on the same section of road, and another season was required in which to gather satisfactory details. When the first draft was ready it was sent to either the Chief Consuls, or to those members who had supplied the original reports, for verification. Several of the more inaccessible routes were compiled from the Editor's personal survey of the roads, and this applies also to the many by-ways mentioned in the Editor's Notes.

Very great assistance in obtaining accurate reports, and in correction of "draft," has been rendered by Mr. W. Kendall Burnett, of Aberdeen, the Chairman of the Map and Road Book (Scotland) Committee, and the other members of that committee. The Chairman's labours have been ungrudging, and but for his assistance and encouragement the production of such a work as this would have taken even a longer time than it has done. The especially valuable help accorded by several individual members of the Club must also be acknowledged.

It has been the Editor's endeavour from the first to make the book as far as possible worthy of the beautiful country of which it treats, and to cast the volume in such a form that it may not only find favour with those who are resident in Scotland, but also with those who, being strangers to the country, intend making it their touring ground.

In a work of such magnitude as this, where so much detail has to be dealt with, and in which nearly 10,000 miles of road have been minutely described, it would be unreasonable to expect an absolute freedom from error, though every effort has been made to secure accuracy. The publication has been delayed solely from the desire that the book should leave the press in as reliable a condition as possible.

With a view to the improvement of future editions, members and others who may discover discrepancies will advance the interests of the Club by forwarding corrected information to the Secretary; by this means more complete accuracy will ultimately be obtained.

*September, 1897.*

# INTRODUCTORY NOTES.

*Explanatory of the general arrangement of the information, and of the symbols and abbreviations employed.*

---

**Area embraced.**—The area embraced in this volume of the British Road Book is that of the whole of Scotland, including the Islands of Arran, Bute, Mull, Skye, Orkney, Shetland, Jura, Islay, and the Outer Hebrides.

**General Sub-division.**—That the routes might be more conveniently grouped, the whole of the area dealt with has been divided into four distinct portions.

**The First Section** (Routes 1 to 200) comprises the so-called "lowlands"—all that portion of the country lying south of a straight line drawn across the narrow part of Scotland from the Tay at Perth to the Clyde at Helensburgh. This section is subdivided into a western portion (Routes 1 to 109), the greater part of which is known as the "Burns Country," and an eastern portion (Routes 110 to 200) embracing the "Scott Country" and all Fifeshire.

**The Second Section** (Routes 201 to 255) consists of those roads lying east of the Great North Road between Perth and Inverness, and deals with the counties of Forfar, Kincardine, Aberdeen, Banff, Elgin, Nairn, and part of Perth and Inverness.

**The Third Section** (Routes 256 to 340) all the country to the west of the Great North Road—that is to say, the western and northern Highlands—is dealt with.

**The Fourth Section** (Routes 341 to 350) comprises Orkney and the Islands off the west coast.

The Editor has further endeavoured to carry out a yet more minute grouping in all the first three sections, whereby the routes having decimal numbers (1, 10, 20, 30, etc.) are the important main roads, from which most of the intervening subordinate routes branch off. To this, however, owing to the formation of the country, it has been necessary to make a few exceptions, and in these the main roads will be found in the middle of each group of ten instead of at the beginning. For example, Routes 145, 155, 165, etc.

**Construction of Routes.**—Each route consists of two parts, namely the **Forward** description of the road, in the direction indicated by the title, and the **Reverse**.

The **Forward**, or detailed description, is divided into paragraphs, each containing full particulars of the road between the two places at the commencement and end respectively of such paragraph. For the sake of clearness the *total* distances are given only at the ends of the paragraphs, the totals of intermediate places being readily obtainable by a simple process of addition. When a reference to mileage occurs in the text, it relates exclusively to the paragraph containing it, the only exception being in regard to milestones, which may possibly reckon from the commencement of the route, or from some other point distinctly mentioned, but in all other cases distances in the text refer either to some place already mentioned in the particular paragraph, or have direct relation to the place at the commencement of the paragraph in the broad column.

The **Reverse**, which follows the Forward description, is designed to enable a cyclist to follow the route, independently of extraneous aid, when riding in a direction contrary to that indicated by the title of the route. The information is limited to such directions as would be required by a stranger travelling over a road which is unknown

to him; but, dealing only with turnings to take, or to avoid, the Reverse is of little value by itself, and must be read in conjunction with the two left-hand columns of the Forward route, the three together constituting a complete itinerary, though in a form slightly less convenient than the Forward description.

On referring to any route it will be seen that the Reverse gives full directions as to roads or streets to be taken through towns and at other points on the route where a deviation has to be made; the *total* distances to the several places, calculated from the commencement of the Reverse route, are given in the extreme left-hand column, as well as the position of all steep descents, whether dangerous or requiring special care. Thus, all the essential information is plainly set out, while the minor details as to general character of the road are seen at a glance by perusing the paragraphs in the route.

**Main Routes and Subsidiary Routes.**—The distinction between main and subsidiary routes must be considered as applying *strictly* to this work.

**Main Routes** are primarily those trunk roads which afford the most direct communication between the great towns; under the same designation are included certain other main arteries of communication of considerable length, connecting various centres of population, having a close relationship to main routes and which, owing to their importance from a cyclist's standpoint, require to be prominently delineated in the Key Map. The following are examples of Main Routes: Carlisle to Glasgow, Berwick to Edinburgh, Perth to Aberdeen; and in the same category, but of a slightly different character, Fort William to Inverness, etc.

**Subsidiary Routes** may be regarded as branch or cross-roads, and are generally of much shorter length than the main routes; they are arranged in the Book, as well as in the Map, in geographical relation to the routes from which they spring.

**Mileage.**—Distances have been computed as closely as circumstances would admit, special precautions having been adopted to obtain the nearest approach to accuracy. The distances in the original reports by Consuls or others have been carefully compared with such reliable information on the subject as was obtainable from outside sources, and with the Ordnance Survey, and where disparities have appeared the new Ordnance Survey has been taken as the standard.

It should be noted, however, that the distances stated in the *total* mileage columns refer strictly to the *starting point* of the particular route under description, and may consequently be at variance with the distances recorded by the milestones, which, in many instances, reckon from a different starting point in the same route.

**Surface of Roads.**—The information given as to road surface is believed to accurately describe the *normal* condition of the road during an average season. It is based upon what may be termed the "local estimate," that is to say, it purports to give the opinion of practical cyclists resident in the localities treated of. These estimates will naturally be found to differ in various parts of the country; thus, a road in Ross-shire or Argyllshire described as having a good surface, might, by a rider resident in the lowlands or in England, be voted altogether indifferent, the disparity between the two opinions being attributable partly to the varying conformation of the country, and partly to the nature of the material available for road repair; but the system of original construction and the present method of maintenance are also important factors which must not be lost sight of.

It goes without saying that every road is more or less liable to slight changes, but in spite of this the surface will under *normal* conditions be found to retain its individual character; there are, of course, exceptions to this, as in the case of roads which are gradually falling into disuse or which have, from local causes, largely increased traffic suddenly concentrated upon them, but in a general sense and for all practical purposes, the characteristics of a road are permanent, and it is these permanent characteristics which alone are dealt with.

**Steep Descents.**—Symbols are employed to represent steep descents, they are placed in the broad column, and have the following signification:—

|                                                                |                                                                                     |    |                                                                                      |
|----------------------------------------------------------------|-------------------------------------------------------------------------------------|----|--------------------------------------------------------------------------------------|
| Steep descents considered dangerous by riders are shown thus { |  | or |  |
| Steep descents which are rideable but require care are shown { |  | or |  |
| thus ... ..                                                    |                                                                                     |    |                                                                                      |

the arrow in every case pointing in the direction of danger.

As to what constitutes a dangerous hill, it is impossible to formulate any absolute definition in the absence of a fixed standard which might serve as a criterion, and in view also of the varying circumstances which must be taken into account in estimating each case. Adopting, however, as a principle of classification, the capability of an average rider to descend steep declivities which are unknown to him, it has been the endeavour of the Editor to apply this test to every steep descent referred to, and to assign to each, one of the two symbols which more nearly represents it. It will be found in practice that many hills to which a feathered or danger arrow is appended, will be perfectly safe to descend if the rider is well acquainted with the ground and conversant with the particular features of the hill, which, to one not so informed, render it dangerous. That the rider therefore may be enabled to estimate the risk of descending any hill indicated by a symbol, some information as to its precise nature is given in the text.

The arrows on the right of the broad column, pointing down, refer to hills in the Forward route, those on the left, pointing up, to hills in the Reverse route. The hills in Scotland are frequently long steady ascents to certain summits and descents therefrom—a crossing of the watershed between valleys. In such cases the mileage of the actual summit is always given. When the mileage is not plainly stated in the column, the text gives some indication of the position of the descent.

**Styles of Type.**—In order that the relative importance of places may be readily seen, the names of towns and villages in the broad column are printed in various styles of type, indicative of their population. The following is a list of the types employed for names of places, with their signification:—

|                                                                                                        |                          |
|--------------------------------------------------------------------------------------------------------|--------------------------|
| Places containing a population of upwards of 100,000 are printed thus ... ..                           | <b>ABERDEEN, GLASGOW</b> |
| Places containing a population of upwards of 10,000, but under 100,000, are printed thus ... ..        | <b>Inverness, Perth</b>  |
| Places containing a population of upwards of 1,000, but under 10,000, are printed thus ... ..          | <b>Dunblane</b>          |
| Places containing a population of under 1,000 are printed thus ... ..                                  | <b>Aberlady</b>          |
| Places containing a population of under 10,000, which form the termini of routes, are printed thus ... | <b>MELROSE</b>           |

The foregoing table is thus an index to the importance of places passed through on any route. A slight variation from the otherwise universal rule is adopted when a town or village containing fewer than 10,000 inhabitants is at the commencement or termination of a route; this is done in order to prevent a one-sided appearance in the letterpress. An example is seen on page 129: Melrose contains a population under 10,000, and therefore, if in any other position in the column than at the commencement or termination, would be printed as "Dunblane" in the table; but as this would detract from the appearance of many of the routes under similar conditions, a more important but distinctive character is adopted. In Route 122, Melrose conforms to the table.

**Places off the Road.**—Places which are not actually upon the route under description, but which lie a little to the left or right of the rider, are denoted by being placed in brackets, in the second column; the figures against them showing the distance from the start of the route, from the town or village mentioned immediately above, or from the route itself. Examples: On page 159, Ormiston lies a little off the road to the right (see text), and is shown in brackets, with the distance from Route 154,  $\frac{1}{2}$  m.; on page 53, Dunmure is  $1\frac{1}{2}$  m. from the start of the route at Girvan.

**Town Centres.**—To give definiteness to the mileage in the case of towns, the actual point to which the distance is reckoned is indicated by the name of the particular building, landmark, or other prominent and central feature to which the mileage is taken, being appended in parentheses to the name of the place. With but very few exceptions, the same centre is adopted in places for all the routes which may converge at the town; by this means several routes may more easily be connected, and aggregate distances ascertained. The names of hotels or inns have been adopted as centres only when another and more suitable feature did not present itself. The sign of the local C.T.C. hotel would not always be available, even if it were desirable to adopt it, having regard to the uncertain duration of a subsisting agreement with the proprietor.

**Abbreviations, etc**—Some few abbreviations have been adopted in the text as follow:—"Br." for bridge, "Ch." for church, "d.p." for direction-post, "L." for left "m." for miles, "m.s." for milestone, "R." for river, "r." for right, "rly." for railway "St." for street, "Sta." for station, and "yds." for yards. Wherever the expression "keep forward," or "straight forward" is used it must be understood that all cross-road or branch-roads right and left must be avoided in the distance regarding which the expression is used.

**Summaries and Notes.**—A new feature has been introduced in this Volume which it is believed will be found useful in a country so much frequented by tourists from all parts of the world as Scotland. The Editor has provided a short *Summary* at the heading of every route which, in a few words, sketches its characteristics, and, in the case of the roads frequented by tourists, draws attention to the fine bits of scenery passed through. For fuller details riders must refer to the guide books. The Editor's *Notes* treat principally of local and "link" roads, etc., of not sufficient consequence to merit their being included as ordinary routes.

**The Key Map.**—This is essentially a Road Map; the scale upon which it is drawn being too small to admit of the ordinary features of the country being indicated. It shows the general disposition of the roads dealt with in the book, and is designed primarily to enable a cyclist to "plan out" a tour, or to trace a cross-country route of more or less intricacy, the numbers in red giving a direct reference to the descriptions in the book.

**Index.**—The name of every place traversed, whether town, village, or hamlet, appears in the Index. The reference in the Index, however, applies not to the text, but to the broad column of the Route in which are contained the names of every place situated upon the particular road under description. The Index comprises a list of about 1600 places.

---

**TO FIND ANY REQUIRED ROUTE.**—The best method of finding any route described in the Book is to refer to the Key Map. from which, by means of the index figures in red, the route sought may readily be traced. The Index at the end of the Book should be referred to when it is desired to find the position of a town or village not indicated upon the Map.

# ROUTE 1. CARLISLE TO GLASGOW.

Excellent main road, rising over the picturesque Beattock Summit and following the Clyde valley between Elvanfoot and Abington. This road is one of Telford's and supplanted the old Roman road.

| Miles from Glasgow. | Places on the Road.           | Mileage.       |        | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| 40½                 | Crawford Inn .....    | 5½             |        | Hotel. Descent of 5½ m. to Crawford Inn. At 3½ m. from summit the Clyde is crossed, then turn to r. (L., Route 29): Road open and fairly level to Abington. (Before Abington, Route 30 is joined on L.). At S. end of the village bear to L. and go up main street. Surface excellent.                                                                                                                                                                                                                                                                                                                                                                |
| 37½                 | Abington .....        | 3              | 57½    | At fork roads N. of village keep to L. (r., Routes 32 and 35). The road ascends for some distance then falls to Duneaton Water, followed by a longish climb to the moors. Road surface hard and good and not affected by rain to any appreciable degree. Easy riding for nearly 2 m., then considerable descent down the valley of the Darkhall Burn, passing site of old Parkhead Toll about half-way. After crossing the burn at Millbank, turn to L. over Douglas Water and past rly. sta. (r. at Millbank, Route 51.) Road undulating, then level by Newfield. Descent to R. Nethan requiring caution. Village of Lesmahagow on L. and sta. on r. |

| 23                  | Lesmahagow Toll ..... | 5½             | 72     | Lesmahagow Toll passed after crossing the br. over the Nethan; the road ascends for a short distance, is then undulating, and rises in a winding slope from the Kirkwood Burn, beyond which hill there is a nearly level mile past Blackwood Sta., then alternate rise and fall to the ascent to 623 ft. at Cander Moss. Road descends to beyond cross-roads (r. and L., Route 79), again rises under rly. br., then falls somewhat sharply into Larkhall. Very good surface.                                                                                                                                                                         |
| 15                  | Larkhall .....        | 8              | 80     | Road gradually descending to junction, at fork roads, with Route 32, and continues to descend, at first gradually, then rather steeply, over rly. to R. Avon. Short level, then easy rise to fork road at S. end of Hamilton. Turn to r. (L., Routes 32 and 78). Surface lumpy in places; good on whole.                                                                                                                                                                                                                                                                                                                                              |
| 11½                 | Hamilton .....        | 3½             | 83½    | At the cross, bear to L., slightly, and proceed up Cadzow St., leaving the town by the Bothwell road with Hamilton Low Parks on the r. After rising out of Hamilton the road becomes level, then descends to Bothwell Br.; care required. Across the br. the tedious hill called "Bothwell Brae" is encountered, during the ascent of which keep to the L., and enter the town.                                                                                                                                                                                                                                                                       |

(second street on <i>r.</i> ) and proceed down hill to br. under rly., and up a rather steep ascent to Duke St. Sta. (on <i>r.</i> ). Here stone setts begin and double line of tramway rails. Continue up George St. to George Sq. and turn to <i>l.</i> down Queen St. to Royal Exchange.                                                                                                                                                |
|                            | (Royal Exchange.)          |                       |               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

**CARLISLE TO GLASGOW.** *Reverse.*—From Royal Exchange proceed up Queen St. to Queen St. Sta. in George Sq. Here turn *r.* along N. side of sq., and down George St. and Duke St.; double line of tram rails. Beyond Duke St. Sta., at fork formed by Carntyne Rd., ½ m. past sta., turn to *r.*, passing two rly. brs. At fork immediately after second br. keep straight on into Parkhead. At cross (fountain and public clock) take second road on *l.* (Great Eastern Rd.), and proceed by Tollcross to Mount Vernon Sta. After passing under rly. turn *l.*, and at fork roads beyond Broomhouse keep *r.*, and again to *r.* at second fork. In Hamilton proceed down Cadzow St. to cross, at which bear *r.*, then to *l.* where roads meet at south end of town, opposite the school. At fork roads, 2 m. out, keep *r.*; but at fork just before Blackwood Sta. keep *l.* At Lesmahagow Toll cross br., passing village ½ m. to *r.*; at fork keep to *r.* After passing Douglas Sta. and crossing the br. bear *r.*, and at fork roads keep on to *l.* Leaving Abington turn to *r.*, but keep to *l.* at fork roads. About 2 m. beyond Crawford Inn turn sharply to *l.*, and cross River Clyde. Road unmistakable to Lockerbie. Proceed straight through the town; at branch roads keep to *l.* At N. end of Ecclefechan bear round to *r.*, avoiding the village; descend hill with care. At 2¾ m. beyond Kirkpatrick turn to *r.*, off direct road, and enter Gretna Green. Pass over rly. at sta., cross into England at Sark Bridge, cross River Esk at Metal Bridge, and thence into Carlisle by Stanwix and Eden Bridge. Care required in descending Stanwix bank.

# ROUTE 2. CARLISLE TO DUMFRIES.

(Via Clarencefield.)

Very good road, with easy gradients. Fine views of Solway Firth on *l.*, beyond Dornock.

| <i>Miles from Dumfries.</i> | <i>Places on the Road.</i>        | <i>Mileage.</i>       |               | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| 13¼                         | Cummertrees .....                 | 3½                    |               | Passing Post Office on <i>l.</i> and Town Hall on <i>r.</i> , cross R. Annan and turn to <i>l.</i> at fork roads ( <i>r.</i> , Routes 4 and 6). Keep again to <i>l.</i> at next fork some yards further, rly. running parallel on <i>l.</i> The road is undulating to Cummertrees Cemetery, when it dips down under the rly. and rises into the village. A dip down out of the village and road passes again under the rly. About a m. out there is a short steep climb and a corresponding fall on the other side to Flish Old Toll House. At ¼ m. further, pass under rly. Fairly level to Clarencefield. Good surface.      |
| 9¾                          | Clarencefield .....               | 3½                    | 24¼           | A road to <i>r.</i> (¾ m. from village) joins Route 6. A m. further on, cross over rly., then good running to Mouswald; church on <i>r.</i> A short steep hill runs down from the church and road re-ascends to the schoolhouse. From this it descends gradually for a m. Before Collin village, road descends a short steep hill and joins Route 3 in the village. Turn sharply to the <i>l.</i> At ¼ m. beyond, the Lochar Water is crossed; thence through Gasstown village and Noblehill (a Dumfries suburb) and into Dumfries. After crossing rly. br., the stone setts are reached; at first good paving, then inferior. |

| 10 $\frac{1}{2}$         | ANNAN<br>(Cross.)      | ...                     | ...              | Proceed along High St. to N.W., passing the Town Hall on <i>r.</i> ; cross the R. Annan. Take first turning to <i>l.</i> , then keep twice to <i>r.</i> ( <i>l.</i> , Routes 2, 3, and 6). Road rises for some distance to Nethermain, and is then almost level to Eastmoor. Beyond this there is a long descent, ending rather steeply, but not dangerously, with Hoddam Lodge on <i>l.</i> Turn sharply to <i>r.</i> and cross the Annan at Hoddam Br. After crossing the river turn sharply to <i>l.</i> (ahead: by-road to Ecclefechan, 2 m., joining Route 1 there). Road rises slightly, then becomes undulating. A short steep rise up Three Well Brae, followed by a descent towards the entrance to Castlemilk. After crossing the Water of Milk, the road is undulating to the junction with Route 1, south of Lockerbie. Road fairly level into the town. (At ch. on <i>l.</i> , Route 7 enters.) Town not paved. Good surface. |

|                      | ↑<br>↗                           |                 |                  | steepish ascent past Kirkpatrick Ch. Cross the main Carlisle—Glasgow Road (Route 1); village of Kirkpatrick extending to <i>L.</i> Fair surface.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 10 $\frac{1}{4}$     | Kirkpatrick .....                | 2 $\frac{3}{4}$ |                  | Proceed straight onwards; road ascends slightly to Beetonhall (2 $\frac{1}{4}$ m.) and falls steeply to the Logan Burn, a descent requiring care. Cross the br. and ascend steep hill into village of Chapelknowe, crossing old Carlisle and Glasgow Road, at right angles. Road falls slightly and again rises steeply past Half Morton churches to Waughslee Farm. Surface indifferent for some distance. Road descends to R. Sark and rises beyond the br. Surface now improves to Canonbie. Keep to <i>r.</i> at fork roads; descend for some distance, gradually, but steep fall to the Cross Keys Hotel; care required. Turn to <i>L.</i> , cross the river and proceed up the hill, which is steep. Pass over the rly.; thence downhill into the village. The surface deteriorates for over a m. before Canonbie. |

|                                 |                                | <i>Inter-<br/>medi-<br/>ate.</i> | <i>Total.</i>    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 18 $\frac{3}{4}$                | Dalton .....                   | 7                                | 7                | From this village a by-road runs southwards to Ruthwell Sta. (Route 2). Surface not quite so good between Dalton and Lochmaben, but the hills are less frequent and the running is very fair. The Castle Loch runs on <i>r.</i> for $\frac{3}{4}$ m. before road enters Lochmaben. Short steep ascent into the town past the Parish Ch. (Route 7 passes at right angles through the town.) Proceed along High St., and leave the town with Mill Loch on <i>l.</i> ; cross rly., and at Bogle Hole keep to <i>r.</i> At Kinnel Br., $1\frac{3}{4}$ m. out, keep to <i>l.</i> at branch roads; fair surface to Templand. Road becomes loose and rough in the village and is very indifferent for some miles. Gradual rise to Chapelhill, where keep straight on. (By-road on <i>l.</i> to St. Ann's Bridge, $1\frac{1}{2}$ m.) Road ascends to Righead and falls to Bucrig. Route 31 is joined on <i>l.</i> ; keep to <i>r.</i> At entrance to Craigielands House, turn to <i>r.</i> , pass under rly. and join Route 1. Turn to <i>l.</i> and enter village. No hotel at Beattock. |

| 6½                               | Hill Summit .....              | 2½                               |               | ascends a very steep hill to 4 m.s. Road still rising, past Torthorwald Castle (on <i>r.</i> ; village on <i>l.</i> ), and continues to ascend for 2 m. The summit is reached at Raemoor. Slight decline followed by easy rise, and long run down to Burnside. The road again rises slightly and descends rather steeply past the 8 m.s.; and joins a by-road, sharply, to <i>l.</i> Bear to <i>r.</i> , and ascending into the town take first main (or second turn) to <i>r.</i> Surface rough near summit. |
| 4                                | Lochmaben .....                | 2½                               | 8½            | At fork roads S. of the town, by church, keep to <i>l.</i> , and to <i>r.</i> at next fork, having Castle Loch on <i>r.</i> Road continues level; cross R. Annan. Surface inclined to be loose from Lochmaben to this br., becoming firmer towards Lockerbie, but more hilly. Cross Dalton by-road at right angles; ascend past cemetery. Undulating into Lockerbie. Turn to <i>l.</i> in main street; Town Hall on <i>r.</i> (Here Routes 1 and 4 are joined).                                               |
|                                  | LOCKERBIE .....                | 4                                | 12½           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

**DUMFRIES TO LOCKERBIE.** *Reverse.*—From Town Hall proceed southwards down High St., and at church, on *r.*, turn to *r.* Castle Loch on *l.* before Lochmaben. At road junction Route 6 is met; bear to *r.* into town. Pass Town Hall on *r.* Take first turning to *l.*; small loch on *l.*; turn to *r.* at fork up short steep slope. At fork before Raemoor keep to *l.* Hill from Torthorwald to Roucan *dangerous* to strangers. Enter Dumfries by Victoria Ter. and York Pl. Up English St. to King's Arms Hotel, on *l.*

**ROUTE 8. DUMFRIES TO KIRKCUDBRIGHT.**

(Via Castle Douglas.)

Undulating road; with no serious hills. Good surface. The m.s.s. are marked from Nith Br. in Dumfries, and not from centre of town, in this route.

| <i>Miles from<br/>Kirkcubright.</i> | <i>Places on the<br/>Road.</i> | <i>Mileage.</i>                  |               | <i>General description of the Road.</i>                                                                                                                                                          |

Cross the Nith and keep up Galloway St. and Laurieknowe. At first branch roads keep to <i>r.</i> and again to <i>r.</i> at fork roads, d.p. |

## Route 8. DUMFRIES TO KIRKCUDBRIGHT—continued.

| <i>Miles from<br/>Kirkcudbright.</i> | <i>Places on the<br/>Road.</i>         | <i>Mileage.</i>                  |                 | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|--------------------------------------|----------------------------------------|----------------------------------|-----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                      |                                        | <i>Inter-<br/>medi-<br/>ate.</i> | <i>Total.</i>   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|                                      |                                        |                                  |                 | Cross Cargen Water; road ascends for 2 m. up the Glen Hill, which is quite rideable. Top of hill at Nunland Farm, from which road dips for some distance, and then undulating with upward tendency for $2\frac{3}{4}$ m. Cross Glen Burn. [On r., beyond Deanside, $6\frac{1}{2}$ m. out, by-road into Dumfries by Shawhead, Routen Br., and Irongray; or, turning r. at Shawhead, and passing Free Ch., into Dumfries by the Grove and Lochfield Sta.] At $\frac{1}{4}$ m. beyond Deanside, road ascends for $\frac{1}{2}$ m.; at top undulating to Crocketford.                                                                                                                                                                                                                                                                                     |
| 18 $\frac{3}{4}$                     | Crocketford ..<br>(or Nine Mile Bar.)  | 9 $\frac{1}{4}$                  | 9 $\frac{1}{4}$ | Keep to l. in centre of village (r., Route 24); here the telegraph posts are left behind. At branch roads beyond village, keep to r. (l., by-road to Dalbeattie). Road descends to Auchencroch Loch. Along the shore of this loch, level for over a m.; then a slight rise to Springholm village and a long descent through it, and beyond (r. to Kirkpatrick—Durham). At the foot of village cross a br. and wind downwards with a slight rise breaking the descent. A m. further on there is another descent for $1\frac{1}{4}$ m., followed by an easy rise and a subsequent fall to the Urr Water. Beyond the br. the ascent of the Ram Hill commences, perhaps the steepest gradient on this road, but quite rideable; ascent for $1\frac{1}{2}$ m. Downhill past Hallatown House and a rise to Castle Douglas Sta., with descent into the town. |
| 16                                   | Springholm .....                       | 2 $\frac{3}{4}$                  |                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| 32                          | Dumfries<br>(High Street.) |                         |        | Proceed up High St. to Burns' Monument; continue up Castle St. and turn to <i>l.</i> down Buccleuch St.; cross river by Nith Br. and proceed up Galloway St. and Laurieknowe. Keep to <i>r.</i> at branch roads and to <i>l.</i> at fork; d.p. Road falls to Cargen Br. and rises for about $\frac{7}{8}$ m. from it, then falls to Goldielea. Road again ascends, at first gradually, for $\frac{1}{4}$ m., then in a long steep hill; rideable. There is a break of about 100 yds., level, on the hill, after which it again ascends. Road rises past 4 m.s., is then level, and dips past the road end (by-road) to Lochfoot (on <i>r.</i> ). Easy from Lochanhead Sta. to Beeswing. At S. end of village, near Free Ch., keep to <i>r.</i> ( <i>l.</i> to New Abbey). Downhill, and pass on <i>r.</i> road to Killywhan Sta. Road now crosses a moss; surface loose in dry weather, to Kirkgunzeon Sta. |

| 11½                          | Auchencairn .....                   | 3½                      | 20½    | improves to good beyond this. Road on the whole flat, with only slight undulations in places, to Auchencairn.                                                                                                                                                                                                                                                                     |
| 7¾                           | Bankhead Mill .....                 | 3¾                      |        | Out of the village keep to <i>l.</i> up a winding hill to the school (dangerous when descending). Fair road for 1 m., then long steep ascent for 1 m., followed by 1¾ m. of undulating road. [At Bankhead Mill a road leaves on <i>l.</i> for Kirkcudbright via Dundrennan Abbey; good road; hilly.] Keep to <i>r.</i> at the mill; descent for 1¼ m., then undulating to Bombie. |
| 3½                           | Bombie .....                        | 4½                      | 28½    | Road descends a long hill, requiring care; at foot, road divides. Turn to <i>r.</i> and cross Buckland Burn; ascend winding hill, at top of which a few yds. level; then descent, requiring great care, into the town. Enter by St. Cuthbert St.                                                                                                                                  |
|                              | KIRKCUDBRIGHT<br>(Town Hall.) ..... | 3½                      | 32     |                                                                                                                                                                                                                                                                                                                                                                                   |

**DUMFRIES TO KIRKCUDBRIGHT.** *Reverse.*—From Town Hall proceed down St. Cuthbert St. and slightly beyond rly. sta. (on *l.*) turn to *r.* At br. over Buckland Burn, bear to *l.* In Auchencairn keep to *r.*, then again to *r.* on leaving village. At fork, to *r.*; thence straight on to Palmackie. Here turn *l.*; at fork keep to *r.*, and at Buittle Br., before Dalbeattie, keep to *r.* over the br. Near the Urr Br. at N. end of Dalbeattie, keep to *r.* under rly. Near Corra Castle, keep to *r.* past rly. sta. (on *l.*). Over Nith Br. into Dumfries; along Buccleuch St. and to *r.* in Castle St., past Burns' Monument, down High St. to King's Arms Hotel.

## ROUTE 10. DUMFRIES TO STRANRAER.

Very good road, though hilly in parts, to Newton Stewart. From that town to within 5 m. of Glenluce the road is bad, with grass-grown surface in places. Good level road from thence to Stranraer. There is no inn on the road between Newton Stewart and Glenluce, 15½ m.

| Miles from<br>Stranraer. | Places on the<br>Road.               | Mileage.                |        | General description of the Road.                                                                                                                                                                                                                                      |

|                       |                                      |                 |                  | Dee. At fork keep to <i>r.</i> and at Threave Bridge bear <i>r.</i> , crossing the br.; level for $\frac{1}{2}$ m. At next fork keep to <i>r.</i> up a hill; road rises to br. over the rly., from which it descends somewhat steeply to Ringford.                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 52 $\frac{3}{4}$      | Ringford .....                       | 6               | 24               | Road level to br. over Tarf Water. At fork roads, after passing sta. road end keep to <i>r.</i> and cross the Tarf. Keep straight ahead; at fork incline to <i>l.</i> Surface fair. Ascend a long hill to Twynholm with rather a stiff slope up into village. Out of Twynholm road rises slightly to Barwhinnock Lodge, where it is level for a short distance, but ascends again to cross-roads; undulating to Minto Cottage. Good surface.                                                                                                                                                                                                                                             |
| 47 $\frac{1}{4}$      | Minto Cottage.....<br>↓<br>↓         | 5 $\frac{1}{2}$ | 29 $\frac{1}{2}$ | Road falls to Barharrow, curving rather steeply as it falls. At Barharrow keep to <i>r.</i> ; a sharp curve requiring care; descent of over 100 yds. Rise for $\frac{1}{4}$ m.; then road falls again, steeply at first to the level. Before the main entrance to Cally Park is reached the road falls steeply into Gatehouse. This hill requires care, but is not dangerous. Town Clock on <i>l.</i> and Murray Arms Hotel.                                                                                                                                                                                                                                                             |
| 43 $\frac{3}{4}$      | Gatehouse-of-Fleet<br>(High Street.) | 3 $\frac{1}{2}$ | 33               | Proceed straight along High St.; short descent to Fleet Water, then bear to <i>l.</i> Lumpy for a m. to the Quay side. Road follows the shore; 2 m. out, bends quickly to <i>l.</i> , crosses the Skyre Burn, turns again to <i>l.</i> and ascends a short steep hill. Ascent for 2 m. almost without a break. Stiff rise through a wood beyond Ravenshall and cross the Kirkdale Burn. Sharp curve to <i>l.</i> on to, and off, the br. Downward slope on the whole to Carsluith Castle, and to the burn, $\frac{1}{2}$ m. further. Caution required when passing the quarries: rails laid across the road. Fairly level to Creetown. A low br. is crossed before entering the village. |
| 31 $\frac{3}{4}$      | Creetown .....                       | 12              | 45               | Proceed through village, cross the burn, and ascend a steep hill. Keep straight ahead; descent to the level. Pass under rly. and, $\frac{1}{2}$ m. further, ascent to Blackcraig with rather steep finish. Road again falls to the Lane Burn, and rises up a curved hill, descending into Newton Stewart.                                                                                                                                                                                                                                                                                                                                                                                |
| 25 $\frac{1}{2}$      | Newton Stewart ...<br>(Town Hall.)   | 6 $\frac{1}{4}$ | 51 $\frac{1}{4}$ | Keep to <i>l.</i> , sharp right angle; town not paved. Proceed through town, with Galloway Arms Hotel on <i>r.</i> , along Victoria and Albert Streets. At the Fountain turn sharply to <i>r.</i> and ascend                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

# Route 10. DUMFRIES TO STRANRAER—continued.

| IO                    | Glenluce .....                    | 15½            | 66¼    | Princes St. ; rly. sta. passed on <i>l.</i> A long steep slope upwards, with good surface, for 1½ m. ; then undulating. Surface deteriorates 3 m. out and is very indifferent to Barlae. Cross the Bladenoch Water, and at fork keep to <i>r.</i> Road now becomes grass-grown and is frequently very rutty. Improves after about 2 m., but surface still bad. From Barlae descend into Glenluce ; surface improving. The fall is gradual and finishes in centre of town. Care required on entering town. |
|                       | STRANRAER .....<br>(Court House.) | IO             | 76¼    | Proceed straight through town ; at W. end bear to <i>l.</i> at rly. br. Road level ; good surface. At Whitecrook keep to <i>r.</i> ; road a little lumpy past Dunragit 1¼ m. further. At fork beyond Castle Kennedy keep to <i>l.</i> At Bridge of Aird keep straight on, and enter Stranraer 1¼ m. further. Town badly paved with cobbles. Fair surface. Routes 18 and 40 joined here.                                                                                                                   |

**DUMFRIES TO STRANRAER. Reverse.**—Leave town due E. and pass rly. At fork keep to *r.* and at Castle Kennedy again to *r.* Turn sharply to *r.* over Water of Luce before Glenluce, and at fork near rly. sta. keep to *r.* Avoid all branch by-roads to *r.* and *l.* before Newton Stewart. After passing rly. twice, bear to *l.* into the town. Cross R. Cree by Cree Br., bear to *r.* and again to *r.* at fork. Unmistakable through Creetown to Gatehouse-of-Fleet. Cross Fleet Br., pass through town and turn to *r.* at fork roads. At Barharrow road bends round to *l.* and goes again to *l.* at fork beyond. Cross Br. of Tarf and bear to *l.* At fork, 2¼ m. beyond Ringford, keep to *r.* At Carlingwark Loch turn to *l.* when meeting another road at right angles. From Castle Douglas proceed as in Reverse of Route 8.

## ROUTE 11.

### NEWTON STEWART TO WHITHORN.

Good road to Wigtown. The roads in this part of the country are not of the same quality as those lying to the east of Newton Stewart or west of Glenluce, though they have improved of late years.

| 13 $\frac{3}{4}$        | Bladenoch .....        | 1                       |                  | Descend from the town past rly. sta. and at the distillery at Bladenoch turn to <i>L.</i> , and take first turn to <i>L.</i> after crossing it; road undulating; surface good. At Newton keep to <i>L.</i> ( <i>r.</i> to Port William). Road narrows and surface degenerates. Up a short hill past Kirkinner, and at Littlehill turn to <i>r.</i> Short ascent and subsequent descent to Sorbie. Pass Sorbie Sta. and enter the village. Keep straight on ( <i>L.</i> to Garlieston). Road undulating, with short hills tending downwards towards Whithorn. Enter village, passing Priory on <i>r.</i> [The road continues through the village to the Isle of Whithorn—now a peninsula—on which there are the ruins of an ancient chapel.] |

*General description of the Road.*

Wigtown joins on *r.* (see note). Fairly level stretch to Auchenmalg Bay, where road bends to *r.*, leaving the shore and crossing a stream at Auchenmalg Br., where keep *l.* Ascent from the shore for over 1 $\frac{1}{2}$  m., then undulating, with descent into Glenluce. Fairly good surface, but with a tendency to be soft in parts.  
(Routes 10, 16, and 17 are joined here.)

**PORT WILLIAM TO GLENLUCE. Reverse.**—Leave southwards at the cross-roads, pass over a small stream and ascend from the village. At 7 $\frac{1}{2}$  m. keep to *r.* by the shore, at fork, road thence following shore to Port William.

**EDITOR'S NOTES.**—(a) At fork beyond a small stream just out of Port William, northwards, a road leaves to *r.* for Wigtown by way of Kirk of Mochrum and High Barness, joining Route 14 at Bladenoch Br. Narrow undulating road with fairly good surface.  
(b) Another road of a like nature leaves to *r.*, just beyond the Alt Burn, leading also to Wigtown, joining the road referred to in note *a* just over a m. W. of High Barness.

**ROUTE 16.****NEWTON STEWART TO PORT PATRICK.**

The direct road. Riders who wish to avoid the bad bit between Whitehill and Kildrochet should go to Stranraer by Route 10, and from thence to Corner House by Route 18.

|                            |                                         | Inter-<br>medi-<br>ate. | Total. |                                                                                                                                                                                                                                                                                                                   |
| 3                          | [Colfin Station.]<br><br>⇓              | 2½                      |        | descends rather quickly for a short distance, and re-ascends. Colfin Sta. passed on L., rly. crossed twice. Road descending towards Port Patrick rather steeply, especially on entering the town. Care required. At fork, during descent, keep to r. Rly. Sta. passed on L. before the town. Fairly good surface. |
|                            | <b>PORT PATRICK</b> .....<br>(Harbour.) | 3                       | 29½    |                                                                                                                                                                                                                                                                                                                   |

**NEWTON STEWART TO PORT PATRICK.** *Reverse.*—Ascend the steep hill out of the town, passing sta. on r. At fork, about 1½ m. out, keep r. Cross rly. twice, and pass Colfin Sta. on r. Again pass rly., and at Corner House beyond Lochans turn sharply to r. At Kildrochet turn quickly to L., and avoid all branch roads to L. to Whitecrook. Thence, as in Reverse of Route 10, to Newton Stewart.

**EDITOR'S NOTES.**—(a) About ½ m. beyond Port Patrick Sta. on reverse route, a narrow, rather hilly road leaves to L. for Stranraer by Leswalt Ch. Good surface on the whole.

(b) On ascending out of Port Patrick, as in reverse route, a road leaves to r. at sta. for Port Logan and Kirkmaiden, joining Route 13 at Ardwell House. This is also a hilly, narrow road, with fairly good surface.

**ROUTE 17. GLENLUCE TO DRUMMORE.**

Narrow road; poor surface at first, then improving. Attractive scenery towards the Mull of Galloway.

Surface poor to junction with Route 18 (on r.), where Sand Mill Burn is crossed. At branch roads ½ m. further keep to L. into Sandhead. Surface rough on the whole, but improves somewhat after joining Route 18. |
| 9½                      | Sandhead .....         | 4½                      | 8½     | Proceed southwards to Drummore as in Route 18.                                                                                                                                                                                                                                        |
|                         | <b>DRUMMORE</b> .....  | 9½                      | 18     |                                                                                                                                                                                                                                                                                       |

**GLENLUCE TO DRUMMORE** *Reverse.*—As in Reverse of Route 18 to Sandhead. At fork at br. over Sand Mill Burn keep to r. and turn to r. at Whitehill, thence by Reverse of Route 16 to Glenluce.

# ROUTE 18. STRANRAER TO DRUMMORE.

Surface apt to be rough or uneven in parts, but very fair on the whole ; gradients easy and long stretches of level running obtained by the shore.

At fork keep again to <i>L.</i> ( <i>r.</i> , to Port Logan), slight rise, then level ; at about a m. further road descends to shore again and follows the coast to Drummore ; slightly undulating. Surface uneven in parts, but fair as a whole.                                                                                                                                                          |
|                                 | DRUMMORE .....                       | 6 $\frac{1}{2}$                  | 17 $\frac{1}{4}$ |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

**STRANRAER TO DRUMMORE, Reverse.**—Follow coast to beyond Terally Bay then upwards, to *L.*, at fork. When joining the Port Logan Road (on *L.*) turn *r.* Shore regained near Ardwell and followed to Sandhead. At fork after crossing Sand Mill Burn turn *L.* and at Kildrochet (where Route 16 is joined on *r.*) keep *L.* At Corner House keep to *r.* ; and about a m. further pass under rly. and turn *r.* Keep to *L.* at fork before Stranraer.

**EDITOR'S NOTE.**—To reach Mull of Galloway lighthouse, proceed direct inland from Drummore and on joining a road from Kirkmaiden turn to *L.* Thence an undulating road to the Mull. Fine seascapes.

# ROUTE 19. DUMFRIES TO DALBEATTIE.

(Via coast road.)

ood road, but hilly, to Kirkbean and Southwick Houses. From Southwick House to Sandyhills very stiff rises and falls, with loose surface, improving by Barnbarroch into Dalbeattie.

| Miles from Dalbeattie. | Places on the Road.                    | Mileage.        |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

**DUMFRIES TO DALBEATTIE.** *Reverse.*—Leave southwards from Town Hall. Bear to *L.* at Lochend. Cross Southwick Water beyond Sandyhills Bay. At Sweetheart Abbey bear to *L.*, then turn *r.* and cross the br., keeping to *r.* when over. Just beyond Gillfoot Farm turn to *r.*, and again sharply to *r.* before Cargen Br., which cross and keep to *L.* On joining Route 9 turn *r.* towards Dumfries.

**EDITOR'S NOTE.**—A very tortuous road connects Dalbeattie with Castle Douglas. Join Route 6 at N. end of Dalbeattie, and proceed to Buittle Br. Here turn *r.*, and bend round to *L.* over  $\frac{1}{2}$  m. further. Pass over cross roads beyond the Manse, road bending to *r.*, then to *L.* At fork keep to *r.*, and on joining Route 8 near the rly. sta. turn to *L.* into Castle Douglas. A very undulating road, with some stiff rises. When going from Castle Douglas to Dalbeattie by this road care must be taken on descending to Buittle Br. Fair surface on the whole, though loose and rough in parts.

## ROUTE 20. DUMFRIES TO GLASGOW.

A magnificent main road, with excellent surface and easy gradients, between Dumfries and Kirkcubright and after Kilmarnock. Fine scenery up the Nith Valley and moorland views before New Cumnock. From Fenwick to the outskirts of Glasgow the road is one of the finest in Scotland, and is also a favourite one with local riders. For loop road from Dumfries to Sanquhar via Penpont, see note below.

| Miles from Glasgow. | Places on the Road.              | Mileage.        |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

At Menock road dips suddenly for about 100 yds., with curve to <i>r.</i> , then ascends and is again undulating into Sanquhar. Excellent surface.                                                                                                                                                                                                                                                                                                                                                                    |
| 3 $\frac{1}{4}$     | Sanquhar .....                       | 2               | 26 $\frac{1}{2}$ | At fork in the village keep to <i>L.</i> ; slight descent to Crawick Water, then ascending towards Kirkconnel, still between river and rly.; dip, for 100 yds., near a coal pit, and rise into Kirkconnel. Splendid surface.                                                                                                                                                                                                                                                                                                 |
| 9 $\frac{1}{2}$     | Kirkconnel .....                     | 3 $\frac{1}{2}$ | 30               | Level for $\frac{1}{2}$ m., then ascending, somewhat stiffly, over R. Nith to Rig. For 2 $\frac{1}{2}$ m. there is a succession of somewhat tantalising rises and falls; then the road ascends a long hill, and subsequently descends in a further series of sharp undulations, and this character is maintained to Afton-Bridgend, where, after crossing Afton Water, turn to <i>r.</i> into New Cumnock. On the moorland, from Kirkconnel, the surface is poor, becoming loose and rough, but improving into New Cumnock.  |
| 1 $\frac{3}{4}$     | New Cumnock.....<br>(Parish Church.) | 8               | 38               | Proceeding northwards, pass rly. sta. and turn to <i>L.</i> at Pathhead; undulating rise for over 1 $\frac{1}{2}$ m., followed by a dip, a short re-ascent and a long descent of 2 $\frac{1}{2}$ m. into Cumnock, passing rly. sta. on <i>L.</i> ; during the descent care required. Fairly good surface.                                                                                                                                                                                                                    |
| 6 $\frac{1}{2}$     | Cumnock .....                        | 5 $\frac{1}{4}$ | 43 $\frac{1}{4}$ | Pass through the village, bear to <i>L.</i> , cross the Lugar Water and ascend towards Auchinleck, avoiding branch roads at S. end of the village.                                                                                                                                                                                                                                                                                                                                                                           |
| 4 $\frac{3}{4}$     | Auchinleck .....                     | 1 $\frac{3}{4}$ |                  | Ascent through Auchinleck keeping to <i>L.</i> at branch roads. Road dips, then re-descends to a small br.; is fairly level for a short distance, then again rises, and falls, steeply, to Howford Bridge; keep to <i>L.</i> on the descent. Sharp winding ascent from the br., then easier rise into Mauchline. Good surface. (Route 51 crossed here.)                                                                                                                                                                      |
| 1 $\frac{1}{2}$     | Howford Bridge .....                 | 3 $\frac{1}{4}$ |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 9 $\frac{3}{4}$     | Mauchline.....                       | 1 $\frac{3}{4}$ | 50               | Road still on the ascent out of the village; keep to <i>r.</i> at fork ( <i>L.</i> to Tarbolton) and over $\frac{1}{2}$ m. further road descends, quickly at first, then easier over the cross-roads, beyond which the descent again becomes rapid for a short distance, then falls more gradually to the Cessnock Water, before reaching which there is an awkward bend, near the rly., which should be carefully ridden. Undulating descent, over cross-roads, into Hurlford, where Route 59 is joined. Very good surface. |

Route 20. **DUMFRIES TO GLASGOW**—*continued.*

| <i>Miles from Glasgow.</i> | <i>Places on the Road.</i>           | <i>Mileage.</i>       |                  | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                            |
|----------------------------|--------------------------------------|-----------------------|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

| 23                         | Hurlford .....                       | 6 $\frac{3}{4}$       | 56 $\frac{3}{4}$ | Keep straight on, crossing the R. Irvine, from which the road ascends; pass the rly., gradual fall towards Kilmarnock. Enter the town by London Rd. and Duke St. Good surface; latter part lumpy, and rough paving in the town. (Routes 55, 57, 58, 59, 60, and 61 joined here.)                                                                                   |
| 21                         | Kilmarnock ...<br>(Cross.)           | 2                     | 58 $\frac{3}{4}$ | Proceeding northwards from the Cross, along Portland St., pass the rly. br., and ascend Wellington St. and Dean St. Road continues to ascend; keep to <i>r.</i> at Beansburn ( <i>L.</i> to Route 60). Avoid all branch roads; gentle, well-graded rise to Fenwick. Excellent, smooth surface.                                                                     |
| 16 $\frac{3}{4}$           | Fenwick.....<br>(King's Arms Hotel.) | 4 $\frac{1}{4}$       | 63               | The road is still rising, out of the village, and the long gradual ascent is continued for 4 m.; keep to <i>L.</i> where roads join, along what is known as the New Glasgow Road, at 3 m. from Fenwick.                                                                                                                                                            |
| 12 $\frac{1}{2}$           | Summit.....                          | 4 $\frac{1}{4}$       |                  | The road rises to over 700 ft. at the summit, where the splendid downhill run towards Glasgow commences. At fork, 2 m. beyond the summit, keep to <i>L.</i> ; descent for over a m., followed by a short easy rise, then the descent is resumed into Newton Mearns. Splendid surface.                                                                              |
| 7                          | Newton Mearns .....                  | 5 $\frac{1}{2}$       | 72 $\frac{1}{4}$ | Road still descending, past the cross-roads (Route 75), and towards Giffnock Sta. (on <i>r.</i> ). Fairly level for $\frac{1}{2}$ m., then re-descending, with one or two undulations, to the White Cart Water; then fairly level into Shawlands, where Route 60 is joined on <i>L.</i> , and Crossmyloof passed through.                                          |
| 2 $\frac{1}{4}$            | Shawlands .....                      | 4 $\frac{3}{4}$       |                  | Tramlines met in Shawlands. Enter Glasgow by Pollokshaws Rd. and follow the tramlines along Eglinton St. and Bridge St. to Glasgow Br., which cross; proceed up Jamaica St., turn to <i>r.</i> along Argyle St., and go up Queen St. (third on <i>L.</i> ) to Royal Exchange (on <i>L.</i> ). Surface bumpy on approaching Glasgow; rough stone setts in the city. |
|                            | <b>GLASGOW</b> .....                 | 2 $\frac{1}{4}$       | 79 $\frac{3}{4}$ |                                                                                                                                                                                                                                                                                                                                                                    |
|                            | (Royal Exchange.)                    |                       |                  |                                                                                                                                                                                                                                                                                                                                                                    |

**DUMFRIES TO GLASGOW. Reverse.**—From Royal Exchange proceed down Queen St., turn to *r.* along Argyle St. (tram lines), then to *L.* down Jamaica St. Cross Glasgow Br., and continue by Bridge St. and Eglinton St., and nearly a m. beyond Glasgow Br. bear to *r.*, following one set of tram lines along Pollokshaws Rd. to Crossmyloof and Shawlands. At fork before latter place bear to *L.*, still following tram lines, but leave them when they bend to *r.*, and keep straight on, crossing the

White Cart Water and passing under a rly. br. Keep to *r.* at fork about 2 m. before Fenwick. Pass straight through that village, and keep first to *r.*, then to *l.* at forks beyond. At the Cross in Kilmarnock turn sharply to *l.* by Duke St. and London Rd., keeping well to *r.* on leaving. Pass straight on over the cross roads at Hurford and at Mauchline, then keep to *r.* at fork. Bend to *l.* before Cumnock, cross a stream, and turn *r.*, keeping to *l.* at fork in the village, proceeding straight out, ascending, and passing rly. sta. on *r.* Keep to *l.* at fork, then straight on. At Pathhead turn sharply to *r.*, passing rly. sta. into New Cumnock, leaving which village turn sharp *l.* at Afton Bridgend and cross Afton Water. Beyond Sanquhar keep *l.* (with rly. on *l.*), and keep well to *l.* to Enterkinfoot and Carronbridge, and before Thornhill. At Auldgirth Br. turn to *r.*, cross the river, then turn *l.* At fork,  $2\frac{1}{2}$  m. further, keep to *r.*, and avoid a road to *r.* just beyond. At New Br. turn *l.*, and again to *l.* on entering Dumfries, crossing the R. Nith, then by Buccleuch St., Castle St., and Burns's Monument to High St.

EDITOR'S NOTE.—A by-road runs almost parallel, to the W. of Route 20, between Friar's Carse and Sanquhar, crossing Route 22 at Penpont. At branch roads at Friar's Carse,  $\frac{5}{8}$  m. out, turn to *l.* then keep to *r.* at next fork, and ascend, steeply in one part, to Glenhead. Winding descent to Cleuch, then very undulating to Penpont. Here turn *r.* and then *l.*, crossing Route 22. Steep climb for 2 m., then descending for 2 m., again ascending, more gradually (keeping to *l.* at fork, *r.* to Drumlanrig Woods) to Kirkealdy, followed by a quick descent to R. Nith, beyond which Route 20 is rejoined. This loop road is hilly and rough in parts, but the scenery is very attractive. Penpont 15 m., Sanquhar  $27\frac{1}{2}$  m.

## ROUTE 21. DUMFRIES TO AYR.

(Via Dalmellington.)

The bad bit of road between Moniave and Carsphairn is included in this route as affording the most direct communication between the two places. It is, however, not a pleasant bit to cycle as far as surface and gradients go; but it is short, and the scenery is very rugged and wild, with an interest all its own. This portion may, however, be avoided between Dumfries and Ayr by going on to Cumnock by Route 20, and thence to Ayr by Route 50; or, by going from Moniave to Dalry by Route 22, and thence to Carsphairn by Route 23. Both these alternative routes have good surface.

| Miles from Ayr.  | Places on the Road.            | Mileage.        |                 | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                        |

|                    |                                              | Inter-<br>medi-<br>ate. | Total.           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 41 $\frac{1}{2}$   | Moniave .....<br>( <i>Pron. Minny-ave.</i> ) | 7 $\frac{1}{2}$         | 17 $\frac{1}{2}$ | Turn to <i>L.</i> into centre of village on meeting Route 22 at right angles, and keep to <i>r.</i> near the Cross and the Craigdarroch Arms ( <i>L.</i> , Route 22). Good road to Craigdarroch with a few slight hills but the surface soon degenerates and becomes loose, rough, stony. This is considered a very bad bit of road, as far as Carsphairn, but at this point it is absolutely unrideable—being a typical unused Scotch moorland road. The hills become steep after 4 m., requiring considerable power if they are to be ridden up. This for 1 m., then it becomes more or less downhill to Knowehead, with a rise to Carsphairn. Route 23 comes in on <i>L.</i> , before Carsphairn, after which point the surface improves somewhat.                                                                                                                                                                                                                                          |
| 25 $\frac{1}{2}$   | Carsphairn .....                             | 16                      | 33 $\frac{1}{2}$ | Gradual rise to the br. over the Water of Deugh which cross, keeping straight on up the hill ahead. The road, from this point, again rises over the open moors in a long, very undulating ascent. Near the summit Loch Muck is passed on <i>L.</i> , and the downgrade begins about $\frac{1}{2}$ m. further, the road winding down the valley of the Muck Water. The last m. should be carefully ridden as the road descends into the village of Dalmellington. Surface apt to be loose and rough in parts; a bare exposed road, but affording very fair riding on the whole, as moorland roads go. Keep well to <i>r.</i> before the village of Dalmellington. (Roads to <i>r.</i> and <i>L.</i> , see note.)                                                                                                                                                                                                                                                                                |
| 15 $\frac{1}{2}$   | Dalmellington .....                          | 10                      | 43 $\frac{1}{2}$ | Pass straight through village, rly. running on <i>r.</i> down the Doon valley. Very good bit of road running to Waterside Sta. and to Patna Station. Bridgend, sta. on <i>r.</i> Here keep straight on ( <i>L.</i> over the br., a road leads to Patna and eventually joins Route 44). Slight ascent, cross rly., then descending, easily. Keep to <i>L.</i> at fork ( <i>r.</i> , by road by Littlemill joining Route 50). Winding descent to a small br., with stiff rise on other side, then undulating to Hollybush Sta. Here rly. is passed, the road again descends, quickly in parts; keep to <i>r.</i> at fork. After crossing small br. turn to <i>L.</i> , then to <i>r.</i> , crossing Route 49, stiffish ascent. Undulating to head of Whitehill Brae. This is a steep descent and must be carefully ridden. Road very undulating, and still descending, towards Ayr. After passing rly. sta. on <i>r.</i> , proceed straight on into High St., to Town Hall at corner of Sandgate |
| 12                 | Waterside Station .....                      | 3 $\frac{1}{2}$         |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 10                 | Patna Station .....                          | 2                       |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| Ayr .....          | (Town Hall.)           | 6½                      | 59<br>22<br>76 | St. and High St. A few of the thoroughfares in Ayr are not noted for their good paving.<br>(Routes 23, 40, 43, 44, 50, 51, 53, 54, 55, and 56 are joined here). |

**DUMFRIES TO AYR. Reverse.**—Leaving Town Hall proceed by High St., in which bend to *r.*, and keep to *l.* at fork streets to rly. sta. Here, at fork, keep to *r.*, crossing the Coynton Rd. About a m. further road bends first to *r.*, then to *l.*, subsequently ascending the Whitehill Brae. On meeting Route 49 turn sharp *l.*, then, a short distance further, sharp *r.* Cross rly. near Patna Sta., and keep straight on with rly. on *l.* Avoid a road leading to *l.* out of Dalmellington, but cross the Parrie Burn and ascend to the moorlands. Keep to *l.* at branch roads beyond Carsphairn. At next fork keep *l.*, and at about 1½ m. further to *r.*, crossing Water of Ken. On entering Moniave keep to *l.*, cross a small stream in the village, then turn sharp *r.*, passing a ch. on *r.* beyond. Keep to *r.* at fork at Kirkland. Keep to *l.* in passing through Dunscore, and again to *l.* at fork. Join Route 20 near Friar's Carse, then as in Reverse of that route into Dumfries.

**EDITOR'S NOTES.**—(a) Dunscore may also be reached via Corsefield. This is a hilly road, but a little more direct than that detailed above. Follow forward description of Route 21 to New Br.; when over the br., turn sharp *l.*, passing the "Twelve Apostles" on *r.* Steep ascent from the br.; about ½ m. further, road dips, steeply. Keep to *r.* at fork (*l.* to Dunscore, up the Cairn Water—a poor road). Steady ascent for 1 m., then a stiffer uphill pull for 2½ m., dipping to Lagganlees. Beyond this, a steep dangerous hill, with two curves, first to *l.*, then to *r.*, to be carefully ridden. Re-join Route 21 at branch roads. Good surface on the whole. Distance, 9 m.

(b) Roads to *r.* and *l.* at Dalmellington. The road eastwards, to *r.*, is a very hilly one, leading to New Cumnock (10 m.), and joining Route 20 at Afton-Bridgend. At fork beyond Macnaught keep to *r.* (*l.* to Cumnock—also hilly, but fairly good surface), and at Afton-Bridgend turn sharp *l.* Surface fair on the whole, but poor in parts. The road westwards, to *l.*, leads over the hills and joins Route 44 at Straiton. Fairly level for a m., R. Doon crossed, then a long ascent of 1 in 1½ followed by about 2½ m. of undulating road, and a rapid descent into Straiton—dangerous. The distance is 6½ m. Rough surface.

## ROUTE 22.

## THORNHILL TO NEW GALLOWAY.

Good to Moniave—used as a coach road, then poor surface in parts over the moors. The descent towards the Spalding Arms to be carefully ridden—especially at Bogue Farm.

## General description of the Road.

to r.]. Undulating road by Burnhead to Penpont (road crossed here at right angles—see note to Route 20). Pass straight through the village and cross the Scar Water. At fork,  $\frac{3}{4}$  m. further, keep to L., road gradually ascending. Cross the Shinnel Water and proceed up a steepish ascent, of about 1 in 20, for a m., then keep to r. at fork as descending towards Kirkland. Route 21 joined on L.; Glencairn Ch. passed on r.; undulating into Moniave. Turn to L. when in the village. Good surface. Leave the village, passing the Craigdarroch Arms on L., turn sharp round to L., round the side of this hotel, and proceed up a slight hill, past the Union Bank (on L.). Gradual undulating rise for about 4 m. to a small br., then ascent becomes steeper, and the road rises over the bleak moorland in a succession of short ascents for nearly 4 m. to the summit, with an undulating descent towards Gordonston Mill. Fairly level before the mill. Turn sharply to L. (and join road on r. from Lochinvar), cross Lochinvar Burn; short steep ascent, followed by a long downhill run, with sharp fall at Bogue Farm—dangerous. This descent should be walked down or ridden only with a very powerful brake. At d.p. turn to L. down another steep slope (r. direct road to Dalry). Where roads divide, near the manse, keep to r., road still descending. Cross Route 23 at right angle at the Spalding Arms; downhill to br. over Water of Ken, then ascending. Keep to L. at fork, up into New Galloway. Surface from Moniave good for first 3 m., indifferent for 1 m., then rough to near New Galloway. (Routes 24 and 27 joined here.)

**THORNHILL TO NEW GALLOWAY. Reverse.**—Leaving New Galloway keep to r. down to Water of Ken, which cross and ascend to cross-roads at the Spalding Arms, beyond which keep to L. near the manse. At d.p., on meeting another road at right-angles turn sharply to r. Avoid a road to L. just beyond Gordonston Mill; unmistakable to Moniave. Passing the Craigdarroch Arms on r. bear round to r. into the village in which cross a br. and take road leaving to r. Beyond Glencairn Ch. (on L.), a fork keep to L., cross the Shinnel Water and the Scar Water and pass straight through Penpont, crossing Nith Br. before Thornhill and ascending a steep hill into the village.

# ROUTE 23. CASTLE DOUGLAS TO AYR.

good, undulating road towards Dalry, passing through some very fine scenery by the R. Dee. The climb over the open moors towards Carsphairn is somewhat dreary, but the wild surroundings are typical of Galloway moorland.

|                 | Places on the Road.                 | Mileage.                |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| 1               | CASTLE DOUGLAS<br>(Town Clock.)     | ...                     | ...              | Between the Douglas Arms and Town Clock turn to <i>r.</i> , passing Town Hall on <i>r.</i> Bear to <i>r.</i> then to <i>l.</i> up a hill past the R. C. Chapel, over the rly. Downhill for $\frac{1}{4}$ m., then undulating, rly. running on <i>r.</i> Pass over the cross-roads at Greenlaw ( <i>l.</i> , see note below), rise to br. over rly., with gradual fall to Crossmichael. Good surface.                                                                                                             |
| 7 $\frac{1}{4}$ | Crossmichael                        | 3 $\frac{3}{4}$         | 3 $\frac{3}{4}$  | Road rises out of the village, then falls, and is fairly level for a short distance, then undulating; rly. on <i>l.</i> Ascent towards Parton Ch., followed by short steep fall; sta. passed on <i>l.</i> Good surface.                                                                                                                                                                                                                                                                                          |
| 4               | Parton                              | 3 $\frac{1}{4}$         | 7                | Very undulating road for over 3 m., then gradual ascent from Shirmer's Br., with Loch Ken on <i>l.</i> This is followed by a fairly level stretch for about $1\frac{1}{2}$ m., road then falling gradually by Highpark to the cross-roads at the Spalding Arms. Here Routes 22 and 24 are crossed. Very easy bit of road for $1\frac{1}{2}$ m., with gradual rise towards Dalry. Good surface.                                                                                                                   |
| 7 $\frac{1}{2}$ | The Spalding Arms                   | 6 $\frac{1}{2}$         |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 5               | St. John's Town of Dalry            | 2 $\frac{1}{2}$         | 16               | Passing the Lochinvar Hotel and a ch., take first turn to <i>l.</i> , ascending. Road dips to Water of Ken, which cross and join a by-road on <i>l.</i> , from New Galloway by Glenlee. Very undulating ascent up the valley of the Ken, steep in the 4th m., followed by a slight decline, then again ascending a long continuous hill to the summit. Descent to a br. over the Water of Deugh, where turn to <i>l.</i> into Carsphairn. Fair for some distance up the valley from Dalry, then rough and stony. |
| 5 $\frac{1}{2}$ | Carsphairn<br><i>Join Route 21.</i> | 9 $\frac{1}{2}$         | 25 $\frac{1}{2}$ | Proceed to Ayr as in Route 21.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|                 | Ayr<br>(Town Hall.)                 | 25 $\frac{1}{2}$        | 51               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

**CASTLE DOUGLAS TO AYR. Reverse.**—By Reverse of Route 21 to Carsphairn. At  $\frac{1}{2}$  m. beyond that village turn to *r.* over the Water of Deugh, and, beyond the summit, descend the Ken Valley towards Dalry. Bear to *l.* after crossing Pulharrow Burn, and again to *l.* over the Water of Ken, where roads branch before Dalry. Keep to *r.* when across the br. Proceed straight on through the western portion of Dalry, leaving the Water of Ken on *r.*, to the Spalding Arms. Keep straight on

at the cross roads here. Rly. joined on *r.* before Parton Sta., and crossed after Crossmichael. Rly. then on *l.* to near Castle Douglas.

EDITOR'S NOTE.—Road to *l.* at Greenlaw leads to Gatehouse-of-Fleet over the moors by Lochenbreck. After crossing R. Dee keep to *r.*, ascending, and keep again to *r.* at fork. Very undulating to Laurieston, where Route 27 is crossed. In  $\frac{1}{2}$  m. the long tedious ascent to Lochenbreck and the summit begins. Summit,  $9\frac{3}{4}$  m. from Castle Douglas. The road now rapidly degenerates, becomes loose, rough, grass-grown. It descends a long steep hill, the gradient of which is at time 1 in 15 and 16, and never less steep than 1 in 24. Towards the foot it is especially dangerous to ride down. Gatehouse-of-Fleet about 16 m. by this road.

## ROUTE 24.

### DUMFRIES TO NEWTON STEWART.

(Via Old Military Road.)

The portion of this route between New Galloway and Newton Stewart is a bad road—loose and rough. It is, however, the direct connection between those two places, and the wild, rugged scenery is very fine. Riders, however, usually prefer the fine, though circuitous, road detailed in Route 10.

| Miles from<br>N. Stewart. | Places on the<br>Road.            | Mileage.                |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| 34 $\frac{1}{4}$          | Crockettford .....                | 9 $\frac{1}{2}$         | 9 $\frac{1}{2}$  | Here turn to <i>r.</i> , road ascending for a m., then falling to a cross road and small br., beyond which it re-ascends, somewhat stiffly in parts but quite rideable; undulating past Crockett House, with winding descent towards Corsock Br. At Corsock Route 25 is met on <i>l.</i> Turn <i>r.</i> , and at fork, just beyond, keep to <i>l.</i> to the br. Fair surface.                                                                                                                                                                                                                                                                                                                                                               |
| 28 $\frac{3}{4}$          | Corsock Bridge .....              | 5 $\frac{1}{2}$         | 15               | From the br. the road ascends, passing an (old inn, to fork roads where keep <i>l.</i> ( <i>r.</i> , to Loch Urr and Route 22—bad road). Undulating stretch of road before the summit, after which the road descends, steadily at first, then steeper, with some very awkward bends, requiring careful negotiation, before and beyond Balmaclellan. Route 22 joined on <i>r.</i> , road still descending to the Spalding Arms. Route 2 crossed here, road descending to the br. over Water of Ken, then re-ascending to New Galloway. Turn to <i>l.</i> if going into the town ( <i>r.</i> by-road joining Route 23). Surface rough in parts during the descent from the summit on the moors, but fair on the whole; good into New Galloway. |
| 20 $\frac{3}{4}$          | Balmaclellan .....                | 8                       |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

|    |                                    |                 |                  | steep hill.]. Road rises for about 4 m., is then very undulating with loose surface, and descends by Clatteringshaws Farm to the R. Dee, beyond which it re-ascends for over a m., followed by a long, winding descent to Talnotry. Surface bad.                                                                                                                                                                                                                                                                                                                                             |
| 21 | Clatteringshaws .....              | 6               |                  | Ascent of $\frac{1}{2}$ m., with descent of over $\frac{1}{4}$ m. beyond ; then fairly level for about a m., and a subsequent rise of $\frac{3}{4}$ m. ; keep to <i>L.</i> at fork, near which the long descent to Newton Stewart begins. On meeting Route 10 at right angles turn sharply to <i>r.</i> and cross Cree Br. into Newton Stewart. The rider should be careful to keep his machine well in hand on the sharp turn near Murray's Monument during the descent. Surface very poor to Talnotry, but improves towards junction with Route 10 and is thence good into Newton Stewart. |
| 7  | Talnotry .....                     | 5 $\frac{1}{4}$ | 36 $\frac{3}{4}$ |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

**DUMFRIES TO NEWTON STEWART. Reverse.**—Cross Cree Br. and turn sharply to *L.* when about a m. out, having grounds of Kirouchtree House on *L.* Beyond Talnotry bend to *r.*, keeping by the waterside. Cross R. Dee; unmistakable into New Galloway. If going into the town keep to *r.* at fork; if going straight on, keep to *L.* and pass over cross roads N. of the town, descending to Water of Ken and passing over Route 23 at the Spalding Arms. Ascend the hill and keep to *r.* at fork—winding ascent. Keep again to *r.* when roads branch. Cross Corsock Br., turn *r.*, then turn to *L.* at fork. Join Route 8 at Crocketford and thence as in reverse of that route to Dumfries.

## ROUTE 25.

### DALBEATTIE TO CORSOCK BRIDGE.

A good cross-country road. Attractive scenery towards Corsock Bridge and by the Urr Water.

**STLE DOUGLAS TO AUCHENCAIRN.** *Reverse.*—At fork, just before crossing the Scree Burn keep to *r.*, and at Blackbelly turn to *l.* Pass straight on over the cross roads at Breoch, entering Castle Douglas after passing Carlingwark Loch on *l.*

## ROUTE 27.

### KIRKCUDBRIGHT TO NEW GALLOWAY.

This road goes over a series of short hills, but has a fair surface throughout, and is very picturesque by Loch Ken side.

| <i>N. Galloway.</i> | <i>Places on the Road.</i>          | <i>Mileage.</i>       |                  | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

|                     | NEW GALLOWAY .....<br>(Town Hall.)  | 5                     | 18 $\frac{3}{4}$ |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

**KIRKCUDBRIGHT TO NEW GALLOWAY.** *Reverse.*—Proceed straight out of the town southwards; Loch Ken passed on *l.*, and, beyond New Galloway Sta., Woodhall Loch passed on *r.* Pass over the cross roads at Lawrieston and on joining Route 10 at Ringford turn sharp *r.* Just beyond Tarff Sta., turn to *l.*, having rly. on *l.*, and cross R. Dee to *r.* at Tongueland Br.

## ROUTE 28.

## KIRKCUDBRIGHT TO GATEHOUSE-OF-FLEET.

Direct road between the two towns; long hills, but good surface. Gatehouse may also be reached following Route 27 to the junction with Route 10 near Tariff Sta., turning *l.*, and following Route 10 into Gatehouse—about 12 m. altogether.

| Miles from Gatehouse-of-Fleet. | Places on the Road.                 | Mileage.       |        | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                             |

KIRKCUDBRIGHT TO GATEHOUSE-OF-FLEET. *Reverse.*—As in Reverse of Route 10 to Minto Cottage. Here turn to *r.* Pass over cross-road at Langlands; cross R. Dee by the iron br. into Kirkcudbright.

## ROUTE 29. THORNHILL TO ABINGTON.

(Via Dalveen Pass.)

A well-engineered road, with good surface on the whole. The wild, rugged scenery in the Dalveen Pass is very fine. This road is easier to ride in the reverse direction.

| Miles from Abington. | Places on the Road.     | Mileage.       |        | General description of the Road.                                                                                                                                                                                                                                                            |

| Abington. | Places on the Road.     | Mileage.       |        | General description of the Road.                                                                                                                                                                                                                                                                                                      |
|-----------|-------------------------|----------------|--------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|           |                         | Inter-mediate. | Total. |                                                                                                                                                                                                                                                                                                                                       |
| 1         | Durisdeer Mill.. .....  | 2              | 5½     | rising for about ¼ m. beyond the sta., then becomes fairly level for nearly a m., when it again ascends to Durisdeer Mill, where for a short distance it is level. Good surface.                                                                                                                                                      |
| 1         | Summit.. .....          | 5              |        | The long ascent of the Dalveen Pass begins just beyond the mill, road rising on an incline of about 1 in 25 most of the way and winding between lofty hills on either side. Towards the summit the ascent becomes stiffer, being about 1 in 22, and the surface is apt to be loose and rough in parts. Summit gained at over 1100 ft. |
|           | Elvanfoot Station ..... | 6              |        | Fine, quick descent for 2 m., then almost level by Glenochar, where the Daer Water is joined in the valley on r., to Elvanfoot Sta., also on r.                                                                                                                                                                                       |
|           | ABINGTON .....          | 6½             | 23     | The rly. is passed a short distance further, and Route 1 is joined at the br. (on r.) over the Clyde. Do not cross the br. but keep straight on, following Route 1 to Abington. Surface rough for a m. or two from the summit, then good to Elvanfoot and excellent to Abington.                                                      |

**THORNHILL TO ABINGTON. Reverse.**—As in Reverse of Route 1 to near Elvanfoot, but instead of crossing the br. over R. Clyde to L., keep straight on, passing Elvanfoot Sta. on L. and ascending the pass. About a m. beyond Carronbridge Sta. keep to L. at br. over Carron Water. In Carronbridge join Route 20 and bear to L., then along the main road to Thornhill.

## ROUTE 30. THORNHILL TO ABINGTON.

(Via Leadhills.)

exceedingly stiff climb to the summit, but the views from that point are exceptionally fine. Surface good to the summit, where Lanarkshire is entered; the road is apt to be loose and rutty after Leadhills, but not to any extent unpleasant to ride. Wanlockhead—which is not on this road but lies a little to the N. of it, though it is reckoned as *on* the road in the mileage column—is the highest village in Britain.

| 6 $\frac{1}{4}$      | ↓<br>Leadhills ..... | 1 $\frac{1}{4}$ | 18 $\frac{1}{4}$ | Pass straight down through the village; road becomes fairly level after nearly a m., and remains so for a short distance, then falls quickly to the Smelting Mill. The surface now becomes rutty and is rough in parts, road continuing to descend the glen, following the Glengonn Water. Keep well to <i>l.</i> at Lattershaws and join Route 1 just before Abington. Bear to <i>l.</i> on meeting the main road; then turn first to <i>r.</i> then to <i>l.</i> into the village. Fair surface. |

|                      | ABINGTON .....       | 2 $\frac{3}{4}$ | 24 $\frac{1}{2}$ |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

**THORNHILL TO ABINGTON.** *Reverse.*—At the gateway S. of the village turn up to the left bend *l.*, and keep to *r.* at fork. Keep to *l.* at the summit (*r.* to Wanlockhead). The descent towards Menock is very dangerous in parts and the steeper portions should be walked down. On meeting the main road near Menock, after passing over the rly., turn sharp *l.* Then as in Reverse of Route 20 to Thornhill.

**EDITOR'S NOTE.**—A road connects Routes 30 and 29 between Leadhills and Elvanfoot. descending through Leadhills, turn to *r.* in the village up a very steep hill to the summit of this by-road; thence a gradual descent by the Elvan Water to Elvanfoot. Very fair surface. The hill into Leadhills, when riding over this road from Elvanfoot, is dangerous.

**ROUTE 31. DUMFRIES TO EDINBURGH.**

The direct road; some riders, however, to avoid the stiff climb out of Moffat prefer to go round Abington and Biggar, see Route 35. The road detailed below is good to Moffat, fair to Croft Inn, and thence excellent, on the whole, to Edinburgh. The portion from Broughton to Leadburn is greatly frequented by road racers. Very fine scenery after Moffat.

|    |                         |                |        | Academy St., passing R. Nith on <i>l.</i> At fork (d.p.) bear to <i>r.</i> , crossing rly., and at next fork, 2 m. from Dumfries, keep to <i>l.</i> , and to <i>r.</i> at next branch roads ( <i>l.</i> , see note below). At fork at Locharbriggs keep to <i>r.</i> , passing sta. on <i>l.</i> Road fairly level; surface lumpy out of Dumfries.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 0  | Locharbriggs .....      | 3              | 3      | Road ascends through village, and falls to the Lochar Water; here keep to <i>l.</i> and cross the stream ( <i>r.</i> to Tinwald). Surface now excellent; slightly ascending road towards Amisfield, at which keep to <i>r.</i> at fork, passing rly. sta. on <i>l.</i> Keep well to <i>r.</i> when passing the rly., and, a little further on, avoid a road to <i>r.</i> leading to Shielhill Sta. Long ascent to Johnsfeld Farm; then descending, at first easily, then more steeply, with a curve to <i>l.</i> to Ae Br. Care required, as the road and br. is obscured by a plantation on the <i>l.</i> Keep straight on after crossing the br.; undulating road to Parkgate and beyond, with gradual rise to Shawfoot, where the ascent is steeper for a short distance. Pass Courance P.O., and slight fall to a br. beyond, after which road again rises. Short steepish descent to br. over the Mollin Burn, thence undulating towards St. Ann's Br., ending in a descent to that point. Very good road on the whole; surface a little rough about St. Ann's Br. |
| 8½ | Amisfield .....         | 1½             |        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

Undulating ascent for 3 m., passing Noblehouse, then level, passing the rly. and Whim, with undulating descent towards Leadburn Inn, where Route 118 is joined on <i>r.</i> keep to <i>l.</i> at fork, with inn on <i>r.</i> ( <i>l.</i> to Howgate etc.). Very good surface.                                                                                                                                     |
|                         | ↑                       |                         |        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 13                      | Leadburn Inn .....      | 6¾                      | 60     | Road dips beyond the inn, and is then undulating with downward tendency on the whole, through open moorland. Descent to the Black Burn then almost level through wooded land to the summit of the long winding hill downward towards Penicuik. This hill should be ridden carefully, especially near the foot, where the North Esk is crossed. Short ascent into the town; turn to <i>r.</i> in the square, passing a stone fountain; then bear to <i>l.</i> , passing the Royal Hotel on <i>r.</i> Street narrow here, careful riding necessary. Excellent surface from Leadburn. |

| 5<br>4½<br>4                    | Straiton.....<br>Burdiehouse.....<br>Kaims ..... | 1½<br>½<br>½                     | 68            | house), and between these two roads another branches off to <i>L.</i> at the fork roads, leading to Route 39; keep to <i>r.</i> (These three branch roads are included under Route 160.) At next fork keep to <i>L.</i> ( <i>r.</i> to Loanhead); descent towards Clippens shale works, where a single line of rly. crosses on the road level. Fairly level into Straiton. Good surface on the whole.                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 3½                              | Liberton .....                                   | ¾                                |               | From this village there is a long, easy descent to Burdiehouse, followed by a stiffish rise to Kaims cross-roads, which pass straight over ( <i>r.</i> , to Route 159; <i>L.</i> , to Route 39); road gradually descending. At fork keep to <i>r.</i> ; easy riding to the cross-road at Liberton. A short distance beyond this the winding descent known as Liberton Hill commences, and it should be ridden down with caution, keeping well to <i>L.</i> , to avoid the stone paving to the <i>r.</i> of the road. At the foot of the hill keep to <i>r.</i> at fork. Fairly level to Newington Sta., before which the tram-lines and stone setts are met with. Ascend through Newington, and follow tram-lines along Clerk St., Nicolson St., and down over the S. and N. Brs. to General Post Office at E. end of Princes St. Good surface from Straiton; stone setts lumpy. |

**DUMFRIES TO EDINBURGH.** *Reverse.*—From General Post Office proceed up North Br. following the double line of tramway straight out by Nicolson St., Clerk St., and Newington. Keep straight on at Mayfield Toll, and to *r.* at fork just beyond. At fork at Nether Liberton keep again to *r.* and ascend Liberton Hill. At fork at Straiton bear to *r.*, and at fork roads before Loganlee bear again to *r.* At Shottstown keep to *L.* into Penicuik, and in that town bear to *r.* on entering the Sq., which leave to *L.*, descending to the br. At fork on summit of the long ascent keep to *L.* and bear to *r.* at Leadburn Inn. Keep to *r.* at Romano Br., where roads fork, and again to *r.* after Blyth Br. Pass over the cross-roads at Harestanes, and keep to *L.* at next fork, thence straight on into Broughton. Unmistakable by Crook Inn over the Summit into Moffat. Bear to *r.* leaving High St., and cross R. Annan; bear to *L.* at Beattock (old) Hotel and turn sharp *r.* under rly. beyond the village, then bear to *L.* immediately. Keep to *r.* at fork and keep again to *r.* at fork 2 m. beyond St. Ann's Br. Keep to *L.* after crossing Ae Br.; thence unmistakable to near Dumfries, where cross rly. and bear to *L.*, having R. Nith on *r.* Enter the town by Academy St. and Church Crescent, bearing to *L.* at Burns's Monument into High St.

**EDITOR'S NOTE.**—Road to *L.* about 2½ m. out of Dumfries. This is the old road to Auldgirth Br., where it joins Route 20. It is hilly but has good surface on the whole. The places passed are—Carnshalloch, Kirkton, Duncow, and Dalswinton Loch and village. After crossing rly. there is a sharp descent to Auldgirth Br. Total distance, about 9 m.

# ROUTE 32. ABINGTON TO GLASGOW.

(Via Lanark and Hamilton.)

A very excellent road to Hamilton, then good, but rather rough in parts, towards Glasgow. Fine open moorland scenery by the Tinto Hills and picturesque surroundings in the Clyde Valley beyond Lanark.

| Miles from Glasgow. | Places on the Road.                       | Mileage.        |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| 42 $\frac{3}{4}$    | ABINGTON .....                            | ...             | ...              | Proceeding northwards up the village keep to <i>r.</i> ( <i>L.</i> , Route 1); gradual decline with <i>R.</i> Clyde on <i>r.</i> to fork, where keep <i>L.</i> ( <i>r.</i> , Route 35); fine stretch of almost level running to Robertson where the Robertson Burn is crossed; avoid road to <i>L.</i> when over. After a short stretch of level, a gradual rise and quicker fall towards the Garff Water where bear to <i>r.</i> ( <i>L.</i> to Wiston). Road ascends very gradually from the br. to a long open stretch of almost level road over the low moorland at the base of the Tinto Hills gradual rise to junction with Route 36 on <i>r.</i> near St. John's Kirk, from which point a long easy descent commences. Keep to <i>L.</i> at fork (to Thankerton Sta.). At the termination of the descent the road re-ascends for a short distance is undulating for a m., then re-descends toward the <i>R.</i> Clyde, bending round to <i>L.</i> toward Hyndford Bridge, which cross, to <i>r.</i> (straight on, before crossing the br., Route 51). Ascend from the br. Keep to <i>L.</i> at fork ( <i>r.</i> , to Route 81); undulating towards Lanark. Keep to <i>L.</i> at fork ( <i>r.</i> to rly. sta.) and descend carefully into the town to the Cross, where roads meet. Excellent surface from Abington; rather lumpy just before entering Lanark. |

| 3 $\frac{3}{4}$     | Join Route 1 .....            | 3 $\frac{1}{2}$ |                  | From Town Hall proceed straight forward, passing the N. B. Rly. br., keeping straight on at the cross-roads, and crossing the Caledonian Rly. just beyond; road ascending gradually. Slight descent to fork-roads, where keep to <i>r.</i> , ascending a short hill. The road again passes the N. B. Rly. and bends first to <i>r.</i> , then to <i>l.</i> , descending; beyond the br. over a small stream it rises for nearly $\frac{1}{2}$ a m. and becomes very undulating for over 2 m., descending a long slope towards Cambuslang, with a dip before entering the village. Good surface on the whole, but much cut up by heavy local traffic in parts.                                                                                                                                                                                   |

ABINGTON TO GLASGOW. *Reverse.*—From Royal Exchange proceed down Queen St., turn to *l.* into Argyle St., and proceed by Trongate to Glasgow Cross; here bear slightly to *l.*, ahead, going along London St., bear to *l.* with tramlines, then to *r.* along Great Hamilton St., and proceed by Canning St. to Bridgeton Cross. Here bear to *r.* for a few yds., then turn to *l.* into Dalmarnock Rd. Pass under a rly.

br. near Dalmarnock Rd. Sta., and cross R. Clyde a short distance further. At fork, bear to *L*. and cross over rly. about  $\frac{1}{2}$  m. beyond. Pass through Eastfield and Cambuslang beyond, which latter place keep well to *L*. Keep to *r*. at next two forks; road bends to *r*. then to *L*. near a rly. before Hamilton. Keep to *r*. at fork on entering the town where rly. is crossed over. Pass straight on over a cross-street near Town Hall, descending to R. Avon on leaving the town. At fork 2 m. further keep to *L*.; pass over cross-road near Garrion Br. Before Crossford bear to *r*. then *L*. R. Clyde running on *L*. Cross the river at Kirkfieldbank and ascend the very steep hill towards Lanark. At the Cross in that town keep to *r*.; cross R. Clyde at Hyndford Br. and turn sharp *L*., then bear round to *r*. Keep to *r*. at fork, then straight on to fork at St. John's Kirk, where bear *r*. Keep to *L*. and cross a br.  $3\frac{1}{2}$  m. further, and again to *L*. at Robertson.

## ROUTE 33. LANARK TO GLASGOW.

(Via Wishaw.)

This is not such a preferable route as 32 and can lay no claim to picturesqueness, passing, as it does, through the coal and iron district. It links together, however, several important towns.

| Miles from Glasgow. | Places on the Road.                | Mileage.        |                  | General description of the Road.                                                                                                                                                                                                                                                                                            |
|---------------------|------------------------------------|-----------------|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                     |                                    | Inter-mediate.  | Total.           |                                                                                                                                                                                                                                                                                                                             |
| 25 $\frac{3}{4}$    | LANARK .....<br>(Cross.)           | ...             | ...              | Proceed down through the town passing the Parish Ch., which stands in the centre of the road, and keep straight on ( <i>L</i> , Route 32). Descent to Cartland Br., beyond which road rises again and is fairly level to Braidwood Sta. and undulating towards Carluke with a fall and rise into the town. Capital surface. |
| 22 $\frac{3}{4}$    | Braidwood Station .....            | 3               |                  |                                                                                                                                                                                                                                                                                                                             |
| 20 $\frac{1}{4}$    | Carluke .....                      | 2 $\frac{1}{2}$ | 5 $\frac{1}{2}$  | Pass over the cross-roads in the town and bear to <i>L</i> . at fork ( <i>r</i> ., Route 34) and keep again to <i>L</i> . over $\frac{1}{2}$ m. out. Undulating road, with downward trend to Waterloo, where Route 79 is crossed, and quicker descent towards Wishaw. Surface rough in places with traffic.                 |
| 16 $\frac{1}{2}$    | Waterloo .....                     | 3 $\frac{3}{4}$ |                  |                                                                                                                                                                                                                                                                                                                             |
| 15 $\frac{1}{2}$    | Wishaw .....                       | 1               | 10 $\frac{1}{4}$ | Proceed straight through the town, descending, and turn <i>L</i> . before leaving, passing the rly., with rise and fall before Craigneuk and a series of undulations to Motherwell. Good surface on the whole, but much traffic-worn in parts.                                                                              |
| 11 $\frac{3}{4}$    | Motherwell ...                     | 3 $\frac{3}{4}$ | 14               | Cross Route 80; keep straight through town, passing rly. sta.; slight descent and short level with sharp fall to S. Calder Water. Ascent into Bellshill, passing rly. sta. On meeting Route 86 in the town turn sharp <i>L</i> . Surface still variable.                                                                    |
| 9 $\frac{3}{4}$     | Bellshill .....                    | 2               | 16               | Leaving the town, road descends a long easy gradient. Keep to <i>L</i> . at first fork and to <i>r</i> . about a m. further. Level to Broomhouse, and easy to Tollcross. Thence into Glasgow as on page 3.                                                                                                                  |
| 5 $\frac{3}{4}$     | Broomhouse .....                   | 4               |                  |                                                                                                                                                                                                                                                                                                                             |
| 3 $\frac{1}{2}$     | Tollcross .....                    | 2 $\frac{1}{4}$ |                  |                                                                                                                                                                                                                                                                                                                             |
|                     | Route 1.                           |                 |                  |                                                                                                                                                                                                                                                                                                                             |
|                     | GLASGOW .....<br>(Royal Exchange.) | 3 $\frac{1}{2}$ | 25 $\frac{3}{4}$ | (For alternative road into Glasgow see note below).                                                                                                                                                                                                                                                                         |

**LANARK TO GLASGOW (VIA WISHAW).** *Reverse.*—Reverse of Route 1 to second fork beyond Broomhouse where keep *l.* In Bellshill turn sharp *r.* at second road, passing rly. sta., and pass straight through Motherwell. Bear to *r.* at Craigneuk and to *r.* again on entering Wishaw; a short distance further keep straight on over cross-roads in the town, and at Waterloo. Beyond Waterloo cross-roads keep to *l.* and turn *r.* about a m. further. Keep to *r.* at fork in Carluke. Cross rly. at Braidwood Sta. and keep rly. on *l.* for a short distance. Cross Cartland Br. before Lanark.

**EDITOR'S NOTE.**—Alternative road into Glasgow. After passing under rly. at Mount Vernon Sta keep to *l.* over a fairly level road—which bends to *r.* at  $1\frac{1}{4}$  m.—entering Glasgow by London Rd and passing under rly. br. near Caledonian Rly. Goods Sta. (on *l.*). Route 32 (p. 41) joined at Bridgeton Cross. This alternative road avoids such busy centres as Tollcross and Parkhead.

## ROUTE 34. CARLISLE TO STIRLING.

A splendid road to Lanark—hard and smooth, with easy gradients, and a good, broad road with variable surface to beyond Newmains. Rough locally from thence to Stirling but affording very fair riding from Lanark.

| Miles from<br>Stirling. | Places on the<br>Road. | Mileage.                |                   | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

**CARLISLE TO STIRLING.** *Reverse.*—From King St. corner leave by Port St. and follow tramlines to St. Ninians, in which village keep to *r.* In Denny bear to *l.* and *r.* and keep straight on over cross-roads. At Longcroft fork-roads keep *l.* and again to *l.* up a very steep hill at Cumbernauld. Keep to *r.* at fork about 2 m. beyond Cumbernauld Sta., and to *l.* before Rawyards. Pass over cross-road at E. end of Airdrie and keep *l.* at Chapelhall. At Newhouse bear to *r.* and take first road on *l.*, with rly. line on *l.*, keeping well to *l.* (*r.* to Motherwell).  $2\frac{1}{2}$  m. further keep *r.* passing two rly. br's. before Newmains, in which town keep straight on and then to *l.* at fork, and pass over a cross-road before Carluke. Pass over cross-road in the town, going straight out. As in reverse of Route 33 to Lanark, of Route 32 to Abington, and of Route 1 to Carlisle.

**ROUTE 35. CARLISLE TO EDINBURGH.**

(Via Biggar.)

On the whole an excellent road with fine surface and easy gradients. In parts the surface is variable, but not to an unpleasant degree. Some riders prefer to come into Edinburgh from Nine Mile Burn by Route 39. That is a hillier road, but the scenery is very fine on Pentland side.

|          | CARLUKE .....                 | 2 1/2          | 17 1/2 |                                                                                                                                                                                                                                                                                                                                                                                                                          |

**BIGGAR TO CARLUKE. Reverse.**—From centre of town facing southwards follow road to L. at fork ahead, keeping well to L. out of the town. At 3 1/2 m. out keep again to L. and pass over cross-roads beyond. At branch roads beyond Mouse Water bear L. In Carnwath, near centre of village, turn sharp r. and bear round to L. in Liberton. At fork beyond Whitecastle keep r. and again r. about 2 m. further.

## ROUTE 39. BIGGAR TO EDINBURGH.

(Via the Hill Road.)

less hilly and more frequented road from Nine-Mile-Burn into Edinburgh is that described in Routes 35 and 31. The Hill Road detailed below is much the more picturesque and interesting of the two, and is shorter, while the surface is good throughout, except on the hills. For branch road to Loganlee, see note below.

|                         | (General Post Office.)  |                         |       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

**BIGGAR TO EDINBURGH (VIA THE HILL ROAD).** *Reverse.*—From General Post Office proceed along Princes St. and at Caledonian rly. sta. follow tram lines to *l.* up Lothian Rd. to Tollcross, where bear *r.* up to Bruntfield Pl. keeping well to *l.* and still following tram lines down to Morningside Road Sta. and beyond. At fork roads past the sta. keep well to *r.*, presently passing Braid Hills Hotel on *l.* At fork at Hillend keep to *r.*, thence an unmistakable road by Howgate and House of Muir to Nine Mile-Burn. Reverse of Route 35 to Biggar.

**EDITOR'S NOTE.**—Road to Loganlee. From Flotterstane Br. at foot of House of Muir hill, a narrow road leaves to *r.* leading up one of the romantic valleys of the Pentland Hills and passing along the shores of two fine lochs which are used as reservoirs for the city water supply. This road is a very fair one and quite enjoyable to ride over to its extremity at Loganlee—a charming little open dell at the foot of the surrounding hills. Distance, about 4 m. from Flotterstane Br. to Loganlee.

# ROUTE 40. STRANRAER TO AYR.

(Via Kirkoswald and Bridge of Doon.)

Splendid road to Maybole, then hilly and only fair surface into Ayr. The easier and better road from Maybole to Ayr is by Minishant (Routes 49 and 44), but it misses Burns' Cottage and Alloway Kirk.

| Miles from Ayr.  | Places on the Road.               | Mileage.        |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

**STRANRAER TO AYR (VIA KIRKOSWALD AND BRIDGE OF DOON).** *Reverse.*—From Town Hall proceed along High St. and keep straight on, avoiding a road leaving *r.* to race course but bearing to *r.* at fork, beyond. At Bridge of Doon keep to *r.* and to *L.* during ascent, and keep again to *L.* at fork 2 m. beyond Culroy. On entering Maybole turn *L.* and *r.* into High St., leaving by Whitehall St. and keeping to *r.* at fork. At 3 m. beyond Kirkoswald bear *L.* and cross Milton Burn. Cross rly. before Girvan and bear round to *r.* and *L.* into the town. At 1 m. beyond centre of the town turn sharp *r.* and by coast to Ballantrae. At fork at end of village bear *r.* and cross river, keeping to *L.* at next fork. Winding road to head of Glen App. Keep to *r.* at fork—dangerous descent, and to *L.* at fork 2 m. down the glen. Road bends *r.* and *L.* before Innermessan, in which place turn sharp *r.* Enter Stranraer by Shore Rd. and Charlotte St. to George St.

# ROUTE 41. NEWTON STEWART TO GIRVAN.

(Via Bargrennan.)

Good hill road, rising over open moorland and descending to the river valley at Barhill. Surface good, except for portions on the moorland, which are loose. See also Route 42.

NEWTON STEWART TO GIRVAN (VIA BARGRENNAN). *Reverse*.—Proceed southwards straight out of the town. At Daljarrock fork before Pinwherry sta., keep *L.* and turn *r.* across the stream beyond the sta. Beyond Barhill bear sharp *L.* again crossing stream, and keep to *r.* about a m. further. At Bargrennan branch-roads bear *r.* crossing R. Cree; bear to *L.* at Challoch and avoid a road to *r.* beyond, having river on *L.* into Newton Stewart.

## ROUTE 42. NEWTON STEWART TO GIRVAN.

(Via "The Snap.")

Route 41 is easier between Challoch and Barhill, and the surface is better. Route 42 hardly ascends so high on the moors as 41, but rises and falls over several sharp, short hills; it is very bleak, but has a certain wild picturesqueness.

**NEWTON STEWART TO GIRVAN (VIA "THE SNAP").** *Reverse.*—Reverse of Route 41 to Barhill. Keep straight on up the valley having the stream on *L.*, and keep to *r.* where road forks. Pass between Lochs Maberry and Dornal and keep to *L.* on descent towards Challoch. Thence as reverse of Route 41 to Newton Stewart.

## ROUTE 43. GIRVAN TO AYR.

(Via the Coast.)

A hilly and picturesque road, but innocent of a single inn or hotel. The surface is of a soft and sandy nature in parts, but may be considered fair on the whole.

| 1½          | Branch-roads .....<br><br>[Dunmure 15½ m.] | 4½                      |        | After a m. road not so steep but ascending more gradually for 1½ m., beyond which it again rises rather steeply. At 11½ m., after leaving the woods sharp turn <i>L.</i> with descent to a small stream. Sharp rise and fall beyond, road curving towards shore again. A steep descent during this portion is dangerous and requires care. After 14½ m. a road to <i>L.</i> forms a loop by Dunmure village and castle ruins rejoining main road at 16 m. Sharp descent by Lagg and quick fall to R. Doon, turning <i>L.</i> Level into Ayr. To avoid the rough paving in Sandgate St. bear to <i>r.</i> near race course joining Route 40 a short distance beyond, and proceeding into High St. Fair surface; rough in parts and loose on the sharp hills in dry weather. |
| 5½          | Lagg .....                                 | 6                       |        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

**IRVAN TO AYR (VIA THE COAST).** *Reverse.*—From Town Hall bear to *r.* in High St. and keep straight on bearing to *r.* along race course road, having race course on *L.*, and turn *L.* on joining coast road. Turn *r.* on ascent from Doon Br. and keep *L.* a m. beyond Lagg (*r.*, to Dunvere), at 11½ m. out turn sharp *r.* through Culzean Woods and keep *r.* on descent towards Maidens, where bear *L.* along coast to Girvan.

## OUTE 44. NEWTON STEWART TO AYR.

(Via Straiton.)

An excellent road to Bargrennan and then a very rough road over the high open moorland and down to Tairlaw Br. Good to Straiton and excellent into Ayr. The old direct road between Rowantree and Maybole is now almost disused and is not fit for cycling.

|                    | (Town Hall.)           |                         |        |                                                                                                                                                                                                                              |

**CUMNOCK TO AYR. Reverse.**—Proceeding along High St. bear to L. towards rly. sta. and, passing rly., keep well to L. At Bellston keep to r. at both branch roads and straight on in Coylton. Keep to r. again 4 m. further and also to r. at fork to Ochiltree; thence straight on to Cumnock.

## ROUTE 51.

## AYR TO LANARK.

On the whole a good road with capital surface almost throughout. Hilly, however, in places and very undulating, especially before Sorn. Beautiful scenery in parts.

| Miles from<br>Lanark. | Places on the<br>Road. | Mileage.                |        | General description of the Road.                                                                                                                                                                                                                                                                                                                                                     |

|         |                       | Inter-mediate. | Total. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|         | Road junction .....   | 7½             |        | Limerhaugh Brae, to junction, on r., with Route 52 at Wellwood Toll, and still undulating into Muirkirk. Fair surface over the moor and improving towards Muirkirk.                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|         | Muirkirk .....        | 2              | 24½    | Keep well to r. in village (road to L., see note). Gradually ascending road for over 3 m. with gentle fall towards Douglas; rly. runs beside road a greater part of the way. Good surface.                                                                                                                                                                                                                                                                                                                                                                                                                     |
|         | Douglas .....         | 10             | 34½    | Pass straight through the village, road ascending, then falling towards Douglas Mill and junction with Route 1, along which Route proceed for over ¼ m. and keep to r. at fork. Ascent to plantation at Stonehill where avoid a road leading to L. towards Sandilands Sta., and keep straight on—an undulating road to Hyndford Br., where Route 32 is met. Turn sharp L. over the br. Ascending from the br. keep to L. at fork and undulating towards Lanark. Keep again to L. at next fork (r., to rly. sta.) and descend carefully into the town to the cross where roads meet. Good surface on the whole. |
|         | Douglas Mill .....    | 2½             |        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|         | Rigside .....         | 1½             |        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

|         | LANARK (Cross.) ..... | 2¾             | 46½    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

R TO LANARK. *Reverse.*—From the cross proceed straight up out of the town and when over Hyndford Br. turn sharp r. Beyond Douglas Mill keep to r. at fork and to r. again over the Glespin Burn beyond Douglas; winding road by the rly. to Muirkirk. At fork 2½ m. beyond keep to r. and again to r. at fork beyond Sorn, avoiding a road leading sharply to r., over the moors, just before this fork. Straight over cross-roads at Mauchline, and then keep r.; bear to L. at fork before Fulford, keep to r. about 3 m. further, then unmistakable to Ayr.

EDITOR'S NOTE.—The road going northwards from Muirkirk for Strathaven is fair for a short distance out of Muirkirk, bad over the watershed, and again fairly good riding down towards Strathaven. This road is the only direct communication between the two places.

## ROUTE 52. CUMNOCK TO MUIRKIRK.

Direct link between Routes 50 and 51 from Cumnock. A very undulating road, with at least two sharp hills, but possessing very fair surface.

| Muirkirk. | Places on the Road.   | Mileage.       |        | General description of the Road.                                                                                                              |

|                             | MUIRKIRK .....             | 2                     | 10            |                                                                                                                                                                                                                                                                                                                                                                                                                            |

**CUMNOCK TO MUIRKIRK.** *Reverse.*—Going S. W., having river on *L.*, at fork 2 m. out keep *L.*; thence unmistakable to Cumnock.

**ROUTE 53.****MAUCHLINE TO AYR.**

(Via Tarbolton.)

The direct road is, of course, by Route 51, the route detailed below being given purely on account of its access to Tarbolton—a village made famous by Burns.

| <i>Miles from Ayr.</i> | <i>Places on the Road.</i> | <i>Mileage.</i>       |                  | <i>General description of the Road.</i>                                                                                                                                                                                                                                    |
|------------------------|----------------------------|-----------------------|------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                        |                            | <i>Inter-mediate.</i> | <i>Total.</i>    |                                                                                                                                                                                                                                                                            |
| 12 $\frac{1}{2}$       | MAUCHLINE .....            | ...                   | ...              | Leave Mauchline northwards as in Route 20 stiffish ascent; keep to <i>L.</i> at fork roads, pass over rly. tunnel, undulating, then sharp fall to cross-roads where keep straight on, and over Water of Fail, to Tarbolton. Fairly good surface from Mauchline fork-roads. |
|                        | ↓                          |                       |                  |                                                                                                                                                                                                                                                                            |
| 7 $\frac{1}{4}$        | Tarbolton .....            | 5                     | 5                | Keep straight on over cross-roads, village lying on <i>L.</i> , and join Route 54 1 $\frac{3}{4}$ m. further, proceeding by reverse of that Route into Ayr—an excellent road.                                                                                              |
| 5 $\frac{1}{2}$        | Road junction .....        | 1 $\frac{3}{4}$       |                  |                                                                                                                                                                                                                                                                            |
|                        | Ayr .....                  | 5 $\frac{1}{2}$       | 12 $\frac{1}{2}$ |                                                                                                                                                                                                                                                                            |
|                        | (Town Hall.)               |                       |                  |                                                                                                                                                                                                                                                                            |

**MAUCHLINE TO AYR (VIA TARBOLTON).** *Reverse.*—Route 54 for 5 $\frac{1}{2}$  m., where keep *r.* at fork. Over cross-roads at Tarbolton, and over rly. tunnel before meeting Route 20 N. Mauchline.

# ROUTE 54. AYR TO GALSTON.

hilly road, with good surface throughout. Forms a direct link from Ayr with Route 59, eastward, to Hamilton, etc.

| Miles from Galston. | Places on the Road.       | Mileage.        |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

AYR TO GALSTON. *Reverse.*—Turn sharp *l.*, southwards, at W. end of village and keep to *r.* at fork. Bear slightly to *r.* at five road-ends and again to *r.* near Fail Monastery. Keep to *l.* at fork on descent beyond and straight on towards Ayr.

# ROUTE 55. AYR TO GLASGOW.

very fine main road with excellent surface. The inclines are very well engineered and therefore easy to ride in either direction.

**AYR TO GLASGOW.** *Reverse.*—Reverse of Route 20 to Kilmarnock. Bear to *r.*, then unmistakably to Monkton, where bear to *L.* through village, but avoid branch-roads on *L.*; rly. on *r.* towards Ayr.

## ROUTE 56. AYR TO ARDROSSAN.

A splendid road, with excellent surface and no gradients worth speaking of. This is the most direct route, there being no road by the coast from Irvine.

| Miles from<br>Ardrossan. | Places on the<br>Road.         | Mileage.                |        | General description of the Road.                                                                                                                                                                                                                                            |
|--------------------------|--------------------------------|-------------------------|--------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

Straight and fairly level road to Kilwinning. Bear to <i>L.</i> in that town and cross R. Garnock. Excellent surface.                                                           |
| 5½                       | Kilwinning .....<br>(Cross.)   | 3                       | 14½    | Rly. sta. passed on <i>r.</i> ; bear <i>L.</i> ; practically level towards Stevenston with descent into the town.                                                                                                                                                           |
| 2¾                       | Stevenston ..... ↓             | 2¾                      |        | Keep straight on through the town ( <i>a</i> ) to Saltcoats—level—and bear round to <i>r.</i> in that town, passing harbour on <i>L.</i> and thence by the coast into Ardrossan, having rly. on <i>r.</i> Good surface; rough paving in the towns, especially in Saltcoats. |
| 1½                       | Saltcoats .....                | 1½                      |        |                                                                                                                                                                                                                                                                             |
|                          | ARDROSSAN .....                | 1½                      | 20     |                                                                                                                                                                                                                                                                             |

**AYR TO ARDROSSAN.** *Reverse.*—By coast, rly. on *L.*, to Saltcoats, in which bear round to *L.* and pass straight through Stevenston. To *r.* at rly. sta. before Kilwinning and keep again to *r.* after crossing R. Garnock. In Irvine turn sharp *r.*, crossing river beyond which turn sharp *L.* About a m. further keep to *r.* and pass over cross roads at Loans. Reverse of Route 55 from Monkton.

(*a*) To avoid the narrow street of Saltcoats and the bad paving in that town, the high road may be taken to Ardrossan. Turn to *r.* at cross-roads in Stevenston and at cross-roads near rly., 2 m. further, bear *L.* to Ardrossan, having North Bay on *r.* This is a hillier road, but the surface is good. Distance—2¾ m.

## ROUTE 57. KILMARNOCK TO TROON.

tortuous route, but with easy gradients and good surface on the whole. See note below, regarding the direct road after Dundonald.

| Troon.          | Places on the Road.        | Mileage.        |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|-----------------|----------------------------|-----------------|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                 |                            | Inter-mediate.  | Total.           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 0 $\frac{1}{2}$ | Kilmarnock ...<br>(Cross.) | ...             | ...              | Proceeding S. by King St., turn sharp <i>r.</i> into St. Marnock St., then <i>l.</i> into Dundonald Rd. and keep to <i>r.</i> at fork. Slight ascent over rly. br., and bear to <i>l.</i> beyond; fairly level to Gatehead. Good surface.                                                                                                                                                                                                                                                           |
| 3 $\frac{1}{4}$ | Gatehead .....             | 2 $\frac{3}{4}$ | 2 $\frac{3}{4}$  | Keep to <i>l.</i> over rly. level crossing and over R. Irvine, descent and ascent, and keep to <i>l.</i> at fork, 1 $\frac{1}{2}$ m. from Gatehead. On meeting road at right angles, at N. end of Dundonald, turn sharp <i>r.</i> (not entering the village) then take first road to <i>l.</i> , passing through wooded land to junction with Route 56, where turn sharp <i>l.</i> , following reverse of that route to Loans. Variable surface to junction with Route 56, then very good to Loans. |

|                 | TROON .....                | 1               | 10 $\frac{1}{2}$ |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

**KILMARNOCK TO TROON. Reverse.**—Leaving the town N.E. with a rly. line on *l.* road presently bears to *r.*, passing Troon Sta. At Loans turn sharp *l.* and turn to *r.* 1 $\frac{1}{4}$  m. further. On meeting a road at right angles turn *r.* towards Dundonald, but before entering that village turn to *l.* by a winding road to Gatehead, where bear *r.* and keep to *l.* towards Kilmarnock, entering the town by Dundonald Rd. and St. Marnock St. to King St.

**EDITOR'S NOTE.**—The direct road between Dundonald and Loans is not recommended. The gradients are severe and the surface rough. The easier road detailed above is only 1 $\frac{1}{2}$  m. longer.

## ROUTE 58. KILMARNOCK TO IRVINE.

direct connection between Kilmarnock and the coast road, Route 56. An undulating road with excellent surface.

Irvine having that river on <i>r.</i> towards Darvel; go on running to Newmilns, keeping to <i>r.</i> before the village. Stiff climb, beyond, to fork, where keep again to <i>r.</i> with undulating road to Darvel. Good surface.                                                                                                                                                                                                                            |
| 20 $\frac{1}{4}$            | Newmilns .....                   | 2 $\frac{1}{2}$       |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 18 $\frac{1}{2}$            | Darvel .....                     | 1 $\frac{3}{4}$       | 9 $\frac{1}{4}$  | Bear to <i>r.</i> , cross stream, and keep to <i>l.</i> beyond Priestland. Short rise and fall then level followed by a steady ascent to the open moorland quite rideable. From m.s.s. at county boundary road becomes undulating to fork where keep <i>l.</i> up a short ascent for about $\frac{1}{4}$ m., then easy running with decline to Caldermill, and undulating with gradual fall towards Strathaven, on entering which village keep to <i>l.</i> at fork. Variable surface over the moors; rough here and there but affording fairly good running on the whole. |

|                      | Hamilton.....<br>(Town Hall.) | 1              | 27 3/4 |                                                                                                                                                                                                                                                                                                                     |

**KILMARNOCK TO HAMILTON.** *Reverse.*—From Town Hall proceed southwards past Central Sta. (on *r.*) and ascending through Low Waters. Near Strathaven Sta. turn sharp *r.*, then bear *l.*, and turn again to *r.* in village passing straight on over cross-roads, and keeping to *r.* at fork. Turn *l.* before Galston and to *r.*, in the village, when over R. Irvine. At cross-roads in Hurlford turn sharp *r.*, following portion of Route 20 into Kilmarnock.

## ROUTE 60. KILMARNOCK TO GLASGOW.

(Via Barrhead.)

hilly between Kilmarnock and Lugton Sta., then very easy riding towards Glasgow. The surface varies, being generally lumpy and rough about Barrhead and Pollokshaws, but is good, as a whole, throughout. The finer road is through Fenwick (Route 20).

| Miles from Glasgow. | Places on the Road.         | Mileage.       |        | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

|                     | (Royal Exchange.)      |                |                 |                                                                                                                                                                                                                                                                                                                                                                                                                           |

**KILMARNOCK TO GLASGOW (VIA BARRHEAD).** *Reverse.*—Reverse of Route 20 to fork beyond Crossmyloof where keep *r.*, tramlines bending to *l.*, cross White Cart R. and turn to *r.* under rly. br. beyond. At  $1\frac{3}{4}$  m. further cross two streams, turn *l.*, and pass over cross-roads in Hurlet; pass rly., and turn *r.* on meeting a road at right angles bearing to *l.* near Barrhead Rly. Sta., and passing through the town keep to *r.* a fork, having rly. on *r.* At Lugton Sta. turn *l.* then *r.* and keep to *l.* in Dunlop and again to *l.* at fork, ahead, beyond. Turn to *r.* in Stewarton, bear to *l.* at fork and again to *l.* on leaving Kilmaurs. Bear to *l.* with rly. on *r.* at Kilmarnock and turn sharp *r.* under rly. br. into Portland St. and King St.

(a) A road also runs direct to Pollokshaws. Instead of turning *l.* towards Hurlet, keep straight on over a br., then bear *l.* and keep *r.* a short distance further. On meeting Route 75 turn *r.*, cross stream, and then turn *l.*, passing rly., rejoining the main road at rly. br. at Pollokshaws. Fair surface.

## ROUTE 61. KILMARNOCK TO BEITH.

Inclined to be hilly after Dunlop, but the surface is good. There is a direct link with Route 2 between Stewarton and Fenwick; see note below.

| Miles from Beith. | Places on the Road. | Mileage.       |        | General description of the Road. |

|               | (Main Street.)             |                       |               |                                                                                                                                                                                                                                          |

**KILMARNOCK TO BEITH. Reverse.**—Going southwards along Main St. turn *r.* passing ch. on *r.* into Old Cross, bear round to *L.* and take first road on *L.* having rly. on *r.* out of Beith. Road winds into Dunlop; turn sharp *r.* near rly. sta. on Route 60, thence into Kilmarnock as in reverse of that route.

**EDITOR'S NOTE.**—In going from Beith to Fenwick, proceed as in reverse of Routes 61 and 60 to Stewarton. Pass straight over the cross-roads in the village and keep to *L.* at fork after crossing the Annick Water. Steep ascent at first, then undulating to Fenwick; good surface.

**ROUTE 62. IRVINE TO GLASGOW.**

An exceedingly well-graded road with good surface, as a whole, throughout.

**IRVINE TO GLASGOW. Reverse.**—Reverse of Route 60 to Lugton Sta. where turn sharp *r.*, crossing br. Unmistakable thence to Irvine.

**EDITOR'S NOTE.**—Keeping to *r.* at fork 2 m. from Irvine a hilly, winding road joins Route 60 S. of Dunlop. It thus forms an Alternative Route to Glasgow, the rider following Route 60 beyond Dunlop. It is not so well-graded a road as that by Burnhouse detailed above; the surface, however, is very fair on the whole.

## ROUTE 63. BEITH TO WEST KILBRIDE.

Good running towards Dalry, but somewhat hilly before West Kilbride. A longer, but easier, road is that by Route 67 to Kilwinning, 56 towards Ardrossan, and reverse of 71 to W. Kilbride.

| 3½                        | Munnock Toll .....            | 3                       |        |  | Munnock Toll and a stiff climb towards the farm; then undulating for a m. with long descent rather steep in parts, towards West Kilbride. Turn sharp <i>l.</i> , after passing rly., to the village. Surface good on the whole, but variable in the glen beyond Munnock. |
|                           | WEST KILBRIDE .....           | 3½                      | 11½    |  |                                                                                                                                                                                                                                                                          |

**BEITH TO WEST KILBRIDE. Reverse.**—Going due N. out of the village, at over ¼ m. out turn sharp *r.* passing rly.; turn to *l.* into Main St. in Dalry then to *r.*, passing ch. on *r.*, and leave by New St. Keep to *r.* where roads fork at Southfield, and enter Beith, passing rly. sta. on *r.*, to Main St.

## ROUTE 64. BEITH TO LARGS.

The direct road between the two towns, going over the hill shoulder beyond Kilbirnie and falling steeply to the coast. The surface is variable, but affords fair running as a whole.

| Miles from<br>Largs. | Places on the<br>Road.        | Mileage.                |        |  | General description of the Road.                                                                                                                                                                                                                                                                                                             |

| 5 $\frac{3}{4}$ | Howrat Toll .....<br>(Fork-roads.) | 2 $\frac{1}{2}$ |                  | which bends to L. ; then take first street (School Wynd) on L., with stiffish ascent out of the town. The hill becomes easier towards Howrat Toll, beyond which the road descends gradually for about $\frac{1}{2}$ m., is level by the Paisley Waterworks, then undulating. The upward tendency is resumed and the surface becomes rather poorer, and there are one or two sharp descents. The long down-gradient towards Largs begins with good running for about a m., but the descent gradually quickens, through a series of whinstone cuttings, known as the "new cuts," and is dangerously steep shortly after leaving the C.T.C. danger-board and for $\frac{1}{2}$ m. further, until Route 71 is reached at Haillie Brae, where the sharp turn to r. towards Largs should be taken very carefully if the hill is ridden down at all. Bear to L. on entering Largs to the pier on sea-front. Poor surface in parts over the hill, but affording fair riding as a whole ; very good road just before Largs. |

BEITH TO LARGS. *Reverse.*—Having pier on r. bear to L., passing rly. sta. on r., and turn r. crossing a small stream. At  $\frac{3}{4}$  m. out turn sharp L. ascending the steep hill—unrideable. At Howrat Toll keep to L. At foot of School Wynd in Kilbirnie bear to r. along Bridge St. and Main St., road bearing to L. over  $\frac{1}{2}$  m. out, and passing rly. ; thence unmistakable to Beith.

## OUTE 65. BARRHEAD TO PAISLEY.

The road given below is the most convenient one between the two towns with regard to cyclists. There are various other local roads.

| Paisley. | Places on the Road. | Mileage.       |        | General description of the Road.                                                                                                                                                                                                                                                                                                          |
|----------|---------------------|----------------|--------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|          |                     | Inter-mediate. | Total. |                                                                                                                                                                                                                                                                                                                                           |
|          | BARRHEAD .....      | ...            | ...    | Pass along Main St., surface lumpy, and at end keep to r. ; descent to rly. sta., after which road opens out and is good. At d.p. keep to L. (r. to Hurlet, etc.) with a gradual rise for about 100 yds. and avoid a narrow road to r. Gradual descent into Paisley passing distillery on L. ; keep to r., cross br. over R. Cart passing |

Route 65. **BARRHEAD TO PAISLEY**—*continued.*

**ISLEY TO BEITH.** *Reverse.*—Leave by Wilson St., and keep to *l.* where roads branch at end of town. Straight on to Howood where keep *l.* at fork just beyond village, and to *r.* at fork on entering Thorn. Where streets bifurcate in Paisley bear to *l.* by Broomlands St. and to *r.* by Wellmeadow St. into High St.

## ROUTE 67. PAISLEY TO ARDROSSAN.

(Via Kilbirnie.)

Good surface throughout, except on outskirts of Paisley. A very undulating road to Dalry, and with easy grades from thence to Ardrossan. An alternative route will be found by following Route 66 to Beith, and Route 63 to Dalry, rejoining Route 67 there.

**ISLEY TO ARDROSSAN (VIA KILBIRNIE).** *Reverse.*—Reverse of Route 56 to Kilwinning, in which town take road to *r.*, northwards, beyond rly. sta. Pass rly. and bear *r.* having river and rly. on *r.* towards Dalry. Enter by Vennel St. and Main St. and bear *l.* into North St. At Burnside keep to *r.* and turn *l.* on meeting Route 64 before Kilbirnie. In Main St., near Knox Institute, turn to *r.*, passing rly. sta. on *r.* Road bends to *r.* near Lochwinnoch and joins Route 66 beyond sta. Reverse of Route 66 to Paisley.

# ROUTE 68. PAISLEY TO GREENOCK.

(Via Langbank.)

A very easy road with good surface to Port Glasgow but much spoiled by constant heavy traffic into Greenock. See also Route 71.

| Miles from Greenock. | Places on the Road.                 | Mileage.       |        | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| 10¼                  | Bishopton .....<br>(Hall.)          | 2¼             | 6¼     | Slightly ascending road for a m., then falling gradually to river bank at West Ferry; level through Langbank towards Port Glasgow. Good surface.                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 2¼                   | Port Glasgow .....<br>(Town Hall.)  | 7½             | 13¾    | In the town bear to <i>L.</i> going between rly. and the shore towards Greenock; tramlines. Enter Greenock by E. Hamilton St. and High St. (Cartsdyke), passing over rly. lines on road level near Victoria Harbour, then bearing to <i>L.</i> into Cathcart St. ( <i>r.</i> to Custom House Steamboat Quay; <i>L.</i> to Caledonian Rly. Sta.) and Cathcart Sq. Bad surface from Port Glasgow; rough narrow streets in Greenock.                                                                                                                                                                               |
|                      | Greenock.....<br>(Cathcart Square.) | 2¾             | 16½    | To reach Prince's Pier (for Clyde steamers) proceed along Hamilton St. and W. Blackhall St., towards end of which bear <i>L.</i> by Grey Pl. and Brougham St., turning to <i>r.</i> , near rly., to rly. sta. and pier. For Gourrock, see Route 71.                                                                                                                                                                                                                                                                                                                                                             |

**PAISLEY TO GREENOCK (VIA LANGBANK).** *Reverse.*—From Cathcart Sq. proceed by Cathcart St., Rue End St., High St., E. Hamilton St., and Port Glasgow Rd. to Port Glasgow, where, near harbour, bear to *r.*, road going on inland side of rly. Pass straight through village of Bishopton, and at "Red Smithy" cross-roads, 3 m. further, turn sharp *r.* to Paisley.

# ROUTE 69. PAISLEY TO GREENOCK.

(Via Bridge-of-Weir.)

Gradually ascending from Johnstone with sharp fall towards Port Glasgow; surface fair throughout when clear of the towns and larger villages. Route 68 is much easier.

| Greenock. | Places on the Road.                 | Mileage.       |        | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                               |

| 5         | Elderslie .....                     | 2½             | 2½     | Keep straight through village, slightly downhill, with ascent towards Thorn. At fork turn <i>r.</i> towards rly. sta. then down a narrow steep hill, with poor surface as a rule, towards Johnstone.                                                                                                                                                                                                           |
| 4         | Johnstone .....                     | 1              | 3½     | Pass straight through the town, surface bad, going down short hill beyond, then level. At cross-roads turn to <i>L.</i> (straight on, see note below), road ascending for a m., and near the top at fork keep to <i>r.</i> ( <i>L.</i> to Kilbarchar, ¾ m., steep ascent). The road undulates towards Bridge-of-Weir, and lying under trees is very soft after rain; fair surface on the whole from Johnstone. |
|           | [Kilbarchar 2½ m.]                  |                |        |                                                                                                                                                                                                                                                                                                                                                                                                                |
| 0½        | Bridge-of-Weir .....                | 3½             | 7      | Going straight through village, avoiding a road on <i>L.</i> beyond rly. sta. and one on <i>r.</i> a short distance further, the surface improves, and being for the most part on rocky ground is little affected by rain. Fairly level at first, then easy ascending gradient, rly. running on <i>L.</i> Stiffish climb before Kilmalcolm with sharp declivity through the village. Fair surface.             |
| 7         | Kilmalcolm .....                    | 3½             | 10½    | Bear <i>L.</i> in the village; ascending road for 1½ m., turning to <i>r.</i> at a m. out. Undulating descent for a m., turn <i>r.</i> , with very dangerous slope down towards the coast road; bear <i>L.</i> to Port Glasgow. Fair surface; loose on the hills.                                                                                                                                              |
|           | ✿<br>↓                              |                |        |                                                                                                                                                                                                                                                                                                                                                                                                                |

**PAISLEY TO GREENOCK (VIA BRIDGE OF WEIR).** *Reverse.*—Reverse of Route 68 to Port Glasgow. After passing rly. keep up to *r.* and about a m. beyond turn again to *r.* up a steep hill, and, a short distance further, sharp *L.* Keep to *L.* at fork on leaving Kilmalcolm, having rly. on *r.* Pass straight through Bridge-of-Weir, having rly. sta. on *r.* when leaving, and at fork roads, 2¾ m. further, turn sharp *r.*, bearing to *L.* over br. into Johnstone. Pass through town ascending to rly. sta. and bear to *L.*, joining Route 66 at Thorn. Reverse of that Route into Paisley.

**EDITOR'S NOTE.**—Keeping straight on at cross-roads ¾ m. beyond Johnstone, the coast road is joined at Langbank instead of at Port Glasgow. Pass Houston (Crosslee) rly. sta. and keep to *L.* a short way beyond. Level for about 100 yds., then long fall with sharp rise of about 150 yds. The descent towards the br. over Locher Water should be taken carefully; R. Gryfe crossed beyond. Undulating through Crosslee village to Houston. At R.C. ch. (on *L.*) Route 73 is crossed. Keep straight on; stiffish hill after Houston, then a good up-and-down road ending in a long descent followed by a stretch of level, then ascending for a short way with a subsequent downhill run towards the Clyde; fine view, ahead, across the river. Join Route 68 in Langbank. Paisley to Langbank, 8½ m. Fair surface.

## ROUTE 70. GLASGOW TO PAISLEY.

The direct main road; rough for cycling. The miles on these roads S. and S.W. of Glasgow are generally reckoned from Glasgow Br., not from Royal Exchange as in this book.

| Miles from Paisley. | Places on the Road.                | Mileage.        |                 | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

|                     | Paisley .....<br>(Cross.)          | 3 $\frac{1}{2}$ | 7 $\frac{1}{4}$ |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

**GLASGOW TO PAISLEY.** *Reverse.*—Leave Paisley by Smithhills St. and Gauze St. to Glasgow Rd. Keep straight ahead and enter Glasgow by Paisley Rd. and follow tram lines. After passing under rly. at Bridge St. Sta. turn sharp *l.*, cross Glasgow Br., turn to *r.* in Argyle St., and then to *l.* up Queen St. to Royal Exchange.

## ROUTE 71. GLASGOW TO ARDROSSAN.

(Via The Coast.)

Few roads in Scotland boast of such long fine stretches of level running as this route by the coast, and the scenery is very varied, especially beyond Gourock. Capital surface except near Greenock. The m.s. are reckoned by the direct road by Ravensraig from Greenock southwards.

| Miles from Ardrossan. | Places on the Road.                | Mileage.        |                 | General description of the Road                                                                                                                                                                                                                                                                                                                                                                                          |
|-----------------------|------------------------------------|-----------------|-----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                       |                                    | Inter-mediate.  | Total.          |                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 52                    | GLASGOW .....<br>(Royal Exchange.) |                 |                 | From Royal Exchange go down Queen St. to Argyle St., where turn <i>r.</i> then to <i>l.</i> , with tramlines into Jamaica St. and over Glasgow Br. Having Bridge St. Sta. (on <i>r.</i> ) turn sharp to <i>r.</i> under the sta., about midway, into King St. and go straight on. Where tramlines branch keep to <i>r.</i> into Rutland Pl., following the lines as they wind round the docks towards Govan by Govan Rd. |
| 49 $\frac{1}{4}$      | Govan .....<br>(Railway Station.)  | 2 $\frac{3}{4}$ | 2 $\frac{3}{4}$ |                                                                                                                                                                                                                                                                                                                                                                                                                          |
|                       |                                    |                 |                 | Passing the sta. on <i>l.</i> , still follow tramlines, past Elder Park (on <i>l.</i> ) and over a fairly level road towards Renfrew, entering by High St., narrow and badly paved, to Cross. Rough surface.                                                                                                                                                                                                             |

|                                  | ARDROSSAN .....                | 4½                               | 52            |                                                                                                                                                           |

**GLASGOW TO ARDROSSAN (VIA THE COAST).** *Reverse.*—Having North Bay on *l.* proceed to cross-roads where turn *l.* At about 3 m. out avoid a road to *r.* leading to West Kilbride. After crossing the stream beyond Largs keep to *l.*, thence following the coast line to Wemyss Bay. Rly. on *r.* towards Inverkip; ¾ m. beyond the village turn sharp *l.*, regaining the coast. Bear round to *r.* in Gourrock, passing rly. sta. on *l.*, and continue by Gourrock Rd., turning to *l.* and crossing rly.; keep to *l.* at fork and enter Greenock by Low Gourrock Rd. and Brougham St. Continue by W. Blackhall St. and Hamilton St. to Cathcart Sq. Reverse of Route 68 to cross-roads at "Red Smithy." Here keep straight on, then bear to *r.*, crossing two bridges and rly. into Renfrew. Turn *l.*, pass Town Hall on *l.* and leave by High St. Follow tram lines from Govan into Glasgow; then keep *l.* by Maxwellton Pl. to King St., and turn sharp *l.* after passing under Bridge St. Sta. Cross Glasgow Br., turn *r.* into Argyle St., and *l.* into Queen St. to Royal Exchange.

**EDITOR'S NOTE.**—There is an alternative route from Greenock to Inverkip some 3 m. shorter than that detailed above. Leaving Cathcart Sq. proceed by Hamilton St. and part of W. Blackhall St. turn to *l.* up Argyle St. to George Sq., and go by Nelson St., at end of which cemetery gates are passed on *r.*, and Inverkip Rd. is entered. Steady rise, with fairly steep climb before top of Smithston Hill, having rly. on *l.* Decline, with short steepish descent about half way, towards Ravenscraig Rly. Sta. Level for about 1¼ m. with short decline and steady rise beyond, passing d.p. on *l.* at old road to Inverkip. A fairly steep fall, with sharp turn *l.* not far from top, to junction on *r.* with the coast road from Gourrock. Good surface.

**ROUTE 72. RENFREW TO PAISLEY.**

The direct main road; well graded; good surface clear of the towns.

| <i>Miles from<br/>Paisley.</i> | <i>Places on the<br/>Road.</i> | <i>Mileage.</i>                  |               | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                                                                               |

Level on entering village to junction, at right-angles, with Route 69.                                                                                                                      |
|                     | (R.C. Church.)              |                       |                |                                                                                                                                                                                                                                                               |
|                     | <b>BRIDGE-OF-WEIR</b> ..... | $1\frac{1}{2}$        | $8\frac{1}{4}$ |                                                                                                                                                                                                                                                               |

**RENFREW TO BRIDGE-OF-WEIR.** *Reverse.*—Proceed E. from the village, keep straight on through Houston to road junction about  $\frac{3}{4}$  m. beyond Houston Sta., turn *L.*, and at “Red Smithy” cross-roads turn *r.*, then as reverse of Route 71 to Renfrew.

## ROUTE 74. GOVAN TO BARRHEAD.

very tortuous “local” road but one avoiding the traffic-worn roads as much as possible; very fair surface. If wishing to reach Charing Cross or W. end of Glasgow, riders coming up by Route 60 and other roads from the south are advised to follow the reverse of this Route (74) to Govan and to go thence via the ferry, etc., as described in the note below.

| 3 $\frac{1}{4}$      | Crookston Station . . . . | 1               | 3               | at $\frac{3}{4}$ m. from last turn go round to <i>L.</i> at cottage crossing rly. at Crookston sta.                                                                                                                                                                                                                                                        |
| 2                    | Join Route 60 . . . . .   | 1 $\frac{1}{4}$ |                 | Slight rise, with fall to <i>R.</i> Cart ; road bends to <i>r.</i> passing ruins of Crookston Castle on <i>L.</i> and grounds of Hawkhead on <i>r.</i> Almost straight and level for a m., with good surface, to junction with Route 60, where turn <i>r.</i> , reaching Hurlet $\frac{1}{2}$ m. further.                                                  |
| 1 $\frac{1}{2}$      | Hurlet . . . . .          | $\frac{1}{2}$   | 4 $\frac{3}{4}$ | Pass over cross-road (d.p.) (Route 75), at $\frac{1}{2}$ m. beyond pass below rly. on a slight descent, and on meeting a road at right angles turn to <i>r.</i> entering Barrhead passing rly. sta. ; or, turn to <i>L.</i> , cross the Levern Water, and in about 50 yds. turn due <i>r.</i> into Barrhead. Variable surface, but very fair on the whole. |
|                      | BARRHEAD . . . . .        | 1 $\frac{1}{2}$ | 6 $\frac{1}{4}$ |                                                                                                                                                                                                                                                                                                                                                            |

**GOVAN TO BARRHEAD. Reverse.**—Leaving at N.E. end of Barrhead, turn sharp *L.*, and in about 50 yds. cross Levern Water and turn to *r.* Keep straight on over cross-road at Hurlet and at  $\frac{1}{2}$  m. beyond turn sharp *L.* Cross river and rly. and join main Glasgow—Paisley Road. Turn to *r.*, and in  $\frac{3}{4}$  m. sharp *L.* ; cross rly. and about 1 m. further bear *r.* at d.p. Pass Govan public park on *L.* and bear to *L.* by Langland Rd. into Govan. Near end of Harmony Row bear *r.* into Morrison St. to the Cross. (*a*).

(*a*) To reach W. end of Glasgow and Charing Cross from Govan, pass over tram-lines at Govan Cross and turn due *L.* to the ferry, which cross (constant communication), and, when over, go eastward along wharf for a short way and turn due *L.* following road for about  $\frac{3}{4}$  m. to Overnewton Cross (re church on *L.*), cross tramlines, going *E.*, and at second street on *L.* turn *L.* following tramlines round to *r.* to Charing Cross. Or, from Overnewton Cross, to avoid tramlines all the way to Charing Cross, going *E.* as above, along Dumbarton Rd., take third turn on *L.* (Gray St.) and go along its full length, having park on *L.* ; turn *r.* and go straight along the Terraces to Charing Cross. Very fine macadam in some of these terraces near the west-end park.

## ROUTE 75. STRATHAVEN TO PAISLEY.

A very undulating road to Thornliebank, but mostly with downhill tendency after Chapelton ; fair good surface to E. Kilbride, and after that greatly improving till approaching Paisley.

|          | (Cross.)                                                      |                 |        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

**STRATHAVEN TO PAISLEY. Reverse.**—From Cross proceed southwards by Causewayside St., and where streets cross turn *l.* along Orchard St., and passing river on *l.*, keep to *r.* at fork a m. out, and at fork a m. further still bear *l.*, then straight on. At  $\frac{3}{4}$  m. beyond Nitshill avoid a road to *l.* (leading to Pollokshaws), and a m. further turn sharp *l.*, cross br., and turn sharp *r.* Keep straight on over cross-roads and bear to *l.* at fork before Busby. Pass through village and under rly.; join Route 77 before E. Kilbride, and turn sharp *r.* passing through that village. Unmistakable to Strathaven.

Pronounced Straven.

## ROUTE 76. EAGLESHAM TO GLASGOW.

A good road, practically downhill all the way; surface spoiled by heavy traffic near Glasgow, and stone setts rough in the city.

| Miles from Glasgow. | Places on the Road. | Mileage.        |                 | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

**EAGLESHAM TO GLASGOW Reverse.**—At foot of Queen St. turn *L.* into Argyle St. and follow tramlines round to *r.* down Stockwell St. and over Victoria Br.; follow the Cathcart Rd. southwards and nearly  $\frac{1}{2}$  m. beyond Mount Florida bear *r.* under rly. br. by New Cathcart Rd. Keep to *r.* at fork beyond Clarkston, thence straight on to Eaglesham.

(*a*) Or, keep to *r.* at this fork, along Crown St. and over Albert Br. into the Saltmarket, and at Glasgow Cross bear *L.* along Trongate and Argyle St., and to *r.* up Queen St. to Royal Exchange.

## ROUTE 77. EAGLESHAM TO GLASGOW.

(Via East Kilbride.)

A hilly road, chiefly, however, downhill from beyond E. Kilbride. The surface is good to Rutherglen, when it is apt to be traffic-worn into Glasgow. Route 76 is the shorter and the better road.

| Miles from Glasgow. | Places on the Road.    | Mileage.       |        | General description of the Road.                                                              |

|----------------------------|---------------------------------------|-----------------------|---------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                            |                                       | <i>Inter-mediate.</i> | <i>Total.</i> |                                                                                                                                                                                 |
|                            |                                       |                       |               | ascends towards Hairmyres, is undulating, with downward tendency towards the junction with Route 75 on <i>L.</i> , and again rises towards E. Kilbride. Good surface.           |
| 8½                         | East Kilbride .....                   | 4½                    | 4½            | Keep straight on, passing the village on <i>r.</i> , and having rly. also on <i>r.</i> ; at branch roads keep to <i>L.</i> ( <i>r.</i> , Route 78) with ascent towards Nerston. |
| 6¾                         | Nerston .....                         | 1¾                    |               | A m. beyond, the long hill down towards Rutherglen commences—a steepish decline 2½ m. long. Good surface on the whole.                                                          |
| 3                          | Rutherglen .....<br>(Railway Bridge.) | 3¾                    | 9¾            | Pass straight on through the E. portion of the town, crossing rly. just beyond, descending to junction, on <i>r.</i> , with Route 32.                                           |
| 2½                         | Dalmarnock Bridge .....               | ½                     |               | Route 32 to Royal Exchange.                                                                                                                                                     |
|                            | <b>GLASGOW</b> .....                  | 2½                    | 12¾           |                                                                                                                                                                                 |
|                            | (Royal Exchange.)                     |                       |               |                                                                                                                                                                                 |

**EAGLESHAM TO GLASGOW.** *Reverse.*—Reverse of Route 32 to Dalmarnock Br. at fork, beyond which keep to *r.* crossing rly. and passing through E. end of Rutherglen. A m. further keep to *L.*, and 2 m. beyond that to *r.* Pass E. Kilbride on *L.*; keep to *L.* at fork, and straight on to Eaglesham.

**EDITOR'S NOTE.**—A road connects Eaglesham south-westward with Route 20, joining that route some 3 m. N. of Fenwick. The climb out of Eaglesham is very stiff for nearly 2 m., and there are two further stiff rises before the actual summit is gained. It is then practically all downhill to Fenwick. The road is a poor one from Eaglesham to junction with Route 20.

**ROUTE 78. HAMILTON TO EAST KILBRIDE.**

The direct road; uphill most of the way, but the hills are comparatively easy, and the surface good throughout.

| <i>Miles from E. Kilbride.</i> | <i>Places on the Road.</i>     | <i>Mileage.</i>       |               | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                             |

**HAMILTON TO AIRDRIE** *Reverse.*—Proceed due eastwards for  $\frac{3}{4}$  m. along the Edinburgh Rd., and at cross-roads turn sharp *r.* ; then as in reverse of Route 34 to beyond Newmains, where at fork keep to *r.* (see p. 44). Beyond Newarthill keep to *L.*, then straight on through Motherwell to Hamilton, entering the latter town having park of Hamilton Palace on *r.*, to Cross.

## ROUTE 81. CARNWATH TO LANARK.

Forms, with Route 82, a connection between Lanark and Edinburgh, though the better road in every way is Route 83. Undulating road with a fairly good surface.

| Miles from<br>Lanark. | Places on the<br>Road.                 | Mileage.                |                 | General description of the Road.                                                                                                                                                                                                                  |

Keep straight through this village also, avoiding road to <i>r.</i> on leaving ; gradually ascending road for fully 2 m., crossing rly. and |

## Route 81.

**CARNWATH TO LANARK**—*continued.*

| <i>Miles from Lanark.</i> | <i>Places on the Road.</i>                                                        | <i>Mileage.</i>       |                 | <i>General description of the Road.</i>                                                                 |
|---------------------------|-----------------------------------------------------------------------------------|-----------------------|-----------------|---------------------------------------------------------------------------------------------------------|
|                           |                                                                                   | <i>Inter-mediate.</i> | <i>Total.</i>   |                                                                                                         |
|                           |  |                       |                 |                                                                                                         |
|                           | <b>LANARK</b> .....<br>(Cross.)                                                   | 2 $\frac{3}{4}$       | 6 $\frac{3}{4}$ | descending into Lanark. Care necessary in riding into the town to the Cross. Good surface on the whole. |

**CARNWATH TO LANARK.** *Reverse.*—Going up Lanark High St., bear to *l.* (*r.* to rly. sta.) and keep to *r.* at fork a m. out. Road bends to *l.* through Carstairs then to *r.* and is easily followed to Carnwath.

**ROUTE 82. CARNWATH TO EDINBURGH.**

With Route 81, affords communication between Lanark and Edinburgh, but the better road is via Mid Calder, Route 83. This road detailed below, by Pentland-side to Edinburgh, is a very dreary one, hilly, and of an inferior surface in parts.

| <i>Miles from Edinburgh</i> | <i>Places on the Road.</i>                                                          | <i>Mileage.</i>       |                  | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| 25 $\frac{3}{4}$            | <b>CARNWATH</b> .....<br>(Centre of village.)                                       | ...                   | ...              | Proceeding eastward bear to <i>l.</i> on a long gradual ascent for 2 m. with fall and rise before Parkneuk.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 23                          | <i>Parkneuk</i> ..                                                                  | 2 $\frac{3}{4}$       |                  | Quick descent to the R. North Medwin, then an undulating ascending road on the hillsides, through wild and dreary country. Over a m. beyond S. Tarbrax the road falls for about 2 m. then re-ascends for fully 3 m., beyond which there is a steepish descent and a long undulating downhill run for over 4 m. Quick fall towards Balerno and a gradual downward tendency through Currie to beyond Juniper Green, beyond which latter place keep to <i>l.</i> at fork ( <i>r.</i> , to Colinton, see note); long descent to Slateford. Surface very poor, and rough in parts, over the hills to Balerno, then improving, but rather lumpy through the villages to Slateford. |

|                             | <b>EDINBURGH</b> .....<br>(General Post Office.)                                    | 3 $\frac{1}{4}$       | 25 $\frac{3}{4}$ |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

**CARNWATH TO EDINBURGH.** *Reverse.*—Reverse of Route 83 to Dalry Cemetery, at end of

which bear to *L.* up Ardmillan Terr. At Balerno Sta. keep to *r.*, thence an open unmistakable road to Carnwath.

EDITOR'S NOTE.—By keeping to *r.*, downhill, at fork beyond Juniper Green, Edinburgh may be entered by Colinton and Craiglockhart Hydropathic. Keep over the long br. to *r.* at Colinton, crossing river and rly., and ascending through the village the road runs fairly level through a fine avenue of trees. At the end of this avenue turn *L.* passing the Hydropathic on *r.* with downhill stretch towards tram terminus at Craiglockhart. Follow tramlines by Gilmour Pl. to Howe St., where bear *L.* and again to *L.* at Tollcross. Continue down Lothian Rd. to W. end of Princess St. and go along that street to G.P.O. Fairly good macadam to tram terminus, then poorer surface.

If desiring to reach the south side of Edinburgh keep straight up by Myreside at tram terminus, and on reaching the top of the hill near Merchiston Castle School (on *L.*) bear to *r.* along Abbotsford Cres. and again to *r.* into Abbotsford Park; a few yds. further bear round to *L.*, and to *r.* again on meeting tramlines, going a short way down the hill. At ch. on *L.* bear round to *L.* into Newbattle Terr. and go straight on down Grange Loan into Newington. This is a very pleasant suburban run and avoids busy thoroughfares.

## ROUTE 83. LANARK TO EDINBURGH.

The best road to Edinburgh, and preferable in every way to Routes 81 and 82. The hills are easy, and the tendency is all downward from the summit near Whitehouse. Surface variable, but good on the whole.

| Miles from<br>Edinburgh. | Places on the<br>Road. | Mileage.           |        | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

**LANARK TO EDINBURGH. Reverse.**—From General Post Office go westward along Princes St., and follow tramlines along Maitland St. to Haymarket Sta., where bear to L. following a line of tramway along Dalry Rd. Towards end of Dalry Cemetery bear to r. and leave by Gorgie Rd. Straight on to Mid Calder, in which village bear round to L. and keep to r. at fork, beyond. Passing W. Calder rly. sta. bear r. into village and keep to L. at fork after crossing a small stream. At fork near Wilsontown village (which lies on L.) keep to r. and again to r. after crossing the Mouse Water before Lanark, and bear to L. into the town.

## ROUTE 84. LANARK TO LINLITHGOW.

A typical cross-country road, moderately hilly throughout, and with a variable surface, which improves, however, after Armadale. The gradients are, on the whole, in favour of the rider, and the scenery is, in parts, attractive.

| 14 $\frac{1}{2}$                 | Whitehouse .....               | II                               | II               | Bear to L., down a rough descent, then undulating with downward trend crossing Route 85. Road re-ascends, is level for a short way, then rises up a stiffish slope towards Longridge, where a by-road is crossed in the village. Out of the village there is a short bit of level, then the downward slope towards Whitburn commences. Indifferent surface. |
|                                  | (Fork-roads.)                  |                                  |                  |                                                                                                                                                                                                                                                                                                                                                             |
| 13                               | Cross-roads .....              | I $\frac{1}{2}$                  |                  | Cross old Edinburgh—Glasgow Road (Routes 86, 87), and keep straight on—passing over R. Almond, with a rise beyond and an undulating decline towards Armadale Sta., followed by a short rise and a roughish fall to Armadale. Poor surface in parts.                                                                                                         |

**LANARK TO LINLITHGOW.** *Reverse.*—From Cross going westwards along High St. bear to *L.*, at second road, near end of the town, and pass under *rly.* and over canal. Keep to *r.* at fork at nearly 4 m. out (d.p.), and at 1 $\frac{1}{4}$  m. beyond keep to *L.* before the Couston Water, and keep straight on to Armadale, and Whitburn. At  $\frac{1}{2}$  m. beyond latter place bear to *L.*, then a fairly straightforward road to junction with Route 83. Reverse of that route to Lanark.

**ROUTE 85. WISHAW TO MID CALDER.**

A rather uninteresting road through the open moorland of the coal and iron district beyond Newmains. Surface loose and inferior to West Calder, then good.

| <i>Miles from<br/>Mid Calder</i> | <i>Places on the<br/>Road.</i> | <i>Mileage.</i>                  |                  | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                                                                                           |

|                                  |                                | <i>Inter-<br/>medi-<br/>ate.</i> | <i>Total.</i>    |                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 20 $\frac{1}{4}$                 | Wishaw .....                   | ...                              | ...              | From the cross-streets at centre of town proceed due N. E. towards Cambusnethan, ascending into that village. Level towards Newmains, where keep straight on, crossing Route 34 and passing <i>rly.</i> , descending to the river valley and on a rising, winding road to Damside. Easier for nearly a m., then a long gradual ascent followed by a series of easy undulations to Breich, where Route 84 is crossed. Poor surface after Newmains. |

## Route 85.

**WISHAW TO MID CALDER**—*continued.*

| Miles from<br>Mid Calder | Places on the<br>Road.  | Mileage.                |                  | General description of the Road.                                                                              |
|--------------------------|-------------------------|-------------------------|------------------|---------------------------------------------------------------------------------------------------------------|
|                          |                         | Inter-<br>medi-<br>ate. | Total.           |                                                                                                               |
| 4 $\frac{1}{4}$          | West Calder.....        | 4 $\frac{1}{4}$         | 15 $\frac{1}{2}$ | West Calder and cross a small stream, still descending into the town. Poor surface, rough and loose in parts. |
|                          | <b>MID CALDER</b> ..... | 4 $\frac{3}{4}$         | 20 $\frac{1}{4}$ | Route 83 to Mid Calder.                                                                                       |

**WISHAW TO MID CALDER.** *Reverse.*—Reverse of Route 83 to West Calder, at fork about a m. beyond which keep to *r.* having rly. on *r.* Keep straight on over Breich cross-roads and beyond. Avoid a road to *L.* at Damside and go straight on over cross-roads in Newmains, to Wishaw.

**ROUTE 86. WHITBURN TO GLASGOW.**

Portion of the old road between Edinburgh and Glasgow but now much disused, the preference as through routes being given to Routes 90 and 91. Easy gradients and fairly good surface to Newhouse, and very good to within the vicinity of Glasgow, when it becomes spoiled by traffic.

AIRDRIE TO SLAMANNAN. *Reverse.*—At S. end of village bear round to *r.*; at junction with Route 34, 2 m. beyond Greengairs, turn *l.*, and at cross-roads at E. end of Airdrie turn sharp *r.* into that town.

## ROUTE 89. MID CALDER TO SOUTH QUEENSFERRY.

A pleasantly undulating cross-country road with some varied scenery of a pastoral nature. Surface indifferent at first, then good. Fine view of Forth Bridge above Queensferry.

|                                              | SOUTH QUEENSFERRY...<br>(Town Hall.) | 2½                               | 11½           |                                                                                                                                                                                                                                                                                                                                                                                                                                          |

**MID CALDER TO SOUTH QUEENSFERRY.** *Reverse*—Starting from the main st. which runs E. and W. through the town, take first turning to L. W. of Town Hall, up a steep hill—unrideable. Cross main road at Kirkliston near the Inn and turn round to r. in the village then to L., having R. Almond on L. for a short distance; cross the river and bear round to r. At Newbridge cross-roads turn sharp L., and r. at  $\frac{3}{4}$  m. beyond, passing Ratho rly. sta. Keep to L. till near Ratho when turn r. over canal into the village, in which road bends to r. Turn towards L. in Bonnington, and on meeting main road at Wilkieston turn sharp r. Reverse of Route 83 to Mid Calder.

## ROUTE 90. EDINBURGH TO GLASGOW.

(Via Bathgate.)

The shorter of the two main roads between Edinburgh and Glasgow; see also Route 91. The gradients are easy throughout, and the surface, on the whole, very good to Airdrie, when it becomes rather poorer into Glasgow. The scenery is somewhat uninteresting.

| Miles from Glasgow. | Places on the Road.                              | Mileage.        |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| 29                  | Dechmont .....                                   | 2 $\frac{1}{2}$ |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 25 $\frac{1}{2}$    | Bathgate .....                                   | 3 $\frac{1}{2}$ | 18 $\frac{3}{4}$ | Going straight through the town and passing rly. beyond, road re-ascends, gradually, to Armadale, where Route 84 is crossed, and continues to ascend for a short way beyond the village. After a fairly level run of $1\frac{1}{2}$ m. the uphill tendency is resumed, through dreary open country, to beyond Blackridge, where it becomes undulating to its highest point before Hillend Reservoir (on r.) and falls towards Caldercruix. Surface not quite so good, but affording very fair riding on the whole. |

|                            | (Royal Exchange.)          |                       |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                     |

**EDINBURGH TO GLASGOW.** *Reverse.*—Go up Queen St. to George Sq. Sta. and turn *r.*, along N. side of George Sq., proceeding by George St. and Duke St., following the tramlines eastward. About  $\frac{1}{2}$  m. past Duke St. Sta. bear *r.* at fork, passing under two rly. brs. and turning to *l.* just beyond the second br. and bear slightly *l.* into Shettleston. Avoid a road to *r.* in Baillieston, and bear *r.* at fork after passing rly., before Airdrie, passing straight through the southern portion of the town on main road, thence unmistakable to Bathgate, on approaching which bear to *r.* A very easily-followed road towards Edinburgh; bear to *r.* beyond the suburb of Murrayfield, crossing Water of Leith and passing under rly. at Murrayfield Sta. Follow tramlines straight on to General Post Office at E. end of Princes St.

**EDITOR'S NOTE.**—Glasgow Royal Exchange may also be reached by keeping straight on at Manscroft Cottage along Westmuir St. to Parkhead Cross, and by following tramlines along Great Eastern Rd. and Gallowgate to Glasgow Cross, and thence by Trongate into Argyle St., and to *r.* up Queen St. Distance, 3 m. from Manscroft Cottage. The way detailed above (by Duke St. Sta.) is, however, preferable as leading through less crowded streets, but is of almost equal distance.

# ROUTE 91. GLASGOW TO EDINBURGH.

(Via Falkirk.)

The m.s. are measured from Glasgow Cross, then from W. end of Princes St., Edinburgh. A very good, broad, well constructed main road throughout, affording especially enjoyable riding beyond Linlithgow. The surface is variable for some way out of Glasgow, but is on the whole, good, and improves after Falkirk. This is a longer road than Route 90 but much more interesting. Glasgow may also be left by Route 96.

| 9                        | Kirkliston .....        | 2½                      | 38½    | Keep straight through village (crossing Route 89), passing over rly. and descending to Boathouse Br. where the R. Almond is crossed, road bending round to L. when over. Long stretches of almost level running on a well-constructed highway to junction at d.p. (on <i>r.</i> ) with Route 90. Level through Corstorphine with slight fall before Murrayfield to the level again. Road bends to <i>r.</i> , crosses Water of Leith, then bears towards L. and passes under rly. at Murrayfield Sta. Level, following tramlines, by Osborne Ter. to Haymarket Sta. (on <i>r.</i> ), and straight on by Maitland St. to Princes St. (wood paving) and passing along that street to General Post Office at its eastern end. Capital surface from Kirkliston to Corstorphine, then rather lumpy into the city. |

**GLASGOW TO EDINBURGH (VIA FALKIRK).** *Reverse.*—Route 90 to fork a m. beyond Corstorphine. Bear to *r.*, thence an unmistakable main road to Linlithgow and Falkirk. In the latter town keep straight along High St., descending out of the town. At over a m. beyond Camelon, after passing rly. keep to L. and in Bonnybridge bear *r.*, crossing the Bonny Water. At fork at Longcroft keep to L. and to *r.* at Cumbernauld. Avoid a road to L. at Condorrat, but keep to L. at Millerston and at about 2½ m. further bear L., cross rly., and turn again L. with rly. on L. to Duke St. Sta., where turn to *r.* following tramlines by Duke St. and George St. to George Sq., where, near Queen St. Sta., turn L. down Queen St. to Royal Exchange.

**EDITOR'S NOTE.**—A road leaves Linlithgow, due northward from W. end of the town, for Bo'ness, etc. Level for about a m., it then climbs a very steep hill and descends equally abruptly into Bo'ness on a gradient of something approaching 1 in 10; both hills are *dangerous*. The surface is, however, fair. Distance 3¾ m. from Linlithgow Cross.

A capital level road connects Bo'ness and Grangemouth. Keep to *r.* at 2½ m. out of Bo'ness and cross R. Avon with long straight stretch to Grangemouth. Distance, 8½ m.

## ROUTE 92. FALKIRK TO KINCARDINE.

A direct communication by means of Kincardine ferry with the roads in the W. of Fifeshire. Good, easy road to the ferry.

| Miles from<br>Kincardine | Places on the<br>Road. | Mileage.                |                 | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

**FALKIRK TO KINCARDINE. Reverse.**—Cross ferry to Higgensneuk (fare 3d.), and at road junction about a m. from ferry bear *L.*, and at  $\frac{3}{4}$  m. beyond to sharp *r.* At Langdyke,  $\frac{3}{4}$  m. further still, turn sharp *L.*, and in Carronshore bear to *r.* to Carron Ironworks, where road bears round to *L.*, crossing river, and ascending through Grahamston to Falkirk High St.

**EDITOR'S NOTE.**—A good road connects Falkirk with Grangemouth. Leave High St. as in Route 92, but at first cross street turn to *r.*, passing rly. (some way east of Grahamston Sta.) and descending to the level. Keep policies of Kerse House on *L.* into Grangemouth. Very good surface. Distance, 3 m. See also notes to Routes 91 and 93.

## ROUTE 93. FALKIRK TO ALLOA.

Affording direct connection between the two towns, and with the Clackmannanshire and West Fife roads. With the exception of the hill beyond Carron, the road is level and the surface good.

|                      | Alloa .....             | $\frac{1}{4}$           | 9 $\frac{1}{4}$ | (Routes 168 and 175 joined here).                                                                                                                                               |
|                      | (Post Office.)          |                         |                 |                                                                                                                                                                                 |

**FALKIRK TO ALLOA.** *Reverse.*—From Alloa Post Office by Lime-tree Walk to the harbour and by steam ferry to South Alloa. Leaving South Alloa the road runs along the shore for some way then bends to *L.*, passing the rly. : at branch-roads beyond take first road on *r.*, having rly. on *r.* to beyond Airth Rd. Sta. Descending from the cross-roads towards Carron keep to *L.* (*r.*, to Stenhousemuir). Reverse of Route 92 to Falkirk.

**EDITOR'S NOTE.**—From South Alloa a good level road runs to Stirling, westwards, and connects, eastwards, with Route 92 beyond Airth. For Stirling turn to *r.* at  $\frac{3}{4}$  m. from South Alloa and pass rly. near S. end of the br. across the Forth. Almost dead level, in parts, through quiet, pastoral land to Stirling, rising over rly. before that town. Good surface.

For Grangemouth, etc., follow reverse of Route 93 to the branch-roads  $1\frac{1}{4}$  m. from South Alloa and take second road on *L.* (the first road, due *L.*, being merely a farm access), with good, level stretch by Dunmore House to Airth village, beyond which Airth Castle grounds are skirted on *r.*, the Pow Burn crossed, and Route 92 joined. See, also, notes to Routes 91 and 92.

## ROUTE 94. FALKIRK TO STIRLING.

This Route, in connection with portion of reverse of Route 91, forms the main road from Edinburgh to Stirling and the North. Capital surface to Pleau, fair to Bannockburn, and poorer into Stirling. The battlefield lies to W. of St. Ninians.

|                                 | STIRLING .....                 | 1¼                               | 11¼           |                                                                                                                                                                                                                                                                                                                                                                  |
|                                 | (King Street Corner.)          |                                  |               |                                                                                                                                                                                                                                                                                                                                                                  |

**FALKIRK TO STIRLING. Reverse.**—From King St. corner leave by Port St. and follow tramlines (being laid down this year, 1897) to St. Ninians, in which village keep to *L.*, and again to *L.* before Bannockburn. A straightforward road to Camelon, where turn sharp *L.*, on meeting main Glasgow-Edinburgh road, towards Falkirk. Keep to *r.*, on ascending into the town, to High St.

## ROUTE 95.

## FALKIRK TO DENNY.

A short, picturesque road giving direct access between the two towns. Very good surface, and no hills worth mentioning.

| <i>Miles from<br/>Denny.</i> | <i>Places on the<br/>Road.</i> | <i>Mileage.</i>                  |               | <i>General description of the Road.</i>                                                                                                                                                                                                                      |

|                              | (Parish Church.)               |                                  |                |                                                                                                                                                                                                                                 |

**FALKIRK TO DENNY. Reverse.**—From cross-roads in centre of town go due eastward. At  $1\frac{1}{4}$  m. out keep to *l.* by riverside, and  $\frac{1}{4}$  m. beyond avoid a road (to Larbert) on *l.* Cross the Bonny Water and bear *r.*, passing rly. line to junction with main road, bearing to *l.* towards Falkirk and keeping to *r.* into High St. in that town.

**EDITOR'S NOTE.**—A road runs from Larbert to Dennyloanhead, connecting Routes 94 and 91. At cross-roads, in centre of Larbert village, keep W. up the riverside by a winding, undulating road to junction with Route 95, where turn *r.*, and at fork  $\frac{1}{4}$  m. further, near rly., keep to *l.*, joining main road  $\frac{1}{2}$  m. E. of Dennyloanhead. Good surface at first, then fair. Distance,  $2\frac{1}{2}$  m.

## ROUTE 96. GLASGOW TO STIRLING.

(Via Kilsyth.)

May be used as far as Longcroft and thence with portion of Route 91, as an alternative route to Edinburgh. Though a very undulating road it has a good surface and passes through some interesting scenery, especially at the foot of the Campsie Fells. The climb out of Glasgow is, however, rather tedious and decidedly unattractive.

**GLASGOW TO STIRLING.** *Reverse.*—Reverse of Route 34 to Longcroft, where bear *r.* at fork, avoiding all branch and cross-roads to Kilsyth, where keep straight through upper part of the town, and bear to *r.* before Kirkintilloch, and slightly to *l.* on entering the town, passing rly. and keeping straight on. Keep to *r.* at Bishopbriggs; thence unmistakable to Springburn, where tramlines are met, which follow down into the city. Where tramlines go to *r.* along Parliamentary Rd., keep straight on, passing Cathedral on *l.* and turning to *r.* into George St., following tramlines to Queen St. Sta., where bear *l.* down Queen St. to Royal Exchange.

**ROUTE 97. KILSYTH TO STRATHBLANE.**

An easy, undulating road, lying along the base of the Campsie Fells, affording some fine views, and having a capital surface throughout.

|                           | [Campsie $\frac{1}{4}$ m.] |                         |                 |                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|                           | STRATHBLANE .....          | 3 $\frac{1}{4}$         | II              | (Route 100 joined here.)                                                                                                                                                                                                                                                                                                                                                                                                                 |

**KILSYTH TO STRATHBLANE. Reverse.**—Where roads branch, just N. of the rly., turn to r. by the hill-foots and bear r. after crossing stream at foot of Campsie Glen, passing rly. sta.  $\frac{1}{2}$  m. further. Keep straight through Lennoxtown and avoid a road to r. at its S.E. end. Pass straight through Milton, and on meeting main Glasgow road turn sharp L. towards Kilsyth.

## ROUTE 98. GLASGOW TO KIPPEN.

(Via The Hill Road.)

Good road to Lennoxtown; very steep, with poorer surface, through the Campsie Fells, surface becoming good again towards Kippen. The scenery is very attractive in Campsie Glen and the wild, rugged moorland beyond has a charm of its own; fine view of the Forth valley before Kippen.

(to Cadder) and r., at 2 m. beyond Bishopbriggs where roads fork bear to L., descending over canal to R. Kelvin, beyond which bear to r. ascending into Torrance. Good surface. |
|                       | [Cadder $\frac{1}{4}$ m.] |                         |                 |                                                                                                                                                                                                                                                                        |
| 19                    | Fork-roads .....          | 2                       |                 |                                                                                                                                                                                                                                                                        |
| 18 $\frac{1}{4}$      | Torrance .....            | $\frac{3}{4}$           | 6 $\frac{3}{4}$ | Keep to r. beyond rly., road gradually ascending for a m., then falling, bearing round to L. with a further rise and easy decline before Lennoxtown. Pass river and rly. and turn L. into the town. Good surface.                                                      |

## Route 98.

GLASGOW TO KIPPEN—*continued.*

| Miles from<br>Kippen. | Places on the<br>Road. | Mileage.                |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                           |
|-----------------------|------------------------|-------------------------|------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                       |                        | Inter-<br>medi-<br>ate. | Total.           |                                                                                                                                                                                                                                                                                                                                                                                                            |
| 14 $\frac{3}{4}$      | Lennoxtown .....       | 3 $\frac{1}{2}$         | 10 $\frac{1}{4}$ | Bear to <i>r.</i> towards the upper end of the town, going along the hillside and bending to <i>r.</i> up the glen. Very steep climb for nearly 2 m., then easier, but still considerable, to the summit. Surface rough and rather loose.                                                                                                                                                                  |
| 11                    | Summit .....           | 3 $\frac{1}{4}$         | 14               | From the summit, which is over 1000 ft. above sea level, the road falls steeply towards Fintry with one or two rather awkward bends, the long descent ending near the Gonachan Burn, then a more gradual decline to Fintry. Roughish surface on the hill, then improving.                                                                                                                                  |
|                       | (Dangerous turn.)      |                         |                  |                                                                                                                                                                                                                                                                                                                                                                                                            |
| 7 $\frac{1}{2}$       | Gonachan .....         | 3 $\frac{1}{2}$         |                  |                                                                                                                                                                                                                                                                                                                                                                                                            |
| 7                     | Fintry<br>(Church.)    | $\frac{1}{2}$           | 18               | Pass straight through the village, with descent into Newtown, where keep to <i>r.</i> at fork ( <i>L.</i> , a fair, hilly road to Boquhan). Cross the Endrick Water, having an undulating road with upward trend for 2 m. and a long stiffish rise for 1 $\frac{1}{2}$ m. towards a plantation and Loch Laggan (on <i>L.</i> ) with a good downhill run into Kippen. Good road, on the whole, from Fintry. |
| 6 $\frac{1}{4}$       | Newtown .....          | $\frac{3}{4}$           |                  |                                                                                                                                                                                                                                                                                                                                                                                                            |
| $\frac{1}{2}$         | Cauldhame .....        | 5 $\frac{3}{4}$         |                  |                                                                                                                                                                                                                                                                                                                                                                                                            |
|                       | KIPPEN .....           | $\frac{1}{2}$           | 25               | Kippen village lies south of the Forth Valley main road (Route 100), and the sta. stands beyond that road, 1 m. north of the village.                                                                                                                                                                                                                                                                      |

**GLASGOW TO KIPPEN (VIA THE HILL ROAD).** *Reverse.*—From cross-roads in Kippen ascend in a S.W. direction and keep to *L.* just before Cauldhame. An unmistakable road to Fintry and over the summit, with a *dangerous* descent towards Lennoxtown (awkward turn). Go straight through that town and turn *r.* at its S.E. end, passing rly. Road bends to *L.* into Torrance then to *L.* again to K. Kelvin; bear *r.* on meeting main road (Route 96), thence by reverse of that route into Glasgow.

## ROUTE 99.

## KIRKINTILLOCH TO LENNOXTOWN.

A short connecting link between Kirkintilloch and the hill-foots road—Route 97. Easy gradients; good surface.

| Miles from<br>Lennoxtown. | Places on the<br>Road.       | Mileage.                |        | General description of the Road.                                                               |
|---------------------------|------------------------------|-------------------------|--------|------------------------------------------------------------------------------------------------|
|                           |                              | Inter-<br>medi-<br>ate. | Total. |                                                                                                |
| 3 $\frac{3}{4}$           | Kirkintilloch...<br>(Cross.) | ...                     | ...    | From the Cross proceed eastwards along High St., pass over the Luggie Water, and, before rly., |

Route 99. KIRKINTILLOCH TO LENNOXTOWN—*cont.*

| Miles from<br>Lennoxtown. | Places on the<br>Road. | Mileage.                |                 | General description of the Road.                                                                                                                                                 |
|---------------------------|------------------------|-------------------------|-----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           |                        | Inter-<br>medi-<br>ate. | Total.          |                                                                                                                                                                                  |
|                           |                        |                         |                 | turn <i>L.</i> , having rly. on <i>r.</i> and crossing R. Kelvin. Fairly level to Birdston, passing under rly. before the village. Fairly good surface, except in Kirkintilloch. |
| 2 $\frac{3}{4}$           | Birdston.....          | 1                       | 1               | Gradually ascending road from Birdston with descent towards rly. and river before Milton, in which village Route 97 is joined; bear to <i>L.</i> Good surface.                   |
| 1 $\frac{3}{4}$           | Milton .....           | 1                       | 2               | Route 97 to Lennoxtown.                                                                                                                                                          |
|                           | LENNOXTOWN .....       | 1 $\frac{3}{4}$         | 3 $\frac{3}{4}$ |                                                                                                                                                                                  |

KIRKINTILLOCH TO LENNOXTOWN. *Reverse.*—Reverse of Route 97 to Milton, where turn sharp *r.*, crossing river and rly. Keep straight through Birdston, and turn *r.* in Kirkintilloch, cross a stream, and go along High St. to Cross.

## ROUTE 100. GLASGOW TO STIRLING.

(Via Balforn.)

A hilly road with good surface towards Buchlyvie then undulating with improved surface towards Kippen cross-roads, and from thence into Stirling a really excellent road running level in the Forth valley and possessing delightful surface. The alternative route between Strathblane and Buchlyvie, going by Route 103 to where it intersects Route 102, near the rly., and there turning *r.* to Buchlyvie, is much easier than by Balforn.

| Miles from<br>Stirling. | Places on the<br>Road.     | Mileage.                |                  | General description of the Road.                                                                                                                                                                                              |
|-------------------------|----------------------------|-------------------------|------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                         |                            | Inter-<br>medi-<br>ate. | Total.           |                                                                                                                                                                                                                               |
| 38                      | GLASGOW .....              |                         |                  | Route 102 to Canniesburn.                                                                                                                                                                                                     |
| 33 $\frac{1}{4}$        | Canniesburn.....           | 4 $\frac{3}{4}$         | 4 $\frac{3}{4}$  | Here turn sharp <i>r.</i> with slight ascent, then fairly level passing rly. and ascent before Milngavie; keep to <i>r.</i> at fork, again passing rly. and easy running to the village which lies on <i>L.</i> Good surface. |
| 30 $\frac{3}{4}$        | Milngavie .....            | 2 $\frac{1}{2}$         | 7 $\frac{1}{4}$  | Long winding ascent, stiff at first, then easier for 2 $\frac{1}{2}$ m. with descent, with awkward turn near foot, towards Strathblane, where Route 97 is met. Good surface.                                                  |

**GLASGOW TO LENNOXTOWN.** *Reverse.*—Reverse of Route 98 to Torrance, beyond which village turn sharp *r*. and bear round to *r*. in Balmore. At branch roads beyond Bardowie Loch turn to *L*, cross rly. and R. Kelvin and canal beyond, crossing rly. again at Possil and at Possilpark Sta's. Turn *L* at end of Balmore St. and sharp *r*. at Saracen Cross, following tramlines to Possil Cross, where turn *r*. and follow tramlines by Possil Rd. and Garscube Rd. to Cowcaddens and Buchanan St., turning *L* near Athenæum Buildings into W. George St., and to *r*. at Queen St. Sta. down Queen St. to Royal Exchange.

# ROUTE 102. GLASGOW TO BUCHLYVIE.

(Via Drymen.)

A very hilly road between Bearsden and Drymen but possessing fair surface on the whole. Drymen may also be reached by Route 105, or by Strathblane (Route 100), thence by Routes 103 and 104. The more direct road to Buchlyvie is via Route 100.

| Miles from Buchlyvie. | Places on the Road.                | Mileage.        |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| 25 $\frac{1}{4}$      | GLASGOW .....<br>(Royal Exchange.) | ...             | ...              | From Royal Exchange proceed up Queen St. to Queen St. Sta., at N.W. corner of George Sq., and turn <i>l.</i> along W. George St. and to <i>r.</i> on entering Buchanan St. At fork near Buchanan St. Sta. bear to <i>l.</i> into Cowcaddens, where tramlines are met. At next fork follow tramlines to <i>l.</i> along New City Rd. and bear to <i>r.</i> , still following New City Rd., at St. George's Cross. At $\frac{3}{4}$ m. further follow tramlines as they bear slightly to <i>l.</i> , ascending. Cross rly. near Maryhill Barracks and pass under the canal before Maryhill village; undulating road. Continue along Main St. to tramway terminus, cross rly. near Maryhill Sta. and keep straight on, road passing through plantations and skirting the estate of Garscube on the <i>l.</i> ; gradual descent towards Canniesburn, crossing R. Kelvin. Keep straight on here ( <i>r.</i> , Route 100) ascending towards Bearsden Sta. and village. Up to this point the gradients are easy and the surface is good after Maryhill. |

| 19 $\frac{3}{4}$      | Bearsden .....                     | $\frac{3}{4}$   | 5 $\frac{1}{2}$  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|                       | (or, New Kilpatrick)               |                 |                  | Ascent out of the village; keep to <i>r.</i> at branch roads ( <i>l.</i> , Route 106.) The steady ascent continues to the cross-roads, beyond which it becomes steeper, then descends and reascends, very stiffly, for $\frac{1}{2}$ m., then rises and falls over long undulations for over 2 m., rising, beyond, steeply, to summit. Quick descent for over 2 m., dipping to a br. at foot—care required. Keep straight on at Finnick Toll ( <i>r.</i> , Route 104). Descent to a small stream before Drymen Sta., with quick rise to the sta. At fork keep to <i>r.</i> ( <i>l.</i> , Route 105); cross the Endrick Water, ascending into Drymen. Surface fair throughout.                                                                                                                                                                                                                                                                                                                                                                    |

Descent of 3 m. towards Buchlyvie. Fine surface.<br>(The continuation to Stirling is detailed in Route 100).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

**GLASGOW TO BUCHLYVIE.** *Reverse.*—At fork over 2 m. out, keep *r.* and again *r.* at next fork near rly. On entering Drymen turn *L.* through the village and keep to *L.* after crossing the Endrick Water. Keep straight on at cross-roads, Finnick Toll. Before Bearsden bear *L.* on meeting Route 106. Enter Glasgow by suburb of Maryhill following tramlines by New City Rd., and Cowcaddens into Buchanan St. Near Athenæum Buildings turn *L.* to Queen St. Sta., then *r.* to Royal Exchange.

**EDITOR'S NOTE.**—At cross-roads towards N. end of Drymen Village, a narrow road leaves westwards for Balmaha and Rowardennan on Loch Lomond. This road leads through very picturesque scenery, is fairly good for 5 or 6 m., but beyond that becomes very rough. Rowardennan Hotel, from which the ascent of Ben Lomond can be made most easily, may also be reached by steamer from Balloch (on Route 107) or from Drymen by reverse of Route 105 to Jamestown and Balloch pier, as in note to that route.

## ROUTE 103. GLASGOW TO ABERFOYLE.

A well-graded road with excellent surface on the whole. When going between Glasgow and Stirling via Buchlyvie, many riders prefer to go round by this route between the fork near Burnfoot and the meeting with the Buchlyvie road (Route 102) beyond Balfron Sta. than by the loop through Balfron (Route 100).

| 16 $\frac{1}{4}$         | Strathblane .....      | 11 $\frac{1}{4}$        | 11 $\frac{1}{4}$ | Bear to <i>L.</i> near rly. sta., road at first level then descending, with a rise and undulating descent to fork beyond Burnfoot. Keep to <i>L.</i> at this fork ( <i>r.</i> , Route 100); undulating to where Route 104 is crossed near Killearn Sta., and falling gradually for $\frac{3}{4}$ m., then undulating, but chiefly on the rise, to Balfron Sta. (on <i>r.</i> ). Splendid surface.                                                                                                                                                                                 |
| 11 $\frac{1}{4}$         | Cross-roads .....      | 5                       |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 8                        | Balfron Station .....  | 3 $\frac{1}{4}$         | 19 $\frac{1}{2}$ | At $\frac{1}{4}$ m. further Route 102 is crossed. Keep to <i>L.</i> at the fork here near the rly. Undulating for over a m., then gradually descending to the level beyond the Kelty Water and by the policies of Gartmore. (After crossing the Kelty turn <i>L.</i> for Gartmore village.) Slight ascent to Gartmore Sta. where rly. is crossed, and road bears round to <i>L.</i> and is undulating towards Aberfoyle. Route 178 joins on <i>r.</i> nearly 1 m. beyond Gartmore Sta. Surface not so good for the m. beyond Gartmore Sta., but improving beyond, into Aberfoyle. |

**GLASGOW TO ABERFOYLE.** *Reverse.*—Leave Aberfoyle having rly. on *r.* and 1 m. out turn to *r.* At Gartmore Sta. bear round to *L.* when over the rly. (straight on, up a long hill, to Gartmore Village). At fork where Route 102 is crossed keep *L.*, passing Balfron Sta. on *L.* and pass over cross-roads near Killearn Sta. From Strathblane as in reverse of Route 100 to Glasgow.

## ROUTE 104. BALFRON TO DRYMEN.

(Via Killearn.)

A short cross-country route, connecting Routes 100, 103, and 102. Drymen may also be reached from Balfron by following Route 100 to where it joins Route 102, then by reverse of Route 102.

| Miles from Drymen. | Places on the Road.                   | Mileage.       |        | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

**GLASGOW TO DRYMEN.** *Reverse.*—Descending through the village, turn sharp *r.* after crossing the Endrick Water. At fork 2 m. beyond Bonhill keep *L.* (*r.*, to Dumbarton) and bear again *L.* on meeting the riverside road. In Old Kilpatrick keep *r.*, and 1 m. beyond Yoker turn to *L.* Road bears *r.* passing Scotstounhill Sta. and Great Western Rd. Sta. Proceed along Great Western Rd., meeting tramlines, and by New City Rd. and Cowcaddens into Buchanan St. Near Athenæum buildings turn *L.* to Queen St. Sta. where turn *r.* to Queen St. and Royal Exchange.

**NOTE.**—Jamestown to Balloch. From level rly. crossing in Jamestown proceed N. down past ch. and school and take road to *L.*, going downhill past Levenbank works where road bends round to *r.* Short level straight bit of road; bear *L.* into Balloch.

## ROUTE 106.

## GLASGOW TO OLD KILPATRICK.

(Via Bearsden.)

The direct road to Old Kilpatrick is by Route 105 or Route 103; this route being merely a link from Bearsden, on Route 102. A short circular run might be made by combining portions of the routes just mentioned.

| Miles from<br>Kilpatrick. | Places on the<br>Road. | Mileage.                |        | General description of the Road.                                                                                                                                                                                                                                      |

| 20¼                    | GLASGOW .....          | ...                     | ...    | Route 105 or 108 to Bowling.                                                                                                                                                                                                                 |
| 8½                     | Bowling.....           | 11¼                     | 11¼    | Undulating road to fork, where keep l. (r., Route 105) and fairly level running to Dumbarton with level crossing on entering. Surface fairly good on the whole but rather lumpy into Dumbarton.                                              |
| 5                      | Dumbarton .....        | 3½                      | 15¼    | From High St. turn l. and cross R. Leven and bear to r. when over, uphill, to fork, where keep r. (l., Route 108); cross rly., having Balloch branch on r. Road fairly level, again cross rly., descending gently into Renton. Good surface. |
|                        | (High Street.)         |                         |        |                                                                                                                                                                                                                                              |

## Route 107.

**GLASGOW TO BALLOCH**—*continued.*

| <i>Miles from<br/>Balloch.</i> | <i>Places on the<br/>Road.</i>   | <i>Mileage.</i>                  |                  | <i>General description of the Road.</i>                                                                                                                                                                                                                 |
|--------------------------------|----------------------------------|----------------------------------|------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                |                                  | <i>Inter-<br/>medi-<br/>ate.</i> | <i>Total.</i>    |                                                                                                                                                                                                                                                         |
| 2 $\frac{3}{4}$                | Renton .....                     | 2 $\frac{1}{4}$                  | 17 $\frac{1}{2}$ | Proceed straight through the village rising, beyond, over rly., and into Alexandria over a short, nearly level stretch. Good surface, but apt to be rough in Alexandria.                                                                                |
| 1 $\frac{1}{2}$                | Alexandria .....<br>(Fountain.)  | 1 $\frac{1}{4}$                  | 18 $\frac{3}{4}$ | Pass straight through the main street and out through an avenue of trees, skirting the policies of Tullichewan Castle on l. Slight rise at first then gentle decline. At d.p. turn r. to Balloch Sta. and Hotel (l., Routes 109 and 257). Good surface. |
|                                | <b>BALLOCH</b> .....<br>(Hotel.) | 1 $\frac{1}{2}$                  | 20 $\frac{1}{4}$ | (A steamer plys at intervals during the day from Balloch pier, to the various other piers on Loch Lomond, in connection with trains from Balloch Sta. For particulars see rly. time tables).                                                            |

**GLASGOW TO BALLOCH. Reverse.**—From Balloch Hotel cross over rly. and on meeting Dumbarton—Luss Road turn sharp l. At Dumbarton turn l. and cross R. Leven into High St., in which turn r., and then bear l. As in reverse of Route 105 from Bowling.

**ROUTE 108. GLASGOW TO HELENSBURGH.**

Easy gradients, good surface, and excellent views of the Firth of Clyde.

| <i>Miles from<br/>Helensburgh.</i> | <i>Places on the<br/>Road.</i>            | <i>Mileage.</i>                  |                  | <i>General description of the Road.</i>                                                                                                                                                     |
|------------------------------------|-------------------------------------------|----------------------------------|------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                    |                                           | <i>Inter-<br/>medi-<br/>ate.</i> | <i>Total.</i>    |                                                                                                                                                                                             |
| 23 $\frac{1}{2}$                   | <b>GLASGOW</b> .....<br>(Royal Exchange.) | ...                              | ...              | Route 105 to Bowling (or alternative route, below).                                                                                                                                         |
| 11 $\frac{3}{4}$                   | Bowling .....                             | 11 $\frac{3}{4}$                 | 11 $\frac{3}{4}$ | Undulating road to fork, where keep l. (r., Route 105) and fairly level to Dumbarton. Fair surface, lumpy into Dumbarton.                                                                   |
| 8 $\frac{1}{4}$                    | Dumbarton .....<br>(High Street.)         | 3 $\frac{1}{4}$                  | 15 $\frac{1}{4}$ | From High St. turn l. over R. Leven and bear r. when over. At fork turn l. (r., Route 107) ascending road for nearly a m., then undulating, and sharp descent to the level before Cardross. |
| 4 $\frac{3}{4}$                    | Cardross .....                            | 3 $\frac{1}{2}$                  |                  | Level for $\frac{1}{2}$ m. beyond the village then re-ascending slightly and falling to Colgrain with fine running thence towards Helensburgh.                                              |
| 2 $\frac{1}{4}$                    | Colgrain.....                             | 2 $\frac{1}{4}$                  |                  | An access road on l. leads to Craigendoran Sta. and pier (for Clyde steamers). Level along esplanade to Helensburgh pier. Good surface.                                                     |
| 1                                  | Craigendoran .....<br>(Railway Pier.)     | 1 $\frac{1}{4}$                  |                  | (Routes 269 and 271 joined here).                                                                                                                                                           |
|                                    | <b>HELENSBURGH</b> .....<br>(Pier.)       | 1                                | 23 $\frac{1}{2}$ |                                                                                                                                                                                             |

**GLASGOW TO HELENSBURGH.** *Reverse.*—Having shore on *r.* proceed along esplanade eastwards; road unmistakable to Dumbarton. Bear to *r.*, then *l.* over R. Leven into High St., in which again bear *r.* Reverse of Route 105 from Bowling.

## ALTERNATIVE ROUTE OUT OF GLASGOW.

From Royal Exchange proceed S. down Queen St. to Argyle St. and turn *r.*, following tramlines along Argyle St., Main St. (Anderston), and Dumbarton Rd., through Partick to Whiteinch tram terminus; thence straight on to Yoker. Route 105 is joined at the 5th m.s. on *r.* Distances from Royal Exchange, Whiteinch, 3 m.; Yoker 6 m. There is considerable traffic on this alternative route, but it is shorter.

## ROUTE 109. BALLOCH TO HELENSBURGH.

A somewhat hilly road but very picturesque. An easier, but longer, road from Balloch to Helensburgh is by Renton and Cardross (Routes 107 and 108).

| <i>Miles from<br/>Helensburgh.</i> | <i>Places on the<br/>Road.</i>          | <i>Mileage.</i>                    |                 | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|------------------------------------|-----------------------------------------|------------------------------------|-----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                    |                                         | <i>Inter-<br/>medi-<br/>ate.</i>   | <i>Total.</i>   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 8 $\frac{1}{4}$                    | BALLOCH<br>(Hotel.)                     | ...                                | ...             | From the hotel proceed westward passing over rly. and turn <i>r.</i> on meeting Dumbarton-Luss Rd. (d.p.) ascending a stiffish hill. The descent beyond is provided with a danger board owing to an awkward turn near foot, but may be ridden down with care; thence undulating. About 3 m. out turn <i>l.</i> over a hilly road, which dips to the Fruin Water and rises by Dumfin, joining Route 271 a short distance further, where turn <i>l.</i> An undulating road, chiefly on the rise, to within 1 $\frac{1}{2}$ m. of Helensburgh, where a steep and dangerous descent—which should be walked down—leads into the town. Fair surface on the whole.<br>(Routes 108 and 269 joined here). |
|                                    |                                         |                                    |                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

**BALLOCH TO HELENSBURGH.** *Reverse.*—From pier turn *l.* along Sinclair St. and ascend the steep hill out of the town. About 3 m. out turn *r.* over a loop road which leads to Dumbarton-Luss Rd., on joining which turn *r.* At d.p. before Balloch turn *l.* and cross rly. to hotel.

# ROUTE 110. CARLISLE TO EDINBURGH.

(Via Hawick).

The main road to Edinburgh, via Hawick. Route 111 should not be used as a through route to Hawick. An exceedingly interesting and picturesque route, traversing the "Scott country." Capital road to Hawick, very hilly to Selkirk but with good surface, and undulating with very good surface on the whole, to Edinburgh. See also Route 35, via Abington.

**CARLISLE TO EDINBURGH. Reverse.**—As in reverse of Route 31 to Newington Sta., keep to *L.* following telegraph wires at Good's Corner fork (d.p.) At branch-roads 2 m. beyond Gilmerton keep to *r.*, downhill, and in Eskbank take third road on *r.* Pass alongside Dalhousie viaduct and go under its last arch, to *r.*; follow telegraph wires to Galashiels. Turn to *r.* into the town crossing rly. near sta. and passing through Market Pl. bear to *L.* by Burgh Buildings; cross Tweed and Ettrick rivers and at fork before Selkirk keep to *L.*, (*b*) ascending through town. At Fleece Hotel turn *L.* into Market Pl., and to *r.* leaving by Tower St. In Hawick pass rly. sta. on *L.* and keep forward by Bridge St. round to *r.* into High St., leaving to *r.* by Buccleuch St. Avoid a road to *r.* at 1 $\frac{1}{2}$  m. out and keep to *L.* at the br. beyond. Keep again to *L.* 2 m. beyond Newmill, thence unmistakable to Langholm. Keep to *r.* over river nearly a m. beyond Langholm; cross river to *L.* about 4 m. further and re-cross river to *r.* at Canonbie. Turn to *L.* over rly. before Longtown, thence a straight-forward road to Carlisle.

(a) Abbotsford House may be visited from Abbotsford ferry, crossing the river by boat.

(b) Riders going up Yarrow by Route 114 (reverse) keep to *r.* at this fork and thus avoid the climb into Selkirk.

**ALTERNATIVE ROUTE TO HAWICK.**

From Canonbie follow Route 111 to Newcastleton and turn to *r.* at 1 $\frac{3}{4}$  m. further (Hermitage Br.). Gradually ascending road by Leahaugh to Whitterhope, with long steady climb of 2 $\frac{3}{4}$  m. to the summit at Limekilnedge. Fair surface at first; rougher near summit. Sharp descent by Roberts Linn Br., then easier to Shankend Sta., beyond which road again rises, is fairly level for nearly a m. and again falls sharply to Stobs Castle and Newmill, and going by the Slitrig Water into Hawick (High St.). Narrow road; rough loose surface from summit, improving towards Hawick. For the most part on dreary moorland, and no inns between Newcastleton and Hawick—20 $\frac{1}{2}$  m.

**LANGHOLM TO ESKDALEMUIR AND ETTRICKDALE.** Turn to *L.* over river out of Langholm, then ascending a steep bank for  $\frac{1}{2}$  m. and keeping to *L.* at fork, having a further steep ascent with long downhill run beyond. Short ascent before fork at which again keep *L.*, then undulating and ascending to Hopsrig; very undulating by Bentpath Inn ( $5\frac{3}{4}$  m.) to Billholm, and a long stiff climb for about 2 m. with steep fall towards Allangillfoot and thence easier to Eskdalemuir ( $13\frac{1}{2}$  m.). Turn to *r.* here, road becoming undulating, with upward tendency, to Garwaldwaterfoot,  $1\frac{1}{2}$  m. beyond which place the ascent over the watershed commences—a gradual rise with roughish, loose surface. Descent by the Tima Water to Ramseycleuch ( $25\frac{3}{4}$  m.) where, on meeting the Ettrick Rd., turn sharp *r.* to junction with Route 116 at Tushielaw Inn. Pleasant scenery up the Esk side and in Ettrickdale, otherwise a bleak, rather monotonous road.

## ROUTE 111.

### CARLISLE TO BONCHESTER-BRIDGE.

A difficult, disused road after Saughtree with very poor surface about the summit; dreary moorland after Riccarton. Riders coming into Scotland from Carlisle and going to Hawick and the north should avoid this road as a through route, taking Route 110 instead.

| Miles from<br>Bonchester-Br. | Places on the<br>Road.      | Mileage.                |        | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| 18 $\frac{3}{4}$             | Newcastleton .....          | 2 $\frac{1}{4}$         | 24     | Proceed through village, having rly. on <i>L.</i> ; road to <i>L.</i> at $1\frac{3}{4}$ m. out, via Limekilnedge to Hawick (see p. 114). Keep straight forward with gradual ascent to Castleton, and thence gently undulating for 4 m. At Riccarton the long rough ascent to the watershed commences, gradual at first, becoming steeper 1 m. beyond Saughtree Sta., with poor surface, loose and stony. Road dips to a br. and re-ascends towards Note-o'-the-Gate, just beyond which the hill-top is gained. The subsequent descent to Hyndlee is very steep and requires careful riding; gradual, undulating rise to Cleuchhead, just beyond which point Route 112 is joined on <i>r.</i> Steep descent to fork-roads where keep <i>L.</i> ( <i>r.</i> , see note) to Bonchester-Bridge. Rough surface from the summit but improving to road junction beyond Cleuchhead, then fair. The |

**CARLISLE TO BONCHESTER-BRIDGE.** *Reverse.*—Proceeding southwards from the br. keep to r. at top of hill, thence an unmistakable road to Canonbie, and as in reverse of Route 110 thence to Carlisle.

EDITOR'S NOTES.—(a) At fork, before reaching Bonchester-Bridge, keep to r. for Jedburgh. Capital downhill run for 2 m., then ascending steeply (about 1 in 13) towards Fodderlee and continuing to ascend for a m. beyond, with a long descent of over  $2\frac{1}{4}$  m. at foot of which turn L. with easy running into Jedburgh. From the fork near Bonchester-Bridge to Jedburgh.  $7\frac{3}{4}$  m. Fair surface.

(b) For the small hamlet of Hobkirk turn sharp L. when over Bonchester-Bridge and before crossing the second br. (spanning a small stream), going up the waterside having the river on L. Hobkirk consists of one or two cottages, a ch. and manse, and lies  $\frac{3}{4}$  m. S. of Bonchester-Bridge.

ROUTE 112. **CARTER BAR TO HAWICK.**

A poor, rough road to Southdean, then fairer surface, but very hilly to within  $1\frac{1}{4}$  m. of Hawick when it becomes good. The m.s.s. are a little at variance on this road; the actual boundary line is about  $\frac{1}{4}$  m. E. of the site of the old toll-bar.

**CARTER BAR TO HAWICK.** *Reverse.*—Leaving by N. end of High St., keep to *r.* passing under rly.; at d.p. 1¾ m. out, turn *r.* Descent to Bonchester-Bridge *dangerous*. At fork at top of next hill keep L.; turn *r.*, sharply, at Chesters—thence unmistakable to the Border.

**ROUTE 113. CARTER BAR TO JEDBURGH.**

This road is the latter portion of the route Newcastle-on-Tyne to Jedburgh, and is included under Route 405 in Vol. III. Though a hilly, undulating road, with variable surface, the hills are mostly in the rider's favour from Carter Bar. Fine scenery in the Jed valley.

| <i>Miles from Jedburgh.</i> | <i>Places on the Road.</i> | <i>Mileage.</i>       |               | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                                                                                                 |

**CARTER BAR TO JEDBURGH.** *Reverse.*—Turn *l.* from High St., crossing river on leaving the town and keep *l.* at branch-roads 1 $\frac{1}{2}$  m. out, passing Langlee on *r.* beyond; thence an unmistakable road to Carter Bar and the Border.

(a) The telegraph wires make a short cut down the Carter while the road zigzags. The wires, however, are visible all the way down and re-join at foot of the hill.

**ROUTE 114. MOFFAT TO SELKIRK.**

This road passes down the romantic Yarrow valley so famed in border ballad, song and story. Going at first over bleak moorland it descends to more pastoral scenes by "lone St. Mary's," and winds down Yarrow side through varied and charming scenery to Selkirk. Poor surface in parts to St. Mary's Loch, then good towards Selkirk.

| <i>Miles from Selkirk.</i> | <i>Places on the Road.</i> | <i>Mileage.</i>       |               | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| 34                         | <b>MOFFAT</b> .....        | ...                   | ...           | Leaving the town by S.E. end of High St., keep to <i>l.</i> where roads branch; ascending road for 1 m. then falling, with several curves, to branch road for Drumcrieff; keep forward, thence undulating. After crossing a stream the ascent of Craigieburn hill begins; this ascent is fairly steep and on a curve. Road falls for a short distance and becomes undulating with an upward trend to Capplegill. Surface fair to this point but becoming poorer over Birkhill towards St. Mary's Loch. The road now, in fact, becomes a typical moorland one and is loose and soft in parts. Steep ascent to the top of Birkhill. |
|                            | (High Street.)             |                       |               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

**MOFFAT TO SELKIRK. Reverse.**—Leaving Market Pl. by The Green and meeting telegraph posts at foot of hill out of the town, cross R. Ettrick and turn *l.* at branch-roads. At Coppercleuch bear *l.* and beyond Rodono Hotel keep forward, avoiding road to *l.*; thence unmistakable over Birkhill down towards Moffat, keeping to *r.* beyond Craigieburn Hill.

## ROUTE 115. MOFFAT TO PEEBLES.

Affording direct communication from Gordon Arms, between Yarrow and Tweedside, by the valley of the Newhall Burn. Roughish road over the moorland, improving near Traquair, and very good into Peebles. It was over this road that Wordsworth was led in 1814 by "The Ettrick Shepherd" when Yarrow was "visited."

|                        | PEEBLES .....            | 6 $\frac{1}{4}$         | 36               | Route 118 to Peebles.                                                                                                                    |
|                        | (Cross.) .....           |                         |                  |                                                                                                                                          |

**MOFFATT TO PEEBLES.** *Reverse.*—Reverse of Route 118 for 6 $\frac{1}{4}$  m., where turn sharp r., passing rly. sta. and crossing R. Tweed. Turn r. at  $\frac{1}{4}$  m. beyond the river and keep forward through Traquair, avoiding a road to r. at the ch., and going over the summit down to cross-roads at Gordon Arms Inn, where turn r., and by reverse of Route 114 to Moffat.

**EDITOR'S NOTE.**—An alternative route between Traquair and Peebles lies on the S. side of the Tweed. It is a hilly road, narrow, but of fair surface, and is about  $\frac{1}{4}$  m. shorter than that given above.

## ROUTE 116.

## HAWICK TO ST. MARY'S LOCH.

A wild hill-road for the most part with some very stiff ascents but being the only direct road from Hawick to St. Mary's Loch is of some little importance. The surface is mainly rough and bad, but the views to be obtained from the high points *en route* offer some compensation for the labour involved when riding over this road.

| Miles from<br>St. Mary's Loch. | Places on the<br>Road. | Mileage.                |        | General description of the Road.                                                                         |

**HAWICK TO ST. MARY'S LOCH. Reverse.**—Follow Route 114 to Gordon Arms Inn and there turn sharp *r.* crossing the Yarrow Water; at top of hill 3¼ m. further turn down to *L.* and on meeting a road at right angles at foot of this hill turn *r.* to Tushielaw Inn, where turn to *L.* over the Ettrick Water. At foot of the steep and dangerous Borthwickbrae turn *L.* going down the valley of the Borthwick Water and on meeting Route 110 at br. over R. Teviot turn again *L.* to Hawick going by Buccleuch St. into High St.

**EDITOR'S NOTES.**—(*a*) The road up Ettrickdale to *L.* from Tushielaw Inn is good as far as Ettrick Ch. (3½ m. from Tushielaw Inn), beyond which point it is fair for a few miles, then rapidly degenerates into a mere cart track over the hills to junction with Route 114 in the glen above Moffat. There is a rideable road, however, southwards from Ramseycleuch to Langholm, of which some account is given in a note to Route 110.

(*b*) There is a direct communication with St. Mary's Loch from the top of the long hill above Tushielaw. Turn *L.* at meeting with the road at right angles 2½ m. after Tushielaw (instead of to *r.* as for Gordon Arms), with stiffish climb to summit 1 m. further, followed by a very rough, loose, unrideable descent to Tibbie Shiels, beyond which Route 114 is met—along which road bear to *r.* for Rodono Hotel, on W. side of St. Mary's Loch. By this short cut Tibbie Shiels is only 7 m. from Tushielaw, and Rodono Hotel 1½ m. further, but this bit of road is not recommended to any but the most venturesome of riders.

## ROUTE 117. TUSHIELAW INN TO SELKIRK.

Delightful scenery all down the Ettrick valley, the road running by the river side throughout. A very undulating road, with downward tendency on the whole, and fairly good surface.

**TUSHIELAW INN TO SELKIRK. Reverse.**—Leaving Market Pl. by The Green keep down the hill and turn sharp *l.* at first cross-roads having river on *r.* Keep to *r.* at Oakwood Mill and over the river at Ettrick Bridge, thence an easily-followed road up Ettrickdale to Tushielaw Inn.

**EDITOR'S NOTE.**—The road from near Ettrick Bridge (Kirkhope) over the hill to Yarrow Ch. is a bad one, with a dangerously steep hill at either end, and is practically unrideable.

## ROUTE 118. SELKIRK TO EDINBURGH.

A good road throughout with excellent surface up Tweedside and very good, as a whole, to Edinburgh, with easy gradients to Leadburn. Beautiful scenery in the Tweed valley to Peebles and fine, open moorland views N. of that town. Milestones are measured to Edinburgh Cross-causeway from Peebles, and one or two are wrongly placed.

**PEEBLES TO ROMANNO BRIDGE. Reverse.**—Proceed down the valley of the Lyne Water crossing the stream to r. at Newlands Ch. and joining a road at right angles at Drochil Br. where turn l. following the Lyne Water and subsequently the Tweed to Peebles. Caution in old town of Peebles where street is steep and narrow. Cross Cuddy Br. into the new town (High St.).

**EDITOR'S NOTES.**—(*a*) Road in the Manor valley. This is a good road for some distance up the riverside and affords some delightful scenery, but the continuation over the hills towards St. Mary's Loch is rough and unrideable—in fact, a mere moor track. The cottage of the "Black Dwarf" (vide the Waverley Novel of that name) lies up this valley about 6 m. from Peebles. The Manor valley besides being famous for its trout fishing abounds in ancient forts and camps of considerable antiquarian interest.

(*b*) Road to Stobo, Broughton and Biggar. An undulating road to Stobo Sta., with long ascent for 2 m. beyond to Dreva, and a quick fall from that point, keeping to r. at branch-roads, with further rise and steep descent to the level before Broughton, where Route 31 is met. The continuation to Biggar is a fairly good, but very undulating road. This is the direct route. A more circuitous but easier route, avoiding the climb over Dreva hill, will be found by turning to l. at Stobo Sta., and crossing rly. and river, going over a variable surface at first, then greatly improving, through Drummelzier village, beyond which turn to r. (d.p.), having good surface; re-cross Tweed and join Route 31, turning r. towards Broughton on an excellent road. By the direct route by Dreva the distances from Peebles are: Stobo Ch., 5 $\frac{1}{2}$  m.; Stobo Sta., 6 $\frac{1}{2}$  m.; Dreva, 9 $\frac{1}{4}$  m.; Broughton, 11 $\frac{1}{4}$  m.; Biggar, 16 $\frac{1}{4}$  m. By the longer route, Drummelzier village, 9 $\frac{1}{4}$  m.; Broughton, 12 $\frac{1}{4}$  m.; Biggar, 17 $\frac{1}{4}$  m.

## ROUTE 120. PEEBLES TO LANARK.

Very easy road for 8 m. out of Peebles then very hilly towards Carnwath and undulating to Lanark. Interesting scenery up the Tweed and Lyne valleys, then monotonous. Good surface, on the whole, throughout.

| Miles from<br>Lanark. | Places on the<br>Road.       | Mileage.                |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                      |

**HAWICK TO KELSO. Reverse.**—Leaving Sq. at S.E. end and crossing Kelso Br. turn sharp *r.* at Maxwellheugh on ascent beyond; unmistakable road to Bonjedward where keep *r.* at fork. Bear *r.* over Rule Water beyond "Guide-post Cottage" pass straight through Denholm, having the green on *r.*, and keeping to *r.* beyond, then a straight-forward road into Hawick.

# ROUTE 122. JEDBURGH TO GALASHIELS.

Very good undulating road to Ancrum, then hilly to Newtown St. Boswells, and very steep by the Eildon Hills over to Melrose, and again undulating to Galashiels. The alternative road between Newtown St. Boswells and Galashiels—Route 131 to Leaderfoot, and 129 to Galashiels—is much easier, but not so direct. The road is an attractive one throughout, the views from Eildon being very fine. It is unnecessary here to sing the praises of that delightful district of which Melrose is the centre; all lovers of Scott know it practically by heart.

**JEDBURGH TO GALASHIELS.** *Reverse.*—Leaving Market Pl. cross rly. near sta., and turn *r.* on meeting road at right angles beyond. At  $2\frac{1}{2}$  m. further cross Tweed to *r.*, and turn *l.* when over towards Melrose. On entering Market Pl. bear *r.* and before rly. turn *l.*, having rly. on *r.* at first, then crossing it. Beware of dangerous descent to the open Bogle Burn. Turn sharp *r.* on the descent from Eildon, and pass under rly. before entering Newtown St. Boswells. Keep straight on a cross-road at St. Boswells Green and at Ancrum-Bridgend turn *l.* on meeting Route 121. Bear round to *r.* at Bonjedward, cross R. Jed near Jedburgh rly. sta., and bear *r.* when over, re-crossing river before entering the town.

**EDITOR'S NOTE.**—Dryburgh Abbey may be reached by turning *r.*  $\frac{3}{4}$  m. beyond St. Boswells Green, down a lane to the Tweed, crossed here by a suspension foot-bridge. Fee sixpence each person: apply at the lodge.

## ROUTE 123. HAWICK TO ANCRUM.

(Via Lilliesleaf).

A very undulating, typical "country road" with a number of awkwardly sharp turns and bends: surface very variable, loose and rather rough in parts but improving towards Ancrum. The attractive little village of Lilliesleaf is charmingly situated, and to the S.W. of the village lie the beautiful grounds of Riddell—"Ancient Riddell's fair domain."

| Miles from Ancrum. | Places on the Road.                      | Mileage.        |                 | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

**MELROSE TO SELKIRK. Reverse.**—Proceed as in Route 110 to Lindean sta., where turn to *r.* and keep to *r.* again beyond Abbotsford, cross rly. and bear *r.*, passing Hydropathic on *l.*, ascending into Melrose.

## ROUTE 125. GALASHIELS TO PEEBLES.

One of the most delightful runs in Scotland. The road is a capital one throughout and lies amid very attractive surroundings, following the Tweed valley for over 13 m.

| Miles from<br>Peebles. | Places on the<br>Road.                   | Mileage.                |        | General description of the Road.                                                                                                                                                                                                                                                                                                      |

|                        | PEEBLES .....<br>(High Street.)          | 3                       | 18½    |                                                                                                                                                                                                                                                                                                                                       |

**GALASHIELS TO PEEBLES.** *Reverse.*—Leaving High St. due eastwards and passing Hydro-pathic on *l.* an unmistakable road down Tweedside for  $13\frac{1}{4}$  m. where, at fork bear *l.* ascending under rly. Keep straight forward over cross-roads at Clovenfords to Galashiels, passing and re-passing the rly.

**EDITOR'S NOTE.**—Road up the Leithen Valley. This road, going due N. from Innerleithen is good for about 6 m. up the valley, then becomes loose and bad and degenerates into an unused moor-road. At  $3\frac{1}{4}$  m. from Innerleithen it bends round to *r.*, and after passing some outlying farms goes up a rugged valley descending beyond and again rising (summit at 1260 ft.) round a hill-shoulder, falling eventually towards junction with Route 110, surface improving somewhat, latterly. The views, ahead, from the higher parts of this road are exceptionally fine. Distance from end to end,  $15\frac{1}{2}$  m.

## ROUTE 126. KELSO TO SELKIRK.

A very good undulating road to St. Boswell's Green, and hilly over the summit to Kelso. On the whole this road is preferable in reverse direction, the gradients being then nearly all in the riders' favour. Dryburgh Abbey may be reached from St. Boswell's Green (see note to Route 122). The views on this route are magnificent.

|                        | <b>SELKIRK</b> .....    | $\frac{1}{2}$           | 19              | Selkirk. At Selkirk Old Toll turn sharp <i>r.</i> into      |
|                        | (Town Hall.)            |                         |                 | the town. Fair surface.                                     |

**KELSO TO SELKIRK.** *Reverse.*—Leave town by Tower St. and keep to *l.* at Selkirk Old Toll, thence a straight forward road to Kelso, avoiding all smaller branch and cross-roads, and turning to *l.* over Kelso Br. into the town.

## ROUTE 127. KIRK YETHOLM TO JEDBURGH.

Forms a connection with Route 437, Vol. III. A fairly good, hilly road to beyond Morebattle; some fine scenery on the Cheviotside. Kirk Yetholm was once celebrated as the abode of the Romany King and is still inhabited by the descendants of the Gipsies.

**KIRK YETHOLM TO JEDBURGH.** *Reverse.*—Route 122 to Bonjedward and Route 121 to Eckford Ch. where, at road junction, turn sharp *r.* to Morebattle, up the Kale valley. Bear to *l.* beyond village, then *r.*, and again to *l.*, crossing the Kale Water, and bearing to *r.* when over. Towards N.E. end of Town Yetholm turn to *r.*, passing ch. on *r.* and crossing br. to Kirk Yetholm.

**EDITOR'S NOTE.**—Before crossing the Kale Water (in the forward journey) a hilly road, but with fair surface, leaves on *r.* for Kelso (7 $\frac{1}{2}$  m.) by Cowdens and Huntershall; and to *l.* over the br. a road goes southwards to Hounam (4 m.) of a like nature to the Kelso branch. Fine hill scenery in the Kale valley.

## ROUTE 128. KIRK YETHOLM TO KELSO.

See summary to Route 127. A very hilly road with fair surface; fine views of the lower ground and vale of Tweed from the summit.

**KIRK YETHOLM TO KELSO.** *Reverse.*—Leave Square, descending to Kelso Br., at end of which keep up to L. and straight forward in Maxwellhaugh (r., Route 121; L. to Sprouston), and to r. at fork 2¼ m. from Kelso. At 2 m. beyond summit keep to L. and turn r. at road junction before Town Yetholm into that village, then to L. over br. to Kirk Yetholm.

**ROUTE 129. KELSO TO GALASHIELS.**

A hilly road, narrow in parts, with fairly good surface. The better road between Kelso and Melrose is by Route 126 to St. Boswell's Green and Route 131 to Leaderfoot, and at Melrose Br. by reverse of Route 122 to the town. The tower of Smailholm (*vide* Scott's "Eve of St. John") lies over to L. before county boundary.

|                                   | Galashiels .....               | 2 $\frac{3}{4}$                  | 16 $\frac{1}{2}$ |                                                                                                                                                                                                                                                                                        |

**KELSO TO GALASHIELS.** *Reverse.*—Reverse of Route 122 to Melrose Br., where at old toll-house at north end of br. keep straight on through Gattonside. Pass under rly. before Leaderfoot, where keep forward up stiff slope. In Smailholm bear round to r. and 4 $\frac{1}{4}$  m. further turn to r. towards Kelso.

**ROUTE 130. KELSO TO LAUDER.**

(Via Earlston.)

Hilly to Earlston, then very fine road with easy gradients to Lauder. The road on the opposite side of the river between Earlston and Lauder is hilly, but has a very fair surface.

|                               | (Town Hall.)                   |                                  |               |                                                                                                                                                                                                                                                                                                                                  |

**KELSO TO LAUDER.** *Reverse.*—Keep to r. beyond the village, cross stream, and bear to  $\angle$  at fork. Take middle road of the three before crossing the Leader Water, having river on r. to Earlston. Turn  $\angle$  into that town, having rly. on r. when leaving; pass under rly. and at cross-roads turn to r. At 2 m. beyond turn sharp  $\angle$  then sharp r.  $\frac{1}{4}$  m. further; reverse of Route 129 from Smailholm.

# ROUTE 131. NEWTOWN ST. BOSWELLS TO LAUDER.

Long undulations throughout, the stiffest rise being for  $\frac{1}{2}$  m. beyond Leaderfoot; the rest are easy gradients and the surface very good. Very picturesque surroundings at Tweedside and in the Leader Valley.

| Miles from<br>Lauder. | Places on the<br>Road. | Mileage.                |        | General description of the Road.                                                                                                                                                                                                                                                                                       |

|                       |                        | Inter-<br>medi-<br>ate. | Total. |                                                                                                                                                                                                                                                                                                                        |
| 11½                   | NEWTOWN ST. BOSWELLS   | ...                     | ...    | Pass under rly. near sta., having rly. then on r.; where roads divide keep to r. (L., Route 122) on a gradually ascending road for $\frac{1}{2}$ m., after which road descends a long hill, crossing over rly., towards Leaderfoot, before which the Tweed is crossed, and the rly. viaduct passed on L. Good surface. |
| 9½                    | Leaderfoot .....       | 2                       | 2      | Keep straight on over cross-roads (r. and L., Route 129) up a long ascent, stiffish at first, then easier, having rly. on L. and the Leader Water on r.                                                                                                                                                                |
| 9                     | Drygrange .....        | ½                       |        | Short level stretch, then descending; keep to r. at branch-roads (L., road to Lauder on W. side of valley; hilly, but with very fair surface). Pass under rly. and cross river to Earlston, keeping straight on, town lying on r. Capital surface.                                                                     |
| 7                     | Earlston .....         | 2                       | 4½     | Route 130 to Lauder.                                                                                                                                                                                                                                                                                                   |
|                       | LAUDER .....           | 7                       | 11½    |                                                                                                                                                                                                                                                                                                                        |

**NEWTOWN ST. BOSWELLS TO LAUDER. Reverse.**—Reverse of Route 130 to Earlston, where instead of entering the town to L. keep straight on and cross the river, and pass rly. Keep forward over cross-roads at Leaderfoot, thence unmistakable to Newtown St. Boswells.

# ROUTE 132. KELSO TO LAUDER.

(Via Gordon.)

A very hilly road but having good surface. The good views of the surrounding country obtainable from some of the higher points offer some compensation for the labours of hill climbing.

**KELSO TO LAUDER. Reverse.**—At  $\frac{1}{2}$  m. out turn sharp *L.* and cross the Leader Water; keep to *r.*, forward, at Whiteburn Inn and pass straight on at West Gordon (cross-roads) and at 2 m. further keep to *L.* On joining Route 133 at 2 m. beyond Nenthorn turn *r.* towards Kelso.

## ROUTE 133. KELSO TO GREENLAW.

(Via Stichill.)

A hilly, narrow cross-country road with indifferent surface; m.s.'s. irregular. At fork beyond Kelso, d.p. announces Greenlaw as 9 m. away, whereas, by the road detailed below, it is 8 m. M.s.'s. correct to Stichill; then they disappear. Some very fine views near Hume Castle.

**GREENLAW TO EARLSTON.** *Reverse.*—Leaving the town eastwards, turn to *r.* during ascent 1 $\frac{1}{4}$  m. out and keep forward over cross-roads; avoid a road to *L.* over  $\frac{1}{4}$  m. beyond, thence an easily-followed road to West Gordon. Pass over cross-roads in the village and keep to *L.* where roads branch, beyond; keep to *L.* after crossing the Eden Water to East Gordon farm, nearly  $\frac{3}{4}$  m. beyond which keep again to *L.* At foot of hill beyond Greenlaw Rly. Sta. turn sharp *r.* over br. into the town.

**ROUTE 135. COLDSTREAM TO LAUDER.**

The direct road; fairly easy gradients and good surface. Very picturesque about Coldstream, and some good views of pastoral Berwickshire from the higher ground.

|                               |                                |                                  |                  | falls and re-ascends to Houndslow, with short                    |
|                               |                                |                                  |                  | quick descent from that point, an undulating                     |
|                               |                                |                                  |                  | rise for over a m., and a sharp downhill run                     |
|                               |                                |                                  |                  | towards Whiteburn Inn, where bear <i>r.</i> on                   |
|                               |                                |                                  |                  | meeting Route 132. Good road in summer and                       |
|                               |                                |                                  |                  | autumn; apt to be roughish in the spring.                        |
| 4 $\frac{1}{2}$               | Whiteburn Inn .....            | 2 $\frac{1}{2}$                  | 17 $\frac{3}{4}$ | Route 132 to Lauder.                                             |
|                               | LAUDER .....                   | 4 $\frac{1}{2}$                  | 22 $\frac{1}{2}$ |                                                                  |

**COLDSTREAM TO GREENLAW.** *Reverse.*—Reverse of Route 132 to Whiteburn Inn, where turn *L.* and keep to *r.* at fork beyond. At E. end of Greenlaw bear to *r.*, passing rly. level crossing, and turn *r.* about 2 m. out; keep forward at Orange Lane, avoiding a road to *L.* and then to *r.*; thence unmistakable to Coldstream, turning to *L.* at Fireburnmill.

**ROUTE 136. LAUDER TO EDINBURGH.**

A good, broad main road throughout and one of the old trunk roads of the coaching days. The views from Soutra are very fine, the distant hills and dales of the Lothians lying below spread out as in a map. From Soutra summit the gradients are nearly all in the rider's favour and the surface is hard and good.

| 11 $\frac{3}{4}$        | Pathhead .....           | ↓                       | 1 $\frac{1}{4}$  | 19 $\frac{3}{4}$ On entering High St. turn <i>r.</i> and to <i>l.</i> in a few yds., leaving by Edinburgh Rd. down Echo Bank to br., which cross, and keep uphill to <i>l.</i> , road bending round to <i>r.</i> near the top. Fairly level by entrance to Dalkeith Palace, where keep to <i>r.</i> ( <i>l.</i> , see note) on a gently undulating road with upward trend, passing through an avenue, and under rly. br., to Danderhall cottages, beyond which there is an easy rise. Beyond the entrance-gate to Edmondston House, on <i>r.</i> , the road descends, gradually at first, then steeply, to the level near Little France, where the Burdiehouse Burn is crossed. Slight uphill to Craigmillar Wood ( <i>r.</i> to the castle), followed by a short level stretch and descent to Bridgend, then again level to Cameron Toll, where rly. is passed under. Good surface. |

LAUDER TO EDINBURGH. *Reverse.*—Leaving General Post Office proceed southwards by N. and S. Bridges, Nicolson St., and Clerk St. At over a m. turn to *l.* up E.

Preston St. to clock-tower at top, and there turn *r.* down Dalkeith Rd. Keep straight on under rly. br. at Cameron Toll, bearing slightly *l.* when passing under the br. Thence an easily followed road to the entrance to Dalkeith Palace, where keep *l.*, going downhill and crossing br. to *r.*, then bearing *l.* up into Dalkeith. In High St. bear *r.* and in a few yds. to *l.*, leaving by South St. and descending to New Mills Br. An unmistakable road over Soutra Hill to Carfraemill Inn, where keep to *r.* for Lauder.

EDITOR'S NOTES.—(a) At N. end of Lauder a road leaves to *l.* for Stow on Route 110 going over Lauder Common. The uphill climb is incessant for nearly 3 m. and very stiff (1 in 15) towards the top. From the summit down to Stow the gradient is considerable for  $1\frac{1}{2}$  m. and then becomes precipitously steep (1 in 9), winding down the hillside to the village; surface indifferent. This is the only direct communication. Distance,  $5\frac{1}{4}$  m.

(b) An alternative road into Edinburgh is that going to *l.* at the Dalkeith Palace gate beyond the top of the hill after Dalkeith (forward journey). This loop-road joins Route 110 in  $\frac{1}{4}$  m., where (d.p.) bear *r.*, towards the city via Gilmerton, following Route 110. The route detailed above, via Little France, is the Old Dalkeith Rd., and this alternative via Gilmerton, etc., is the New.

## ROUTE 137. COLDSTREAM TO KELSO.

A very good main road, with easy undulations, and passing through some charming riverside scenery.

| Miles from Kelso. | Places on the Road.                | Mileage.       |                | General description of the Road.                                                                                                                                                                                                                                                                                                                                        |

|                   | KELSO .....<br>(Square.)           | $1\frac{3}{4}$ | $8\frac{3}{4}$ |                                                                                                                                                                                                                                                                                                                                                                         |

**COLDSTREAM TO KELSO. Reverse.**—Leave S.E. corner of square by Wood Market and pass eastwards along S. side of Shedden Park; keep to *r.* at fork  $\frac{1}{2}$  m. beyond Birgham, thence unmistakable.

## ROUTE 138. COLDSTREAM TO DUNS.

(Via Swinton Mill.)

This is the more direct road between Coldstream and Duns, but Route 139 is to some extent preferable owing to its easier gradients. Road surface very much the same in either route.

**COLDSTREAM TO DUNS. Reverse.**—Proceed southwards by Murray St., keeping to r. at first fork and on past rly. sta. At Cheeklaw Old Toll, turn to r., and at Nisbet Roads to l. At Nisbet Hill keep to l. downhill to the Blackadder 'Br. At Mount Pleasant turn to r.; and to l. ½ m. further. At fork beyond Ryslaw smithy keep to r., and straight on past cross-roads and at Swinton Mill.

**ROUTE 139. COLDSTREAM TO DUNS.**

(Via Swinton.)

This road though 2 m. longer than Route 138 is not so hilly, and has rather better surface, being therefore preferable for cycling. Some very fine pastoral scenery.

| 6                           | Swinton . . . . .<br>(Centre of village.)  | 1                                | 6 $\frac{1}{2}$  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 5 $\frac{1}{2}$             | Crowfootbank . . . . .                     | $\frac{3}{4}$                    |                  | Turn <i>l.</i> on entering the village and sharp <i>r.</i> at its W. end; cross the Leet Br., ascending the long gradual rise past Crowfootbank Farm. Just beyond here the road bends to <i>l.</i> then to <i>r.</i> ; these two bends being repeated $\frac{3}{4}$ m. beyond and again over $\frac{1}{4}$ m. further. Ascend a short hill, followed by a short descent, then fairly level to Mount Pleasant Farm (d.p.), where keep straight on. Surface good. |
| 3 $\frac{1}{2}$             | Mount Pleasant . . . . .<br>(Cross-roads.) | 2                                | 9                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|                             | DUNS . . . . .                             | 3 $\frac{1}{2}$                  | 12 $\frac{1}{2}$ | Route 138 to Duns.                                                                                                                                                                                                                                                                                                                                                                                                                                              |

**COLDSTREAM TO DUNS (VIA SWINTON).** *Reverse.*—Reverse of Route 138 to Mount Pleasant, where proceed straight on; turn sharp *l.* on entering Swinton and to *r.* on leaving. At  $\frac{3}{4}$  m. further turn *r.* and again to *r.* past Simprim Farm and to *l.* a few yds. further, downhill; thence an easily-followed road to Coldstream.

**NORHAM TO DUNS.**—Leave village at S.W. end and turn sharp *r.* at  $\frac{1}{4}$  m. out and cross the Tweed into Scotland. At cross-roads keep forward (*r.* to Ladykirk and Horndean—an undulating road; fair surface), rising to Greenside Cottages, where keep straight on; thence an undulating road to junction with Route 139 before Swinton. Fairly good surface. Distances, Swinton, 4 m.; Duns, 10 m.

**ROUTE 140.****BERWICK TO KELSO.**

An easily undulating road throughout, with good surface; m.s.s. very variable. An alternative road will be found by following the road by Velvethall Rly. Sta. on the English side of the border (Route 439 (Vol. III.) reverse) to Coldstream; thence by Route 137 to Kelso. The distance is almost exactly alike by either road, the scenery, however, on the alternative route is very attractive.

**BERWICK TO KELSO. Reverse.**—Leave by Edenside Rd. and Pipe Well Brae and keep forward at Ednam cross-roads. At Orange Lane turn *L.* then *r.* and keep forward at Swinton Mill cross-roads. At E. end of Swinton, road bends to *L.* and then *r.*, passing through centre of village; keep straight on out of Swinton, and beyond West Fishwick keep to *L.* where road forks (before which avoid all branch roads on *L.*). Sharp turn to *L.* then to *r.* before Paxton South Mains; cross the Whiteadder Water, thence an easily-followed road to Berwick.

# ROUTE 141. BERWICK TO DUNS.

(Via Chirnside.)

A hilly road out of Berwick and before Duns, otherwise easy and with a fairly good surface throughout. This road is, on the whole, rather preferable than Route 142.

| 15 $\frac{1}{4}$    | Berwick .....            | ...                     | ...              | Leave by Scotchgate, pass over rly. near sta. and keep to <i>l.</i> at fork and to <i>r.</i> at branch roads $\frac{1}{2}$ m. further, with long ascent out of the town. Top of hill at 2 $\frac{1}{2}$ m. from Berwick, then descending, followed by rise and fall to level before Mordington Ch., becoming an easily undulating road by Foulden and Edington towards Chirnside. Good surface from top of hill out of Berwick, before which it is rather lumpy.                                                                                                                                                                                    |

(County Hall.)

**DUNS TO GREENLAW.** *Reverse.*—Leave northwards from centre of town at right-angles to High St., keeping County Hall on *r.* At first fork keep to *r.* and at second, to *l.* On leaving Polwarth bear to *l.* and turn to *l.* near Gavinton to Duns.

## ROUTE 144. DUNS TO LAUDER.

Surface very fair considering the exposed nature of a greater part of this road before Westruther, beyond which village there is a decided improvement. This would prove a stiffish route to ride in the face of a strong west wind.

## ROUTE 145. BERWICK TO EDINBURGH.

An excellent main road throughout, the first half, as far as Dunbar, being particularly fine, having, with one exception, easy gradients and a perfect surface. After Dunbar the road is not quite so good to Beltonford, but greatly improves towards East Linton and is very good to Haddington. In this town the paving is at present abominable. The road continues to be good to Gladsmuir, but deteriorates through Tranent and is rough and lumpy on approaching Levenhall; thence into Edinburgh it is chiefly paved, but having a strip of macadam at the sides for a greater part of the way. Charming and varied scenery to Haddington and picturesque at parts on the coast to Portobello. M.s.s. very variable.

| Miles from<br>Edinburgh | Places on the<br>Road. | Mileage.                |        | General description of the Road.                          |

**BERWICK TO EDINBURGH.** *Reverse.*—Leave General Post Office facing Calton Hill and Nelson Monument and following tramlines by Piershill and Portobello to Joppa, where keep forward along the coast to Fisherrow, before which, after crossing rly. lines near harbour, bear to *L.* into the town. From High St. bear to *r.* into Bridge St. and cross R. Esk, then bearing *L.* into Musselburgh. Keep forward, having links on *L.*, to Levenhall, where turn *r.* uphill, and keep to *L.* at fork and straight on at branch roads over rly. br. Bear slightly *L.* then *r.* in Tranent, passing small fountain on *L.*, thence unmistakable to Haddington. Bear to *r.* at Town Hall into High St. and turn *L.* beyond the George Hotel, going forward through a narrow street to old toll-house, where turn sharp *r.* [Or, at Haddington Town Hall keep to *L.* by Market St. and turn *L.* when meeting narrow street at right angles beyond, then forward to toll-house.] At foot of hill before East Linton there is a sharp, dangerous turn to *L.* under rly., then *r.* to br. where river is crossed. Keep to *L.* at fork just beyond Beltonford (*r.* if going direct to Broxburn, see note) and turn to *r.* in Dunbar High St., passing George Hotel on *L.* Easily followed road to beyond Cockburnspath, where at top of hill keep to *L.*; dangerous descent to Tower Br.; keep to *r.* on the ascent beyond. A straightforward road to Ayton, beyond which keep to *L.* at road junction and to *r.* at fork about  $\frac{1}{2}$  m. further; thence unmistakable to Berwick.

**EDITOR'S NOTES.**—(a) At Broxburn a road leaves on *L.*, rejoining the main road at Beltonford and thus avoiding Dunbar. This "direct cut" is undulating and possesses a very fair surface as a rule, but is liable to change at certain seasons, the road being then only fair. Distance, Broxburn to Beltonford,  $3\frac{1}{4}$  m.

(b) An alternative route into Edinburgh, entering the city on the S. side, may be obtained by turning

sharp  $\angle$  just beyond the level rly.-crossing at Fisherrow Harbour, and ascending between two high walls towards New Hailes rly. sta., beyond which a rly. br. is passed under and the village of New Craighall entered. On leaving the village another rly. br. is passed under, the road rising gradually to Niddrie coal pit, where it bends to  $r$ . (sharp turn) and descends to the cross-roads, where keep forward, passing entrance to Niddry House on  $\angle$  and rising slightly to Niddry Mains. Keep straight on at cross-roads beyond ( $r$ : Route 161;  $\angle$  to Craigmillar Castle), pass over Suburban Rly., after which the old mansion house of Peffermill is passed on  $r$ . (said to be that sketched by Scott in "Heart of Midlothian" as the home of the Laird of Dumbiedykes), and the road is easy to Cameron Toll, where Route 136 is met; turn  $r$ . and follow that route into the city, or, after turning  $r$ . at the lamp in centre of road at the toll, turn sharp  $\angle$  a few yards beyond, go under rly. br., and ascend to Mayfield toll, where Route 31 is met, turning  $r$ . into Newington and entering city as on page 39. This alternative route is a much pleasanter way of entering Edinburgh than by Piershill; the road is a picturesque one, quiet, and of good surface. Distance from Fisherrow Harbour to Cameron Toll, 4 m.

(c) Where road forks beyond Magdalene Br. a second alternative road into Edinburgh may be followed by keeping to  $\angle$  up the steady ascent between high banks, from top of which hill road is level by Portobello Cemetery (on  $\angle$ ) and Easter Duddingston and some of the upper houses of Joppa. Keep straight forward over rly., passing Duddingston Mains on  $r$ . and the "Twelve Apostles" on  $\angle$  and passing over cross-roads  $\frac{1}{2}$  m. beyond which road turns  $r$ . at gate of Duddingston policies, descends to a br., and rises to second cross-roads, where turn sharp  $\angle$  (straight on, Route 161), ascending gradually to Duddingston village, where at fork just beyond bear  $r$ ., passing Duddingston Ch. on  $\angle$  and descending a short sharp hill to entrance to Queen's Park. The gates at the foot of this hill are closed at dusk and the hill is therefore *dangerous* at night. Enter the park (very fast riding not allowed), having the beautiful Duddingston Loch below on  $\angle$ , ascend the Windy Gowl (steep, rough) and pass Sampson's Ribs (on  $r$ .)  $\frac{1}{2}$  m. beyond. Bear to  $\angle$  at gate-keeper's house, passing through the gates and ascending to junction with Route 136 at Parkside Works, where bear  $r$ . and follow that route into the city. This second alternative route is even more interesting and picturesque than that in note b, but is more hilly. Distance, Magdalene Br. to Parkside Works, 4 m.

(d) By turning  $\angle$  here up Brighton Pl. and passing under rly. br. the alternative route into Edinburgh described in note c is met at the cross-roads (1 m. from Portobello High St.), where keep straight on. Easily ascending road; good surface.

(e) Road ahead at branch roads here leads into Leith, direct. It is a very lumpy, roughish road and has little or nothing to recommend it, save its shortness.

## ROUTE 146. BERWICK TO ST. ABB'S.

A very undulating road with fairly good surface throughout, and passing through some picturesque scenery at Eyemouth, and on approaching St. Abb's, where the views of the cliff scenery up to St. Abb's Head are remarkably fine. Fast Castle (Wolf's Craig of the "Bride of Lanimermoor") lies on the coast beyond St. Abb's Head.

| Miles from<br>St. Abb's. | Places on the<br>Road. | Mileage.                |                 | General description of the Road.                                                                                                                                                                                                                                                        |

Fair surface. |
|                          | ST. ABB'S .....                               | 1 $\frac{1}{4}$         | 12 $\frac{3}{4}$ |                                                                                                                                                                                    |

**BERWICK TO ST. ABB'S. Reverse.**—Leave by road ascending from the village towards Coldingham, before which place bear *r.* and keep to *l.* in village and again *l.* after crossing small stream on leaving. Opposite Eyemouth Sta. turn to *r.* and to *l.*  $\frac{1}{4}$  m. further; keep to *l.* at fork and join Route 145 beyond Burnmouth Sta., thence by reverse of that route to Berwick.

**ROUTE 147. EYEMOUTH TO DUNS.**

A hilly cross-country route with fairly good surface on the whole. There is an alternative road on the other side of the Eye Water between Eyemouth and Ayton, running by reverse of Route 146 from Eyemouth and joining Route 145 about  $\frac{1}{4}$  m. before the branch-roads S. of Ayton. This is also a fairly good road and the distance is practically the same.

| Miles from<br>Duns. | Places on the<br>Road.                  | Mileage.                |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                   |

|                     | DUNS .....                              | 5 $\frac{1}{4}$         | 13 $\frac{3}{4}$ | Route 141 to Duns.                                                                                                                                                                                                                                                                                                                                                                                                 |

**EYEMOUTH TO DUNS. Reverse.**—Reverse of Route 141 to road junction at W. end of Chirnside. Keep forward, uphill, into village and pass straight through. At road junction just before Ayton turn sharp *l.*, cross Eye Water, and at cross-roads in village turn *r.*, with an easily-followed road down to Eyemouth.

# ROUTE 148. DUNBAR TO TRANENT.

(Via Gifford.)

This route may be said to lie entirely in the bye-ways of East Lothian, and its characteristics are—a fairly good surface throughout, short stiff hills, many twists and turns, and a delightful variety of pastoral scenery, with the prominent Traprain Law and the deep woods beyond Gifford to fill in the picture. The main road between Dunbar and Tranent is detailed in Route 145.

| Miles from Tranent. | Places on the Road.             | Mileage.        |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| 5 $\frac{3}{4}$     | East Salton .....               | 1 $\frac{3}{4}$ | 17 $\frac{1}{4}$ | Keep straight on, descending past cross-roads and Salton Hall farm to the R. Tyne, turning sharp r. over br. and going uphill to the cross-roads. Easy running to branch-roads, where keep r., passing the rly. and Pencaitland coalpits, to junction with a cross-road where turn L., then r. just beyond, with easy running to road junction and descent into Tranent, where Route 145 is joined. Fairly good surface.                                                                                                                                                                                                                                                                     |

**DUNBAR TO TRANENT (VIA GIFFORD).** *Reverse.*—Towards E. end of the town bear to *r.* at fork and keep to *l.* at next fork, then again to *r.* at fork on meeting a cross-road  $1\frac{1}{2}$  m. from Tranent. After passing rly. bear *l.* at branch-roads and keep forward over cross-roads, cross R. Tyne, ascending to East Salton, towards the head of which village turn sharp *l.* Bear to *l.*  $\frac{1}{2}$  m. before Gifford to that village, in which keep again to *l.*, passing ch. on *r.* At fork  $1\frac{1}{2}$  m. out keep to *r.*, with turns to *r.* and *l.* nearly  $\frac{3}{4}$  m. further. Keep forward over cross-road and at Luggate turn sharp *r.* downhill. Bear to *l.* beyond the ascent from the Whittingham Water and pass through Stenton, turning to *r.* then bearing to *l.*  $\frac{1}{2}$  m. beyond the village. At Pitcox bear to *l.*, thence unmistakable to West Barns, passing over rly. before that village. On meeting main road turn *r.* and follow reverse of Route 145 to Dunbar.

**EDITOR'S NOTE.**—The Gifford—Haddington Road is very hilly but has a good surface. Distance,  $4\frac{1}{2}$  m.

(a) The "G" in Gifford is pronounced hard, as in "give."

## ROUTE 149. DUNBAR TO NORTH BERWICK.

A very picturesque road passing through some of the most varied scenery in East Lothian, embracing in its course the quaint and ancient villages of Tynninghame and Whitekirk, the deep woods of Binning, the open coast land and sea-scapes near Canty Bay, and the Conical hill, or "law," before North Berwick. The road is an undulating one with a variable surface, but affords good riding as a rule. The m.s.'s. follow the more direct road after Whitekirk mentioned in the note below.

|                                  | (Town Hall.)                        |                                  |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

**DUNBAR TO NORTH BERWICK.** *Reverse.*—Leaving High St. eastward turn to *r.*, then *l.*, road bearing round to *r.* ascending out of the town. At  $\frac{3}{4}$  m. out turn sharp *l.*, and

at nearly  $\frac{1}{2}$  m. further to *r.*, and *l.* at the bends. At Castleton farm turn *r.*, and to *l.*  $\frac{1}{2}$  m. further on, just beyond which there is a turn to *r.* at Auldham. Bear to *r.* at New Mains to Whitekirk, where, opposite the ch., turn to *l.*, road bearing to *r.* in Binning Woods, thence a straight run to junction with Route 145, where turn sharp *l.* and follow reverse of that route to Dunbar.

EDITOR'S NOTES.—(a) The road to *l.* through Whitekirk village is hilly, and of inferior surface to that described above. There is a steep and dangerous descent before North Berwick. It is, however,  $\frac{1}{4}$  m. shorter than the easier road by Canty Bay.

(b) By turning sharp *r.* beyond Tynninghame village a run through the very beautiful policies of Tynninghame House may be enjoyed, the road ending in the woods on the N.W. shore of Belhaven Bay, across the shallow waters of which a fine view of the rocky coast near Dunbar is to be obtained.

(c) Tantallon Castle (described at the end of Canto V. of Scott's "Marmion") may be visited by passing through the gate into a grass field at Castleton farm.

(d) Boats, or steam launch, may be obtained at Canty Bay hamlet (down on the beach below the road) for visiting the Bass Rock, on which a landing may be effected in calm weather. The charge is ten shillings for a party of eight or under, and two shillings for each additional person.

## ROUTE 150.

### EDINBURGH TO NORTH BERWICK.

Beyond Cockenzie this is one of the best coast runs in Scotland: the seascapes are very fine, and the low-lying ground by the shore, covered with a luxuriant undergrowth, the open grassy golf links of Luffness, and the quaint sleepy villages of Aberlady, Gullane, and Dirleton are all typical of East Lothian, so far-famed for its productive fields. The portion of the route between Levenhall and Prestonpans is at present (1897) in a wretchedly rough and lumpy condition.

**EDINBURGH TO NORTH BERWICK.** *Reverse.*—Leave High St. westwards, bearing to *r.*, and pass St. Baldred's Episcopal Ch. on *r.* near sta. Beyond Dirleton keep to *r.* at fork and bear to *r.* after crossing a small stream beyond Gullane links, passing entrance to Luffness House on *l.*, and going round coast of Aberlady Bay to the village, where turn sharp *l.*, then *r.*, passing the ch. on *r.* when leaving. Easily followed road by the coast to Levenhall; thence into Edinburgh by Route 145.

**ROUTE 151.****LONGNIDDRY TO NORTH BERWICK.**

(Via Drem.)

An easy road with gentle undulations and fairly good but variable surface. It passes through some of the famous farming ground of East Lothian, and lies amid pleasant, though quiet surroundings.

| 2 $\frac{1}{2}$          | Dirleton.....                        | $\frac{1}{2}$           | 7 $\frac{3}{4}$  |                                                                                                                                                   |
|                          | NORTH BERWICK .....                  | 2 $\frac{1}{2}$         | 10 $\frac{1}{4}$ |                                                                                                                                                   |

**LONGNIDDY TO NORTH BERWICK. Reverse.**—Leave village westwards and keep to l. at fork  $\frac{1}{2}$  m. out. At Drem bear to r. and pass over rly.; keep to l. at Mangoswells and forward over the cross-roads at Ballincrieff.

## ROUTE 152.

## HADDINGTON TO NORTH BERWICK.

(Via Drem.)

The hills on this road between Haddington and junction with Route 151 are long and very steep, but the view from the summit of Garleton Hill is extensive and is some recompense for the climb. Route 153 is not quite so steep and forms an alternative road, Route 151 being met at Ballincrieff cross-roads. See, also, note below.

| Miles from<br>N. Berwick | Places on the<br>Road.           | Mileage.                |        | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

**HADDINGTON TO NORTH BERWICK.** *Reverse.*—Reverse of Route 151 to Drem,  $\frac{1}{2}$  m. beyond which place turn sharp *l.* uphill and cross the summit of Garleton Hill, keeping to *r.* at fork near the top. Very steep descent towards Haddington—*dangerous*.

**EDITOR'S NOTE.**—A third road from Haddington to North Berwick goes across county passing to the E. of the village of Athelstaneford. It leaves Route 145 at d.p.  $\frac{1}{4}$  m. E. of Abbey Mains, is very hilly, narrow, and of indifferent surface. The bends and turns are somewhat confusing, though North Berwick Law makes a good landmark to travel towards. The descent into North Berwick, by the western base of the law, is steep. Distance, 9 $\frac{1}{4}$  m.

## ROUTE 153. HADDINGTON TO ABERLADY.

A very hilly road to Ballincreeff, then easy. Surface fairly good on the whole, though generally loose on the long hill out of Haddington. This is the only direct road.

| Miles from<br>Aberlady. | Places on the<br>Road.          | Mileage.                |                 | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                        |

**HADDINGTON TO DALKEITH. Reverse.**—Reverse of Route 136 from Dalkeith for 3 $\frac{3}{4}$  m., when (at d.p.) turn sharp *L* through wooded land, having the grounds of Oxenford Castle on *r.* At park gate, after the ascent from the Tyne Br., turn *L* and over a m. further on keep to *r.*, thence a straightforward road to Haddington.

## ROUTE 155. MUSSELBURGH TO ABERLADY.

(Via Longniddry.)

This is an alternative road to a portion of Route 150, but though it avoids the narrow streets of Prestonpans and the poor surface at Morrison's Haven, yet it is not in itself what one would term an attractive road, and the surface is at times very indifferent. The two level crossings on the North British main line are apt to prove hindrances owing to the constant rly. traffic.

MUSSELBURGH TO ABERLADY (VIA LONGNIDDY). *Reverse.*—Reverse of Route 150 from Aberlady for 2 $\frac{1}{2}$  m., when bear *L.*, leaving the coast road. Bear to *r.* at Longniddry sta.; road thence crosses and re-crosses rly. towards Preston. Bear to *r.* at sta. before village, and to *L.* on meeting another road beyond. Keep forward westwards from Preston, cross a single rly. line on the level, bear round to *L.*, and join Route 145 at branch-roads  $\frac{1}{2}$  m. further, where turn *r.* and follow that route to Musselburgh.

## ROUTE 156.

## HERIOT STATION TO MUSSELBURGH.

(Via Pathhead.)

A very variable cross-country route, with roughish surface between Route 110 and Tynehead Sta., and between Route 136 and Inveresk Sta.; the other portions have very good surface. The gradients are mostly downward all the way.

Turn sharp r., pass rly., and keep to L., with descent by Carberry Mains to cross-roads, where keep forward on an easy, undulating, but rather rough road, crossing rly. at Inveresk Sta. and entering the village. At branch-roads keep to r., descending into Musselburgh. Good surface to Fordel Mains, then indifferent and poor in parts towards Inveresk Sta., but affording fair riding as a whole. Rough paving on entering Musselburgh. |

**HERIOT STATION TO MUSSELBURGH. Reverse.**—Turn r. from Town Hall by Wonder St. and Newbigging. At  $\frac{1}{2}$  m. from Town Hall bear L. into Inveresk and keep to r. at fork in that village, crossing rly. beyond. Pass over cross-roads and at Crossgatehall Toll turn r. over rly. then sharp L., thence avoiding all branch-roads. At  $1\frac{1}{2}$  m. beyond the toll turn sharp r., then L. on gaining the main road. Reverse of Route 136 for 1 m. beyond the lime works, where, at road junction, turn sharp r. to Tynehead Sta. Cross rly. at the sta. and follow the moorland road up to junction with Route 110, where turn L., following main road to Heriot Sta.

## ROUTE 157. DALKEITH TO MUSSELBURGH.

(Via "Duke's Dykes.")

This is shorter than Route 158 and is less hilly, but the paving when leaving Dalkeith and entering Musselburgh is bad. It is a very well sheltered road when ridden in the reverse way in a strong westerly wind, but being overhung for a greater part of the distance by trees takes some time to dry after heavy rain.

**DALKEITH TO MUSSELBURGH.** *Reverse.*—Reverse of Route 156 to Inveresk Sta., and at cross-roads beyond turn sharp *r.* Road easily followed by the wall of Dalkeith Palace to Dalkeith.

**EDITOR'S NOTE.**—The road straight on at cross-roads leads to the point where Route 155 leaves Route 145 at the branch-roads  $\frac{3}{4}$  m. above Levenhall. It is an easy, undulating stretch, with fairly good surface, and about midway it passes, on *l.*, the ground on which the Battle of Pinkie was fought in 1547.

## ROUTE 158. DALKEITH TO MUSSELBURGH.

(Via Millerhill.)

This, though not so direct a road, is a rather pleasanter way of approaching Musselburgh than by Route 157. The gradients, with the exception of the hill out of Dalkeith and the climb beyond, are easy, and the surface, though rather changeable, is very fair as a rule.

| $\frac{1}{4}$              | Musselburgh Bridge ...                   | $\frac{1}{4}$           |                | Beyond the crossing keep forward, over rather a rough bit of road, and cross the river by second br., bearing round to <i>L.</i> towards the Town Hall on <i>L.</i> Fairly good surface; good setts in Musselburgh. |
|                            | <b>MUSSELBURGH</b> .....<br>(Town Hall.) | $\frac{1}{4}$           | $4\frac{3}{4}$ |                                                                                                                                                                                                                     |

**DALKEITH TO MUSSELBURGH (VIA MILLERHILL).** *Reverse.*—Leaving Town Hall on *r.* proceed along High St. and cross br. to *r.*, turning sharp *L.* when over, having river on *L.* Pass over level crossing (gates) and bear round to *L.* beyond. At Wester Millerhill avoid a road to *r.* and cross rly. On meeting main road (Route 136) turn to *L.* along that route to Dalkeith.

**EDITOR'S NOTE.**—An alternative, but rather more circuitous, way out of Dalkeith may be followed by keeping due S.W. out of High St., passing rly. sta. on *r.*, and going over a good, broad, easy road to Eskbank, where turn sharp *r.*, by Route 110, over rly., down to the br., and up to the branch-roads beyond. Bear to *r.*, through woods, to junction with the main road at the entrance to Dalkeith Palace; here turn *L.*, and *r.* at fork beyond. Thence proceed as detailed above. This alternative road will best suit those who desire to reach Musselburgh direct from Route 110 from the south, as it will enable them to avoid Dalkeith altogether, unless they wish to reach the coast by Route 157, when, of course, Dalkeith must be passed through.

# ROUTE 159. DALKEITH TO EDINBURGH.

(Via Lasswade.)

A hilly road for the most part, and especially steep at Lasswade. The surface is very variable, and is in parts good, and in other parts only indifferent. On the whole, however, it affords very fair riding.

**DALKEITH TO EDINBURGH (VIA LASSWADE).** *Reverse.*—Reverse of Route 110 to Gilmerton. Beyond the village but before crossing rly. turn sharp *r.*, passing sta. on *L.* At end of wooded lane turn to *L.* under rly. br. and keep forward. Road bends down to *L.* before Lasswade, where R. North Esk is crossed. Turn uphill to *L.* from the br. and keep straight on to Eskbank. Here take second road on *L.*, ahead, passing Dalkeith Sta. on *L.*, before entering High St.

**EDITOR'S NOTES.**—(a) Edinburgh may be reached by keeping straight forward after passing the rly. br. beyond the Park Burn, but the road is a very hilly one though the surface is fair. Route 31 is joined beyond Liberton by turning sharp *L.* at the inn at that village, and passing the Parish Ch. on *r.*, then bearing to *r.* just beyond, at cross-roads. Or, better still, turn to *r.* at Liberton inn down a capital descent to the cross-roads at the Free Ch., where turn sharp *L.* (care required) towards the city. The lane through wooded land, ahead at the cross-roads, leads on to Route 136, and is a picturesque bit of road, with good surface in dry weather, but rather greasy after rain.

(b) By keeping straight ahead at Eskbank a fairly good road leads to Bonnyrigg, where, at cross-roads, roads lead: *L.*, to Newtonloan (2¼ m.) on Route 110, and *r.*, to Lasswade (¼ m.). The Newtonloan road is very hilly and the road towards Lasswade has a dangerous descent into that village. Continuing forward from Bonnyrigg the road remains fairly good towards Hawthornden. Bear to *r.* after crossing rly. and turn *L.* at Hawthornden Sta.; the road eventually winds down into the beautiful valley below Roslin and ascends a steep hill past the gate of the powder mills to junction with Route 160. This is purely a local road, and is here mentioned on account of its picturesque surroundings. The surface is rather rutty in parts and the road narrow.

(c) The branch road to *L.* on the ascent after Lasswade affords a connection with Loanhead. There is a gradual ascent to that village, where bear to *r.* and keep forward, joining Route 31 at Straiton. If the rider desires a connection towards the south he should turn sharp *L.* just after crossing the rly. in Loanhead, and join Route 31 a m. further on.

# ROUTE 160. EDINBURGH TO ROSLIN.

(Circular.)

The road to Roslin is a favourite one with Edinburgh riders, many of whom, instead of returning as they came, prefer to go back to the city by Seafield and Hillend, as detailed below, thus making a circular run. The attractions of Roslin are so fully set forth in local guide-books that it is unnecessary to speak of them here. Beyond Roslin, on the return journey, the scenery is pleasant, especially near the Pentland Hills.

| Miles from Edinburgh | Places on the Road.    | Mileage.       |        | General description of the Road.                                                                                                                                                                                                                                                                                               |

| 4½                   | Fairmilehead .....     | ½              |        |                                                                                                                                                                                                                                                                                                                                |
|                      | <b>EDINBURGH</b> ..... | 4½             | 16½    | Route 39 (p. 48) into Edinburgh. See, also, note below.                                                                                                                                                                                                                                                                        |

**EDINBURGH TO ROSLIN (CIRCULAR).** *Reverse.*—Reverse of Route 39 to Hillend, where bear to *L.*, Route 31 being joined beyond Seafield. After proceeding along the main road for ½ m. turn off to *L.* along a narrow road, passing over rly. before Roslin. At Royal Hotel corner in Roslin turn to *L.*, going through village, and on re-joining Route 31 at Bilston old toll-house bear *r.*, and follow that route (as on p. 39) to Edinburgh.

**EDITOR'S NOTE.**—From Fairmilehead cross-roads there are two alternative ways into the city. To *L.* a hilly, but good, road leads towards Edinburgh by Hunter's Tryst and Colinton Mains, meeting the road from Colinton before reaching the Hydropathic. See note at top of p. 85. The road to *r.* has not quite so good a surface, but is downhill for most of the way, going round by the wall of Morton Hall policies, to Kaims, where Route 31 is met. The surface varies very much on these narrow by-roads, but is in fair order as a rule.

# ROUTE 161. EDINBURGH TO LEITH.

(Via Duddingston and Restalrig.)

This seems an unnecessarily circuitous route when the direct way to Leith from the General Post Office by Leith Walk is only  $1\frac{1}{4}$  m., but it makes a very pleasant suburban run, avoids traffic, and passes through some attractive surroundings, especially near Duddingston. Two shorter circuits are referred to in the note below. The surface, as is frequently the case near a city, varies considerably according to the amount of traffic that passes over it; on the whole, however, the road described below is a quiet one, and the surface is in very fair condition.

| Miles from<br>Leith. | Places on the<br>Road.      | Mileage.                |                | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|----------------------|-----------------------------|-------------------------|----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                      |                             | Inter-<br>medi-<br>ate. | Total.         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| $7\frac{1}{2}$       | EDINBURGH .....             | ...                     | ...            | Route 136 (reverse) to Cameron Toll.                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| $5\frac{1}{4}$       | Cameron Toll .....          | $2\frac{1}{4}$          | $2\frac{1}{4}$ | Bear to $\angle$ at lamp on a slightly descending road which presently becomes level and turns to $r.$ , then $\angle$ near Peffermill House, and ascends over the Suburban Rly., with a fall beyond to the level. At cross-roads turn sharp $\angle$ ( $r.$ , to Craigmillar Castle, a most interesting ruin), descending to Duddingston Sta. Surface fair as a whole, but rather lumpy here and there. Keep forward over rly., descending to a level crossing, where the gates are closed at times. |
| $4\frac{3}{4}$       | Peffermill .....            | $\frac{1}{2}$           |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| $4\frac{1}{2}$       | Cross-roads .....           | $\frac{1}{4}$           |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| $4\frac{1}{4}$       | Level crossing .....        | $\frac{1}{4}$           | $3\frac{1}{4}$ | There is a steady rise beyond, and an easy decline towards Duddingston Loch, with rather an abrupt turn to $r.$ on reaching the loch. Road passes through trees and ascends to Duddingston village, where keep to $r.$ ( $\angle$ , to Queen's Park: see note to Route 145). Fairly good surface.                                                                                                                                                                                                     |
| 4                    | Duddingston Loch .....      | $\frac{1}{4}$           |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| $3\frac{3}{4}$       | Duddingston .....           | $\frac{1}{4}$           | $3\frac{3}{4}$ | Gradual decline to the cross-roads at Duddingston Mill, where turn to $\angle$ (forward, to Portobello; $r.$ , to Musselburgh: see notes to Route 145), having road fairly level at first, then ascending a stiffish hill, with a descent on the other side, to the cross-roads at Piershill. Surface fairly good generally.                                                                                                                                                                          |
| $3\frac{1}{4}$       | Cross-roads .....           | $\frac{1}{2}$           |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| $2\frac{1}{2}$       | Piershill.....<br>(Church.) | $\frac{3}{4}$           | 5              | Cross the tramlines and go down a hill in front—road narrow, between high walls. Pass under rly. brs., having entrance to Piershill Sta. on $\angle$ , to Restalrig. Surface indifferent about Restalrig.                                                                                                                                                                                                                                                                                             |
| $2\frac{1}{4}$       | Restalrig .....             | $\frac{1}{4}$           | $5\frac{1}{4}$ | Keep forward, avoiding roads to $r.$ and $\angle$ on a gradual ascent, thence a rather roughly-surfaced road to Summerfield, where there is a fall towards the tramlines. Keep forward crossing the links (stone setts) and enter Links Pl. and Charlotte St., turning to $r.$ on meeting tramlines in Constitution St. to Bernard St. corner.                                                                                                                                                        |
| $1\frac{3}{4}$       | Harvehill .....             | $\frac{1}{2}$           |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| $1\frac{1}{2}$       | Summerfield .....           | $\frac{1}{4}$           |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| $\frac{3}{4}$        | Leith .....                 | $\frac{3}{4}$           | $6\frac{3}{4}$ | For the Docks, go along Bernard St. and cross wooden swing br., then turn to $r.$ Leith Pier, for pleasure steamers, is best reached by keeping forward when over the wooden br. and entering the Docks by the gate on $r.$ , just beyond the North Leith Rly. Sta.                                                                                                                                                                                                                                   |
|                      | (Bernard Street.)           |                         |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|                      | LEITH PIER .....            | $\frac{3}{4}$           | $7\frac{1}{2}$ |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|                      | (Shore end.)                |                         |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

**EDINBURGH TO LEITH. Reverse.**—From the shore end of Leith pier pass over wooden br. to dock gate and turn *L.* along Commercial St. Pass over a second wooden br. and keep forward into Bernard St. Follow tramlines round to *r.*, and, at cross-streets at the Municipal Buildings, turn to *L.* and keep forward over the links and ascend through Summerfield. Avoid all branch-roads beyond Restalrig, pass under two rly. brs., and cross tramlines at top of the hill, going by the road ahead. At cross-roads at Duddingston Mill turn up to *r.* and bear down to *L.* at Duddingston, skirting the loch. At cross-roads beyond Duddingston Sta. turn sharp *r.* and again to *r.* on reaching Cameron Toll. Thence to General Post Office as on p. 140.

**EDITOR'S NOTE.**—This route may be shortened by taking either of the following two roads, both of which are attractive: (1) Reverse of Route 136 to Parkside Works, at end of which bear round to *L.* (road lumpy) and descend to the St. Leonard's Gate of the Queen's Park. Keep to *L.* at the keeper's house up a short hill and bear round to *L.* at the top, having a fine downhill run to Holyrood. The Palace lies over to *L.* Keep forward, passing St. Margaret's Loch on *r.*, and bear to *L.* to the gates at Meadowbank, beyond which the tramlines are met. At the red stone ch. turn sharp *L.* down a narrow hill to Restalrig; thence to Leith as above. Distance from Parkside Works to Restalrig Ch.,  $2\frac{1}{2}$  m. (2) As in (1) to the keeper's house at St. Leonard's Gate, where bear to *r.*, passing the small fountain on *L.* Road descends to "Sampson's Ribs," and again down the steep "Windy Gowl" to Duddingston Loch. Beyond the Duddingston Gate there is a short, stiff ascent, then an easy road to junction with the main route above, where bear *L.*

The gates of the Queen's Park are closed at sunset, but cycles may pass through the small side-gates at the footpath. Riders should moderate their pace when within the Park.

## ROUTE 162. LEITH TO GRANTON.

This can hardly strictly be termed a "Route"; it is merely a detailed description of the best way of reaching Granton from the centre of Leith. The fishing village of Newhaven, though encircled by modern buildings, still retains some of its old-time quaintness and picturesqueness, though that is not of a kind to suit every taste. A road runs S.W. from Granton, forming a link with Routes 163. and 164.

| Miles from Granton. | Places on the Road.               | Mileage.       |                | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|---------------------|-----------------------------------|----------------|----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                     |                                   | Inter-mediate. | Total.         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| $3\frac{1}{2}$      | Leith .....<br>(Bernard Street.)  | ...            | ...            | From Bernard St. E. corner follow tramlines along Constitution St., passing Post Office and St. James's Episcopal Church on <i>L.</i> , to the large lamp at foot of Leith Walk. Here bear over to <i>r.</i> and follow tramlines along Great Junction St., crossing the Water of Leith before Junction Road Sta. and turning to <i>L.</i> into Ferry Rd. Stone setts rough.                                                                                                                                              |

|                     | GRANTON .....<br>(Pier Station.)  | 1              | $3\frac{1}{2}$ |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

**LEITH TO GRANTON. Reverse.**—At hotel keep eastward, having rly. beside road on *L.* for  $\frac{3}{4}$  m., then turn to *L.* under br. and bear round to *r.* just beyond, along shore.

Before reaching Newhaven harbour, which is seen ahead, turn up Craighall Rd., passing a ch. on *L.* On meeting tramlines turn *L.* and follow tramlines to E. end of Ferry Rd., where bear round to *r.* At foot of Leith Walk take second street on *L.* and continue to follow tramlines to Bernard St.

## ROUTE 163. LEITH TO CRAMOND.

The direct road to Cramond from Leith; very easy to Davidson's Mains, then a little more hilly, but chiefly descending in the forward direction to Cramond Inn. There is no road by the shore from Cramond. Pedestrians, however, are permitted to cross the mouth of the river at the ferry, where the road ends, and walk through the beautiful grounds of Dalmeny (Lord Rosebery). The road surface, as a rule, is capital.

|                                |                                |                                  |               | level road here under trees is frequently soft, and                 |
|                                |                                |                                  |               | takes some time to dry after rain. There is a                       |
| ¾                              | Cramond House Gate ....        | I                                |               | capital downhill run to the lodge of Cramond                        |
|                                |                                |                                  |               | House, where the road turns abruptly to <i>L.</i> and               |
|                                |                                |                                  |               | again passes beneath trees. At the end of this                      |
| ½                              | Branch-roads .....             | ¼                                |               | avenue bear to <i>r.</i> ; fairly level at first, then              |
|                                |                                |                                  |               | descending and becoming steeper towards                             |
|                                |                                |                                  |               | Cramond Inn. This hill is very dangerous, and                       |
|                                |                                |                                  |               | should not be ridden, as it ends abruptly on the                    |
|                                |                                |                                  |               | open shore beyond the inn. Good surface.                            |
|                                | CRAMOND .....                  | ½                                | 6½            |                                                                     |
|                                | (Inn.)                         |                                  |               |                                                                     |

**LEITH TO CRAMOND. Reverse.**—Ascend the short steep hill from the inn and keep forward (the road to *r.* leads to Cramond Br. Sta. and Route 164), having the wall of Cramond House policies on *L.* At ½ m. from the inn turn to *L.* After passing under rly. br. before Davidson's Mains bear *L.* and pass through the village, keeping to *L.* where road forks and passing over rly. Thence an unmistakable road into Leith. From E. corner of Ferry Rd. as in reverse of Route 162.

# ROUTE 164. EDINBURGH TO SOUTH QUEENSFERRY.

From the earlier days of cycling until now this has been a favourite road with local riders. Some years ago the surface was considered to be the finest in Scotland, but since the building of the Forth Br., and the consequent heavy coach traffic for the conveyance of tourists to Queensferry, the road has suffered considerably. Still, there are portions of this route where the surface is excellent, and throughout it is good. The hills are rather trying in one or two places, especially beyond Cramond Br. on the forward journey, and at the Hawes Brae on the reverse route. Beyond Queensferry a road leaves to *L.*, joining Route 165.

| 3 $\frac{3}{4}$               | Cramond Bridge.....<br>↑                  | 1 $\frac{1}{2}$         | 5 $\frac{1}{2}$ | Beyond the br. there is a long stiff climb for $\frac{1}{2}$ m., then level by Cotmuir ( <i>c</i> ), and descending for another $\frac{1}{2}$ m. Undulating to the Dolphington Burn and ascending to beyond the fork-roads, where keep forward ( <i>L.</i> , Route 165). From the top of the hill there is a long descent towards South Queensferry, easy at first, then steep and somewhat dangerous towards the foot. This hill, which has been the scene of many unfortunate accidents, should be ridden very carefully and with the machine completely under control. At the foot the Forth Br. is passed under ( <i>d</i> ) and the road is practically level into Queensferry. Very good surface.<br>(Route 89 is joined here.) |

EDINBURGH TO SOUTH QUEENSFERRY. *Reverse.*—Leave due eastwards, pass under S. end of Forth Br., thence an unmistakable road towards Edinburgh, keeping to *r.*

beyond Craigleith Sta. and to *L.* before Daniel Stewart's College, and crossing the Dean Br. Enter the city by Queensferry St. and bear to *L.* at the large lamp, going along Princes St. to General Post Office.

EDITOR'S NOTES.—(a) By turning to *L.*, just at end of Blackhall village, along a narrow level road, the hill in front is avoided and the surroundings become more varied. The main road is re-joined before Davidson's Mains.

(b) Beyond Barnton Hotel a narrow road leaves on *L.* forming a link with Route 91. At  $\frac{1}{4}$  m. after leaving the Queensferry Rd. bear round to *r.*, then to *L.*, road undulating. The Forth Br. rly. is passed before joining Route 91. Distance, 2 m.

(c) Another cross country road, rather longer than the foregoing, leaves to *L.* at Cotmuir. It is fair and undulating. After passing through Craigie Wood bear down to *L.*, going under rly. At fork after passing another rly. keep forward for Kirkliston, or bear to *L.* for Boathouse Br., Route 91 being joined in either case. Kirkliston  $3\frac{1}{4}$  m.

(d) Just after passing under the Forth Br. there is a ferry pier on *r.*, where communication with North Queensferry is obtained. See Route 167.

(e) The road beyond South Queensferry (rather rough in parts) leads to the few houses by the shore known as Society. Here it turns inland, then bears to *r.* and passes through the beautiful grounds of Hopetoun House. The ride may be continued to Abercorn or Winchburgh, at which latter place Route 91 is joined. See Route 165.

## ROUTE 165. EDINBURGH TO LINLITHGOW.

(Via Dalmeny.)

A very tortuous cross-country road, with several rather sharp turns. Gradients long, but easy, and surface good. A pleasant circular run from Edinburgh may be obtained by following this route to Linlithgow, and returning by Route 91.

| Miles from<br>Linlithgow | Places on the<br>Road.  | Mileage.                |                  | General description of the Road.                                          |

EDINBURGH TO LINLITHGOW (VIA DALMENY). *Reverse.*—Leaving the town eastwards, bear to *L.* at fork. Avoid all branch-roads; bear to *L.* beyond Burghmuir. At Champany go round to *r.* and keep forward to Whitequarries, and turn *L.* at fork beyond. At

$\frac{3}{4}$  m. further turn sharp *L.*, and sharp *r.* just after, and at  $1\frac{3}{4}$  m. further bear round to *r.* (*L.*, to Queensferry). A m. beyond this last turn bear to *r.*, and then to *L.* less than a  $\frac{1}{4}$  m. along the road. On meeting the main road beyond Dalmeny bear *r.*, and follow reverse of Route 164 to Edinburgh.

## ROUTE 166. EDINBURGH TO PERTH.

A very good main road throughout, with really excellent surface in parts. With the exception of the stiff climb out of Burntisland, the ascent over the western portion of Moncrieff Hill, and the stiff uphill pull (reverse direction) in Edinburgh, the gradients are easy. After Kinross, and especially in Glen Farg, the scenery is beautiful. The m.s.s. are variable, and one or two incorrectly placed.

| Miles from Perth. | Places on the Road.         | Mileage.        |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| 32 $\frac{1}{4}$  | Burntisland .....           | 5               | 8                | From the pier cross some rly. lines on the level and bear to <i>L.</i> Pass under rly. br. and turn <i>r.</i> through the town. Before reaching the links bear to <i>L.</i> at fork (straight on, Route 181). Gradual rise towards the cross-roads with a short steep ascent just before reaching them. At $\frac{1}{2}$ m. further, the long arduous ascent of the Binn Hill begins. This hill is very stiff at the beginning, and near the top, with a continuous, fairly steep intermediate gradient, and the surface is rather loose and rough in parts. |

**EDINBURGH TO PERTH.** *Reverse.*—Go along Tay St., having river on *L.*, pass under rly. br., and turn sharp *r.* Just beyond turn *L.*, through an avenue, and leave by the Edinburgh Rd., keeping straight forward. In Milnathort keep to *L.* at fork, pass straight through Kinross, cross rly. beyond, and avoid all branch and cross-roads to near Cowdenbeath, where keep to *L.* and pass over a rly., and keep again to *L.* beyond. Unmistakable to Burntisland. Pass through town, go under rly. br., and bear round to *L.*, having harbour on *r.* Cross some level rly. lines on *r.* near sta., passing down to steamboat pier. Ferry (passenger 10d., or 5d.; bicycle 6d.) to Granton. On disembarking keep forward at end of pier, passing Granton Hotel on *L.*, and bear round to *L.*, up an ascent, just past the hotel. On meeting Route 163 at right-angles (Free Ch. in front) turn *L.*, and turn *r.* nearly  $\frac{1}{4}$  m. further, following tramlines into the city. Ascend Pitt St., and go down S. Hanover St. to Princes St., and bear *L.* to General Post Office.

## ROUTE 167. NORTH QUEENSFERRY TO DUNFERMLINE.

A hilly road with good surface throughout. Telegraph wires all the way, except for a  $\frac{1}{4}$  m. after Ferry Toll, where they are taken across a field.

| Miles from Dunfermline | Places on the Road.                 | Mileage.        |                 | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

**NORTH QUEENSFERRY TO DUNFERMLINE.** *Reverse.*—From Cross go by Guildhall St., St. Margaret St., Gibb St., and Moodie St.—this latter being steep, and requiring care in descending. At foot turn sharp *L.* by Netherton Broad St., pass under rly. br.,

and leave by St. Leonard's Pl. and Hospital Hill. At fork (d.p.) keep to *r.*, and when approaching South (Queensferry) avoid a road on *l.* leading to Inverkeithing, and keep forward at Ferry Toll down to the pier. (Ferry over to South Queensferry and Route 164. See time tables.)

(a) The inscription runs: "According to tradition, Margaret, afterwards Queen of Malcolm Canmore rested on the above stone A.D., 1069, when on her way to Dunfermline."

## ROUTE 168. DUNFERMLINE TO STIRLING.

As far as Alloa this route follows what is known as the "high" road, the "low" road being described in Route 169. But after Alloa the low road is taken, as being the easier, the high road by Tullibody being treated of in the note below. The road is rather hilly from Comrie to Clackmannan, but is thence almost level to Stirling, and the surface is good, as a whole, throughout. The m.s.s. after Kennet are measured by the "low" road, and by Tullibody after Alloa.

| 7 $\frac{1}{2}$             | Alloa (a) .....                  | 1 $\frac{3}{4}$       | 13 $\frac{3}{4}$ | Leaving Post Office on <i>r.</i> , keep forward for some little way to cross-streets, and bear to <i>r.</i> Stone setts in the town, then rather lumpy macadam to level rly. crossing (gates frequently shut). Keep forward on a level road to Cambus, which lies on <i>l.</i> , the road bending round to <i>r.</i> beyond, and ascending very slightly to junction with the "high" road by Tullibody. Bear <i>l.</i> , cross rly., and also R. Devon, the br. over which is narrow. Good level running to Causewayhead, having the Abbey Craig and Wallace Monument on <i>r.</i> before that village. Fairly good surface; rather lumpy in parts. |
|                             | Post Office.)                    |                       |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

|                         |                                                | Inter-<br>medi-<br>ate. | Total.           |                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 1 $\frac{3}{4}$         | Causewayhead.....                              | $\frac{3}{4}$           | 19 $\frac{1}{2}$ | On meeting the single line of tramrails bear to <i>L.</i> (forward, Route 176; <i>r.</i> , Route 174) on a broad, level road towards Stirling; surface uneven, owing to constant traffic. Pass under rly. br. and across R. Forth, then bear slightly to <i>L.</i> , over level crossing, and follow tramlines up Wallace St., and to <i>L.</i> into Barnton St. and Murray Pl. to King St. corner, on <i>r.</i> Fairly good paving in Stirling. |
| $\frac{1}{2}$           | Level Crossing.....                            | 1                       |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|                         | <b>STIRLING</b> .....<br>(King Street Corner.) | $\frac{3}{4}$           | 21 $\frac{1}{4}$ |                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

**DUNFERMLINE TO STIRLING.** *Reverse.*—Proceed by Murray Pl. and follow tramlines by Barnton St., passing Post Office on *r.*, and to *r.*,  $\frac{1}{4}$  m. beyond, down Wallace St., over R. Forth and under rly. br. to Causewayhead. Here turn *r.*, and at fork, after crossing R. Devon and rly., bear to *r.* In Alloa, beyond the large ch. passed on *r.*, turn to *L.*, passing Post Office on *L.* Keep forward through the town for about  $\frac{1}{4}$  m. and bear *r.* along main road, having rly. on *L.* At fork turn *r.* and keep to *L.* at fork near ch. (*r.* to Clackmannan). At fork at Kennet bear *L.* and pass over cross-roads. In Carnock bear round to *r.* then *L.*, thence unmistakable to Dunfermline. Enter by Foundry St. and turn *r.* by Pilmuir St. and Bath St. to High St.

**EDITOR'S NOTE.**—(a) The "high" road out of Alloa by Tullibody is not so level as the "low" road described above. Leave Alloa by Mar St. and Mar Pl., crossing rly. W. of the sta. Road is fairly level for over a m., then ascends gradually, falls through the village of Tullibody and joins the low road at road junction at foot of the hill. The distance is equal to Stirling by either road. Surface good.

**DUNFERMLINE TO KINCARDINE, ETC.** This is known as the "low" road. Leave by High St., Bridge St., Chalmers St., and turn sharp *L.* by Pittencrieff St. Descent to Crossford ( $1\frac{1}{2}$  m.), then undulating to Cairneyhill ( $1\frac{1}{4}$ — $2\frac{1}{4}$ ), beyond which place Route 169 is joined. Very good surface.

**ROUTE 169.****NORTH QUEENSFERRY TO ALLOA.**

An undulating road, possessing good surface throughout. The m.s.s. are measured by the "low" road from Dunfermline to county boundary at Torry, where the set from Stirling begins.

**NORTH QUEENSFERRY TO ALLOA. Reverse.**—Reverse of Route 168 to Kennet, where keep to r. at fork. Bear round to L. into Kincardine, then keep to r., going out due eastward. At fork beyond Torryburn keep to r. and keep forward at 2 m. further, having rly. for a short way on r., and avoid a road on L. just before passing the rly. At next fork keep to L. (r. to Limekilns); thence an easily followed road to North Queensferry.

## ROUTE 170.

## NORTH QUEENSFERRY TO PERTH.

A very undulating road to beyond Inverkeithing, when there is a long, stiffish hill to face, which makes this road much easier to ride in the reverse direction, from Cowdenbeath. After Cowdenbeath, going northwards, see summary to Route 166. The surface is very good, as a whole.

**NORTH QUEENSFERRY TO PERTH. Reverse.**—Reverse of Route 166 to Cowdenbeath.

Here bear to *r.* after passing rly. and before coming to the second rly. Keep forward at Crossgates and at fork at cross-roads, on descending the hill beyond, keep to *r.* Keep forward through Inverkeithing and bear *L.* at Ferry Toll to North Queensferry pier.

## ROUTE 171. DUNFERMLINE TO DOLLAR.

A winding cross-country road, with one or two stiff hills, especially near Saline. There is very little absolutely level, the remainder of the route being either ascending or descending in long slopes. The surface, however, is good. The views before Dollar are attractive.

Bear to L., descending into Saline. Good surface.                                                                                                        |
| 6½                 | Saline .....<br>(Church.)                                               | ½              | 5¾     | Keep to L. at fork in the village, down a long, gradual descent, and bear to r. where road divides, the downward tendency being maintained, and keep to L. just before the cross-roads at Ramhorn, before which the road bends round to r., then to L. Good surface. |
| 2¼                 | Ramhorn Cross-roads .....<br>↓                                          | 4¼             | 10     | Route 173 is crossed here: long descent, gradient 1 in 22 near foot, with sharp turn r. to br. over R. Devon—care required, and a rise beyond into the village, passing rly. Surface good on the whole; rather loose, at times, on the steeper hills.                |
| 1                  | Cross R. Devon .....<br><b>DOLLAR</b> .....<br>(Castle Campbell Hotel.) | 1½<br>1        | 12½    |                                                                                                                                                                                                                                                                      |

**DUNFERMLINE TO DOLLAR.** *Reverse.*—Leave the hotel at Dollar, going at first westwards through the village, then turn r. downhill and pass the rly. Cross R. Devon and turn uphill to L. Pass over cross-roads at Ramhorn, and keep to r. on hill before Saline. At that village keep to L. at fork, and turn downhill to r. over ¼ m. further. On meeting Route 168 bear L., thence into Dunfermline as in reverse of that route.

**ROUTE 172. DUNFERMLINE TO KIRKCALDY.**

This is a very undulating cross-country road, but none of the hills are difficult, and the surface is good throughout. The m.s. are measured by the direct road, which is mentioned in the note below.

| Miles from Kirkcaldy. | Places on the Road.              | Mileage.       |        | General description of the Road.                                                                                                                                                                                                                                                      |
|-----------------------|----------------------------------|----------------|--------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                       |                                  | Inter-mediate. | Total. |                                                                                                                                                                                                                                                                                       |
| 13½                   | Dunfermline ...<br>(Town Cross.) | ...            | ...    | Proceed eastwards along High St. by E. Port St. to Holyrood Pl., and at entrance to public park, where road forks, keep to r. Descent out of the town, then undulating upward gradients to Crossgates, where Route 170 is passed. Surface rather lumpy out of Dunfermline, then good. |
| 11¼                   | Morningside.....                 | 2¼             |        |                                                                                                                                                                                                                                                                                       |
| 10                    | Crossgates.....                  | 1¼             | 3½     | Here turn for a few yds. to r., then bear L., road rising gradually for a m., during which keep to L., and descending towards Donibristle, with short ascent through that village. Gradual climb to Stewart's Arms Inn, where turn to r. (forward, see note). Good surface.           |

|                          | Kirkcaldy .....<br>(Town Hall.) | ½                       | 13½    |                                                                                                                                                                                                                                                                                                                                                                                                                         |

**DUNFERMLINE TO KIRKCALDY. Reverse.**—From Town Hall proceed W. along High St. and bear to *r.* at fork along Milton Rd. At rly. br. turn to *l.*; descent into Linktown narrow—caution necessary. Turn sharp *r.* up Invertiel Rd. and keep forward. At cross-roads turn *r.* and at Stewart's Arms Inn, 1 m. beyond, turn *l.* In Cross-gates bear to *r.* for a few yds., then turn *l.* on an easily-followed road to Dunfermline.

**EDITOR'S NOTE.**—The road ahead at Stewart's Arms, by Auchtertool, is the more direct way to Kirkcaldy, but is very hilly and of an inferior surface to the route detailed above. In Auchtertool keep to *r.* at the Distillery; enter Kirkcaldy by Abbotshall Rd. Distance, Stewart's Arms to Kirkcaldy, 6¾ m.

## ROUTE 173.

## KINCARDINE TO RUMBLING BRIDGE.

This is in parts a varied and attractive road, passing through well-wooded land near Forest Mill, and having picturesque surroundings near Rumbling Bridge. The gradients though long are fairly easy, the short ascent and descent at Mossendgreen being the stiffest, and the surface is very fair on the whole, but, where it lies under the trees, takes some time to dry after rain.

| Miles from<br>Rumbling Br. | Places on the<br>Road.    | Mileage.                |        | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                              |

## Route 173. KINCARDINE TO RUMBLING BRIDGE

—continued.

| Miles from<br>Rumbling Br.       | Places on the<br>Road.          | Mileage.                |                  | General description of the Road.                                                                                                                                                                                         |
|----------------------------------|---------------------------------|-------------------------|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                  |                                 | Inter-<br>medi-<br>ate. | Total.           |                                                                                                                                                                                                                          |
| 3 $\frac{1}{2}$                  | Blairingone .....               | 3 $\frac{1}{4}$         |                  | for $\frac{3}{4}$ m., and fairly level running towards Mossendgreen, with rather a sharp dip (about 1 in 14) to a br. Fairly good surface.                                                                               |
| 1 $\frac{1}{4}$<br>$\frac{1}{2}$ | Mossendgreen .....              | 2 $\frac{1}{4}$         | 9                | Short, stiff ascent from the br., then an easier rise to fork, where keep l. (r., Route 187) to Rumbling Bridge and hotel. (To gain admission to the river banks, which are well worth seeing, apply at hotel. Fee, 6d.) |
|                                  | Fork-roads .....                | 3 $\frac{1}{4}$         |                  |                                                                                                                                                                                                                          |
|                                  | RUMBLING BRIDGE ...<br>(Hotel.) | 1 $\frac{1}{2}$         | 10 $\frac{1}{4}$ |                                                                                                                                                                                                                          |

KINCARDINE TO RUMBLING BRIDGE. *Reverse.*—From hotel cross br. and pass rly. At Mossendgreen keep to r., and keep forward to Forest Mill, at  $\frac{3}{4}$  m. beyond which bear l., thence due S. to Kincardine.

EDITOR'S NOTE.—The road to l. at road junction, N. of Kincardine Sta., forms a direct connection between Rumbling Bridge and Alloa. From the road junction here it descends for nearly 2 m., joins Route 168, and is level into Alloa. Surface very fair. Alloa 3 $\frac{3}{4}$  m.

## ROUTE 174. STIRLING TO MILNATHORT.

A very interesting and picturesque road to Muckart, and affording some fine views of the Lomond Hills and Loch Leven, from the high ground beyond the Yetts. Very easy running to Dollar, then ascending for 4 m. on a well-graded hill, and again easy to Milnathort. Surface good to Tillicoultry, excellent to Muckart, then roughish to beyond Carnbo, and fair latterly.

| Miles from<br>Milnathort | Places on the<br>Road. | Mileage.                |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| 22 $\frac{3}{4}$         | Level Crossing.....    | 3 $\frac{1}{4}$         |                  | Passing the inn on l. at corner, keep forward, leaving tramlines, up a steep slope which should be walked up, and on meeting another road at right-angles, bear round to r. to top of hill, near entrance to Abbey Craig House. Capital descent, passing under trees to the level before Blairlogie, and a gently undulating road, by the foot of the Ochil Hills, to Menstrie. Good surface, as a whole. Keep forward, having a straight, almost level road towards Alva, with an easy rise into that town. |

|                                  |                                          | <i>Inter-<br/>medi-<br/>ate.</i> | <i>Total.</i> |                                                                                                                                                                                                                                                                                                                                                                |
| 16½                              | Alva .....                               | 2                                | 7             | Beyond the town the surface improves, and there is capital level running towards Tillicoultry, into which the road ascends gradually.                                                                                                                                                                                                                          |
| 14½                              | Tillicoultry .....                       | 2                                | 9             | Fairly level to the ch. on <i>r.</i> , from which there is a steady rise to cemetery gate, and a quick fall beyond, during which road bends round to <i>r.</i> Shady, undulating run, with slight upward trend, and on capital surface, to Dollar.                                                                                                             |
| 11¼                              | Dollar .....<br>(Castle Campbell Hotel.) | 3¼                               | 12¼           | The road rises gradually at first from Dollar, then becomes rather more stiff, in parts, the upward tendency being continuous to Pool of Muckart village, beyond which the gradient is fairly steep, but to most riders quite rideable, to the Yetts of Muckart, where several roads meet. Good surface.                                                       |
| 8                                | Pool of Muckart.....                     | 3¼                               |               |                                                                                                                                                                                                                                                                                                                                                                |
| 7½                               | Yetts of Muckart .....                   | ½                                | 16            | Keep to <i>r.</i> at fork, passing a small cottage on <i>l.</i> just beyond. Road surface becomes poorer, and there is a quick descent to a br. over the R. Devon, the road bending to <i>l.</i> and <i>r.</i> at the br. Thence a gently undulating road, rather loose and rough in parts, towards Carnbo, and rising gradually from a br. into that village. |
| 7                                | Cross R. Devon .....                     | ½                                |               |                                                                                                                                                                                                                                                                                                                                                                |
| 4                                | Carnbo .....                             | 3                                | 19½           | From the top of the hill there is a quick descent, followed by an easily undulating road, but mostly on the down grade, and with improving surface, to Milnathort. At fork, just at the beginning of the village, bear <i>r.</i> if going S., or keep to <i>l.</i> if going W. or N. Routes 166 and 190 joined in the town.                                    |
|                                  | MILNATHORT .....                         | 4                                | 23½           |                                                                                                                                                                                                                                                                                                                                                                |

**STIRLING TO MILNATHORT. Reverse.**—Leave the town due westward; unmistakable road to the Yetts, where keep forward, avoiding a road to *l.* (to Rumbling Bridge). The road is an easily-followed one by the hill-foots to the Wallace Monument and the upper part of Causewayhead. Here turn sharp *l.* down a steep hill (*dangerous*) into the village, and on meeting tramlines follow them into Stirling.

## ROUTE 175. ALLOA TO DOLLAR.

A direct link from Alloa to the hill-foots road (Route 174). Easy gradients and capital surface. The views across the Devon valley are very fine.

| <i>Miles from Dollar.</i> | <i>Places on the Road.</i> | <i>Mileage.</i>       |                 | <i>General description of the Road.</i>                                                                                                                                                              |
|---------------------------|----------------------------|-----------------------|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

| 7 $\frac{1}{4}$           | Alloa .....                | ...                   | ...             | Leave by Mill St., at end of which bear to <i>L.</i> ; surface lumpy. Fairly level towards New Sauchie and an easy ascent through that village to Sauchie. Very good surface when well out of Alloa. |
| 6                         | New Sauchie .....          | 1 $\frac{1}{4}$       |                 |                                                                                                                                                                                                      |
| 5 $\frac{1}{4}$           | Sauchie .....              | $\frac{3}{4}$         | 2               | Gradual descent, passing the Devon Iron Works on <i>L.</i> to Devonside, where cross river to <i>L.</i> and keep forward, passing rly., to road junction. Capital surface.                           |
| 3 $\frac{1}{2}$           | Devonside .....            | 1 $\frac{3}{4}$       |                 |                                                                                                                                                                                                      |
| 3                         | Road junction .....        | $\frac{1}{2}$         | 4 $\frac{1}{4}$ | Turn <i>r.</i> at road junction ( <i>L.</i> into Tillicoultry) and follow Route 174 to Dollar.                                                                                                       |
|                           | DOLLAR .....               | 3                     | 7 $\frac{1}{4}$ |                                                                                                                                                                                                      |

**ALLOA TO DOLLAR. Reverse.**—Leave Dollar westwards and just before Tillicoultry turn *L.*, passing rly. and crossing R. Devon to Devonside, where bear *r.* Thence an unmistakable road to Alloa.

## ROUTE 176. STIRLING TO PERTH.

(Via Dunblane.)

A very good main road, well-made throughout, and possessing on the whole capital surface. At parts, however, the surface is rather lumpy, but this is only local. The hills, though some are long, are graded in such a manner as to be robbed of any serious difficulty for the average rider. The scenery is interesting, especially from Bridge-of-Allan to beyond Dunblane and between Auchterarder and Perth. The m.s.s., which are measured to Perth Cross, follow an older road for a short distance at Dunblane.

| <i>Miles from Perth.</i> | <i>Places on the Road.</i> | <i>Mileage.</i>       |                 | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                                                    |

|                   |                                            | Inter-mediate.  | Total.           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 29 $\frac{1}{4}$  | Kippencross Lodge .....                    | $\frac{1}{2}$   |                  | run under trees and then descending to Kippencross W. Lodge, the grounds of the estate (Col. Stirling, of Kippendavie) being on <i>r.</i> to Dunblane. From the Lodge there is a short stiffish rise, and a descent beyond towards fork-roads.                                                                                                                                                                                                                                                                                                         |
| 28 $\frac{3}{4}$  | Fork-roads .....                           | $\frac{1}{2}$   |                  | Bear to <i>r.</i> by Stirling Rd. (forward to Doune and Callander, Route 179), having an easy rise to the br. where rly. is crossed. Then easy running, passing Victoria Hall on <i>r.</i> and rly. sta. on <i>l.</i> , and bearing round to <i>r.</i> to br. and hotel. Surface very good as a whole.                                                                                                                                                                                                                                                 |
| 28 $\frac{1}{2}$  | Dunblane .....<br>↑ (Stirling Arms Hotel.) | $\frac{1}{4}$   | 6                | Bear <i>l.</i> , passing Post Office on <i>r.</i> , up High St.; careful riding necessary. At the Union Bank House turn <i>r.</i> , uphill, passing County Buildings on <i>l.</i> ; rather stiff ascent. At St. Mary's Episcopal Ch. bear <i>l.</i> at fork ( <i>r.</i> , see note <i>b</i> ), passing the Hydropathic on <i>r.</i> , beyond. Road is now fairly level, and remains so to Anchorfield, where there is a slight rise followed by a further stretch of easy running, and a descent towards the branch-roads at Duthieston. Good surface. |
| 28 $\frac{1}{4}$  | St. Mary's Episcopal Ch.                   | $\frac{1}{4}$   |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

Beyond the br. bear to <i>r.</i> , uphill, having a long, winding but splendidly-engineered gradient for 2 $\frac{1}{2}$ m., becoming undulating at the top, and passing over moorland and through plantations, to Crossgates. Good surface.                                                                                                                                                                                                                                                                                                                                                        |
| 9 $\frac{1}{2}$      | ↑ Cross R. Earn. ....    | $\frac{1}{2}$           |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 7                    | ↑ Upper Cairnie .....    | 2 $\frac{1}{2}$         |                  | At this point the down grade commences, then for 1 $\frac{1}{2}$ m. the running is easy, the downward trend being hardly noticeable, but the gradient becomes more marked, and there is a capital descent for over 2 m. into Perth. Care should be exercised towards the foot of this hill, where the town is entered. Tramlines met; keep forward by York Pl. and County Pl., at the end of which follow tramlines to <i>l.</i> along S. Methven St., then to <i>r.</i> by High St., at end of which, on <i>l.</i> near the river, are the City Chambers. Rather lumpy surface down into Perth; fairly good paving in the town. |
| 5 $\frac{1}{2}$      | Crossgates .....         | 1 $\frac{1}{2}$         | 29               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

**STIRLING TO PERTH. Reverse.**—Proceed westward, along High St., and follow tramlines to *l.* by S. Methven St., and round to *r.* by York Pl. Cross rly. br., and follow the ascending road round to *l.* At Cherrybank avoid a road to *r.*; thence an unmistakable main road to beyond Blackford; on approaching Greenloaning, keep forward over the cross-roads near the br. over a small stream, and on meeting the Crieff Rd. beyond, bear to *l.* Approaching Dunblane, avoid a road to *r.* (Ramoyle), and at fork beyond bear to *l.*, passing Hydropathic gates on *l.* Descend towards High St. with care. At Union Bank House bear *l.*, and pass along High St.; at Stirling Arms Hotel, road turns *r.* over br. and bends to *l.*, passing rly. sta. on *r.* at iron (rly.) br. Keep forward (*r.* to Doune and Callander), having an easily-followed road to Bridge-of-Allan. Follow tramlines by Causewayhead (where they turn *r.*) and into Stirling.

**EDITOR'S NOTES.**—(a) The road to *l.* at branch-roads near Keir Gate forms a direct connection with Doune and Route 177. There is a long ascent over the hill of Row (*pron. Rue*) and a downward run towards Doune. The surface is fair on the whole, but roughish in parts on the Doune side of the hill. Distance from Bridge-of-Allan to Doune, 5 m. The easier and better road is that by Dunblane (Route 179).

(b) The road uphill to *r.* from St. Mary's Ch., Dunblane, leads back to Bridge-of-Allan, and forms, in connection with the main road described, a picturesque circular run for those who may, for the time being, make Dunblane, or Bridge-of-Allan, their stopping place. Known as the "Glen Road," it ascends to Pisgah, somewhat steeply, and falls, gradually at first, then quickly, by Kippendavie Home Farm (where a road leaves to *l.* for the battlefield of Sheriffmuir), to the br. above the Wharry Burn. Beyond this it runs along the hillside above a romantic little glen, and descends by Sunnyslaw to Bridge-of-Allan. Good surface in dry weather; soft and sticky in the glen after rain. Distance, a little over 3 m.

(c) The road to *l.* from Duthieston leads to Kinbuck (1  $\frac{1}{2}$  m.), beyond which small village it forms a connection with Route 276 at Braco. To Kinbuck the road is a good and easy one, but towards Braco it is somewhat hilly, though the surface is fair.

# ROUTE 177. STIRLING TO CALLANDER.

(Via the Drip Road.)

One of the favourite cycling roads of Scotland ; capital surface, easy gradients, delightful scenery.

| Miles from Callander. | Places on the Road.               | Mileage.       |        | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| 16                    | STIRLING<br>(King Street Corner.) | ...            | ...    | Leave by Murray Pl. and Barnton St., and keep forward, when tramlines bear to <i>r.</i> , along Cowane St., at end of which the Gowan Hill is passed on <i>l.</i> ; keep to <i>l.</i> and cross Forth and Clyde Rly., the broad main road then running in a straight line westward. Surface rather lumpy out of Stirling, then very good running on an almost level road for over 5 m., with a slight rise to Kincardine Ch., at fork before which keep to <i>r.</i> ( <i>l.</i> , Route 178). Good, broad, undulating road towards Doune, with descent to the Teith Br., and a stiffish winding ascent beyond, then easy to the Woodside Hotel. Capital surface. |

|                       | CALLANDER<br>(Square.)            | 4              | 16     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

**STIRLING TO CALLANDER. Reverse.**—Leave due eastward ; unmistakable road to Doune. Here keep to *r.*, passing Woodside Hotel on *l.*, and bear round to *r.* at the hotel. Hill down to the Teith Br. should be ridden with care. Beyond the br. avoid a road to *r.*, and at branch-roads beyond keep again to *l.* An easily-followed road to Stirling, avoiding a road to *r.* at Kildean. Enter by Cowane St., and on meeting tramlines follow them to King St. Corner.

**CALLANDER TO DOUNE (VIA LANRICK CASTLE).** This road forms a pleasant alternative route back to Doune by the S. side of the R. Teith. Cross the br. at Callander and where road divides go to *l.* ; long, almost level, straight run to branch-roads, where keep to *l.* twice. The road is an undulating one, turns to *l.* beyond Lanrick Castle gate and joins the Stirling Rd. just above the Teith Br. Bear to *r.* for Stirling, to *l.* for Doune. Surface very fair. Distance, Callander to Doune, 8¾ m.

**LLANDER TO PORT OF MENTEITH.** Cross the br. at Callander, and where road divides turn to *L.*, having a long straight run to the branch-roads. At d.p. turn *r.* up a steep winding hill (about 1 in 13 for some little way), with a very steep descent on the other side towards the Port of Menteith. On meeting Route 178 bear *r.* Surface good to branch-roads, then a rough moorland road, with gates, towards the road junction. Callander to Port of Menteith,  $6\frac{3}{4}$  m.

## ROUTE 178. STIRLING TO ABERFOYLE.

(Via Thornhill.)

Very fine surface over Route 177, then a good, undulating road to beyond Thornhill, after which the hills are rather more trying to beyond Menteith, but the surface remains the same. The scenery is very attractive around the Lake of Menteith, and at Aberfoyle, where the Rob Roy country may be said to be entered. The coach road from Aberfoyle over to the Trossachs is at present (1897) closed to cyclists.

| Miles from<br>Aberfoyle. | Places on the<br>Road.     | Mileage.                |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                         |

**STIRLING TO ABERFOYLE (VIA THORNHILL).** *Reverse.*—Leave Aberfoyle eastwards, having rly. on *r.* At fork a m. out keep to *L.* Avoid all cross and branch-roads to Thornhill, into which village turn *r.*, then *L.* at the Masonic Hall. At branch-roads beyond the village keep forward (*L.* to Doune, etc.) and avoid a road to *r.* just beyond. Join Route 177 near Kincardine Ch., and follow that route (reverse) into Stirling.

**THORNHILL TO CALLANDER.** After turning *r.* at Masonic Hall, keep forward. The road ascends for 2 $\frac{1}{4}$  m. to summit on the moors, and winds downwards towards the

road junction, before Callander; thence it is undulating. Surface fair to road junction, then good. There are one or two gates across the road as it goes over the moorland. Thornhill to Callander,  $5\frac{3}{4}$  m.

**THORNHILL TO KIPPEN STATION.** From centre of village, proceeding westwards, turn down to *l.* at cross-roads at Masonic Hall. Quick descent at first, then a straight, level road with fairly good surface. On meeting another road at right angles, bear *r.*, and cross R. Forth to Kippen Sta. ( $3\frac{1}{4}$  m.). The village lies 1 m. further on, uphill, Route 100 being crossed beyond the sta.

## ROUTE 179. DUNBLANE TO CALLANDER.

A connecting-link between Routes 176 and 256. The easiest road from Bridge-of-Allan to Callander is by Dunblane, the more direct route by Hill of Row (see note to Route 176) being hilly and of inferior surface. The gradients on the Route detailed below are splendidly engineered, and the surface in parts is excellent.

| Miles from Callander. | Places on the Road.                      | Mileage.       |                | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

|                       |                                          | Inter-mediate. | Total.         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 4                     | DUNBLANE .....<br>(Stirling Arms Hotel.) | ...            | ...            | Leaving the hotel cross the br., pass rly. sta. on <i>r.</i> , and at the iron (rly.) br. turn downhill to <i>r.</i> and keep forward into Springfield Ter. where road bends round to <i>r.</i> , and is then straight for some way, ascending gradually. At the end of Springfield the ascent becomes rather stiffer, but the hill is short. Looking over to <i>r.</i> , a good view is obtained of the fine old Cathedral and upper part of the town. Road is now fairly level, but soon begins to re-ascend, gradually, to a further straight stretch of level running. At the end of this there is a quick descent; keep to <i>l.</i> at fork. Gently undulating to branch-roads near the sandpit on <i>l.</i> , where keep forward ( <i>r.</i> , good road to Argaty) up an easy hill, beyond which there is a capital descent towards Doune, and a short sharp ascent into that village, then level to the Cross. Surface fairly good at Dunblane to end of Springfield, then rather lumpy to near Stockbridge, where it becomes good and remains so to Doune. |

**DUNBLANE TO CALLANDER. Reverse.**—Reverse of Route 177 to the rly. br., which is passed over between Buchanty and Doune. At fork beyond, bear to *l.*, passing rly. sta. on *l.*, and keep forward to the Cross. Here bear slightly to *l.* and pass through Doune, thence an unmistakable main road to Dunblane. At head of Springfield

Ter., where road divides, keep to *r.* (to *L.*, access to the town is over a footbridge only) down Springfield Ter., and bear round to *L.*, and ascend to iron (rly.) br., where turn again to *L.*, and bear *r.* at rly. sta. to hotel, on *r.*, beyond the br.

**DOUNE TO THORNHILL.** At the Cross bear to *r.* down a short hill, passing St. Modoc's Ch. on *L.*, and the Woodside Hotel on *r.* Descend the winding hill (care required) to the Teith Br., beyond which keep straight forward. At fork over  $\frac{1}{4}$  m. further bear to *r.*, having a hilly road across country to Thornhill, with rather a lumpy, uneven surface. Thornhill  $4\frac{1}{2}$  m. from Doune.

## ROUTE 180. NORTH QUEENSFERRY TO BURNTISLAND.

A good, undulating road to Aberdour, then very hilly to Burntisland; surface apt to be rough on some of these hills. Attractive surroundings at Aberdour.

|                         | (Pier.)                  |                |                |                                                                                                                                                                                                                                                                                                                                                                                                                                  |

**NORTH QUEENSFERRY TO BURNTISLAND.** *Reverse.*—From pier cross rly. lines and bear to *L.* then *r.*, passing harbour on *L.* Pass under rly. br. and keep forward for a few yds. then turn sharp *L.* by Lothian St. In Kirkton turn sharp *L.* at inn. *Dangerous* descent to Aberdour. At rly. sta. turn *L.*, then *r.*, having rly. on *r.* Keep forward at Hillend (*r.*, to Dunfermline, see note) to Inverkeithing, where bear *L.* and follow portion of reverse of Route 170 to North Queensferry.

**EDITOR'S NOTE.**—The road leading northwards at Hillend, taken in connection with the reverse route given above, forms communication between Aberdour and Dunfermline. From Hillend cross rly., and go down a fairly steep descent, which is followed by a climb of  $\frac{3}{4}$  m., rideable at first, but very steep towards the top. Route 170 is joined for a few yds., then keep to *L.* at fork, up a short hill; thence an undulating road towards Dunfermline. Surface good. Hillend  $4\frac{3}{4}$  m. from Dunfermline Town Cross.

# ROUTE 181. BURNTISLAND TO NEWPORT.

One of the main roads across Fifeshire, and forming, in connection with the Forth and Tay ferries (for the former of which see Route 166) direct communication between Edinburgh and Dundee. The road is rather hilly to Gallatown, and then the gradients are easier; the surface, with the exception of local roughnesses about the towns, is capital. Kirkcaldy, Pathhead, and Sinclairtown form a town 3 m. long, in which the streets are often narrow and difficult to ride. The last m.s. before Newport is misplaced. There is pleasant scenery at the beginning and end of this route, and about Dairsie, near which place, to the S., lies the picturesque Dura Den.

|                                | NEWPORT<br>(Pier.) .....       | 2 $\frac{1}{4}$                  | 35               |                                                                                                                                                                                                                                                                                                                                   |

**BURNTISLAND TO NEWPORT.** *Reverse.*—Go a short way eastwards along shore from the pier, and turn up to *r.* by a steepish hill, passing rly. At St. Michael's Inn bear to *r.*, and pass rly. just beyond. On entering Cupar bear to *l.*, then *r.* into St. Catherine St., out of which turn *l.*, and then turn again *l.*, passing over R. Eden at the South Br., and crossing rly. near the sta. At fork beyond keep to *r.*, and again to *r.* over  $\frac{1}{4}$  m. further. At branch-roads after passing rly., before New Inn, bear to *l.* At Gallatown bear slightly to *r.* and pass through Sinclairtown, and over rly. near sta. At foot of the hill bear *r.* into Pathhead; level at first, then go down winding hill into Kirkcaldy. Pass along High St., bear *r.* into Milton Rd., and at rly. br. turn *l.* Enter Linktown carefully and keep forward, avoiding a road to *l.* beyond the town. Pass under rly., bear *l.* at fork before Kinghorn, then keep to *r.* into the town, on leaving which avoid a road to *l.* (to Pettycur). At end of Burntisland High go under rly. br. and bear *l.* towards the pier.

**ROUTE 182. CUPAR TO ST. ANDREWS.**

A good road, with easy gradients. The distant view of St. Andrews on approaching the town from Guard Bridge is very striking. The famous golf links are seen over to *l.*, beyond the rly. line, before reaching the rly. br. It would be superfluous here to draw attention to the many charms of St. Andrews—the golf capital and Cathedral city; this has been adequately done in many books already.

**CUPAR TO ST. ANDREWS. Reverse.**—Leaving Town Hall on *l.*, go along South St., and opposite Madras College turn *r.* along S. Bell St., and to *l.* into St. Mary's Pl., at end of which bear *r.* down City Rd., and pass Marine Hotel on *r.* Go under rly. br. to *l.*; thence an unmistakable road to Dairsie, where Route 181 is joined. Follow reverse of that route to Cupar.

## ROUTE 183.

**BURNTISLAND TO ST. ANDREWS.**

An undulating road to Windygates and then uphill for 4 m., with nearly 6 m. of a downward slope on the other side, to Pitscottie; thence a gradual rise and fall to St. Andrews. To near Kennoway the surface is very good; the long ascent and descent beyond it is very fair and improves very much after Ceres. With an appreciable west wind blowing the run from the top of the hill near Pratis to St. Andrews is delightful.

**BURNTISLAND TO ST. ANDREWS.** *Reverse.*—Leave by West Port and keep forward due E. by Argyle St., at  $\frac{1}{4}$  m. beyond which bear *r.* at fork and keep L. at next fork (*r.* to Strathkinness). At fork before Kennoway keep to *r.*, and in that village avoid road leading off to L. Beyond Cameron Br. keep to *r.*; thence unmistakable to Gallatown, from which point follow reverse of Route 181 to Burntisland.

EDITOR'S NOTE.—An alternative route between Kirkcaldy and Kennoway may be obtained by following Route 195 to Leven, going due W. from that town for  $1\frac{1}{4}$  m., and turning L. at the farm of Wester Durie to Kennoway, where the main route is rejoined. Kirkcaldy to Kennoway,  $11\frac{1}{4}$  m. The coast road to Leven is a very good one.

**ROUTE 184. BURNTISLAND TO LESLIE.**

(Via Lochgelly.)

A very tortuous, hilly, cross-country road, with dangerous hill before Leslie. Surface good as a whole.

**BURNTISLAND TO LESLIE.** *Reverse.*—From High St. turn down steep hill to *L.* (care required), pass over level crossing, and ascend the steep hill winding to *L.* in front. About ½ m. from top of hill turn sharp *r.*, and *L.* a m. further. Bear round to *r.* over ¼ m. beyond, and turn sharp *L.* downhill ½ m. beyond Kinglassie. At 1½ m. further turn *L.*, and bear to *r.* in Auchterderran. Turn *L.* before Lochgelly, and to *r.* in that village. On meeting Route 166 bear *L.*, and follow reverse of that route from Cowdenbeath to Burntisland.

**ROUTE 185. LEVEN TO KINROSS.**

Like most of the Fife roads, this route has several abrupt turns. Rather hilly between Leslie and Scotlandwell; for the rest the gradients are easier. Surface good on the whole, and scenery remarkably fine by the Lomond Hills and round Loch Leven.

|                        | (Post Office.)         |                         |        | <i>l.</i> to Kinross. Good surface.                                                                   |

**LEVEN TO KINROSS.** *Reverse.*—Along Route 166 to beyond St. Paul's Episcopal Ch. (or *r.*), where follow a level road branching off to *r.* Bear *r.* along the base of the Lomond Hills and turn *l.* at Scotlandwell. Turn *r.* into Leslie and *l.* in that town. On meeting Route 181, bear slightly *r.*, then keep *l.* Keep on over first cross streets in Markinch, then turn *r.*, passing ch. on *r.*, and keep *l.* at fork, passing the rly. About a m. further turn sharp *r.* downhill to Milltown, where bear round to *l.* and pass through the village. At 1¼ m. beyond Windygates turn *r.* to Leven.

## ROUTE 186. SCOTLANDWELL TO KINROSS.

(Via S. of Loch Leven.)

A pleasant road, from which there are fine views of the Lomond Hills and Loch Leven, with its castle on Castle Island, famous as the scene of the memorable escape of Queen Mary of Scotland.

| Miles from<br>Kinross. | Places on the<br>Road. | Mileage.                |        | General description of the Road.                             |

| 1¾                     | Gairneybridge .....    | ¾                       | 6      | to Gairneybridge. Fairly good surface.                       |
|                        | KINROSS .....          | 1¾                      | 7¾     | Route 166 to Kinross.                                        |

**SCOTLANDWELL TO KINROSS.** *Reverse.*—Route 166 (reverse) for ¾ m. beyond Gairney bridge and bear sharp *l.* passing rly. At 3½ m. further turn again *l.* down to New Gullet Br., and forward to Scotlandwell.

## ROUTE 187.

## KINROSS TO RUMBLING BRIDGE.

A good road with an easy gradient up from Kinross, and a gradual descent to Crook of Devon and before Rumbling Bridge. Surface capital all the way. The scenery about the Crook and at Rumbling Bridge is very attractive.

| <i>Miles from Rumbling Br.</i> | <i>Places on the Road.</i>      | <i>Mileage.</i>       |               | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                  |

| 1¾                             | Crook of Devon .....            | 4                     | 5¾            | Beyond the village road crosses rly. and bends to <i>r.</i> , ascending slightly, and falls to road junction, where turn round sharp <i>r.</i> to Rumbling Bridge Sta., and cross R. Devon to hotel. (Admission to river banks 6d. each person: apply at hotel.)                                                                         |
|                                | RUMBLING BRIDGE ...<br>(Hotel.) | 1¾                    | 7½            |                                                                                                                                                                                                                                                                                                                                          |

KINROSS TO RUMBLING-BRIDGE. *Reverse.*—From hotel cross br. and pass rly. sta., and at road junction beyond turn sharp *L.* to Crook of Devon; thence an unmistakable road to Kinross.

## ROUTE 188. NEW INN TO PERTH.

(Via Newburgh.)

A fairly good undulating road, much easier than Route 189, though rather more circuitous. Some good views of the Firth of Tay and Carse of Gowrie before Newburgh.

| <i>Miles from Perth.</i> | <i>Places on the Road.</i>           | <i>Mileage.</i>       |               | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                |

**NEW INN TO PERTH (VIA NEWBURGH).** *Reverse.*—Reverse of Route 166 to road junction near Aberargie, where bear *l.*, passing through that village. In Abernethy bear round to *r.* and avoid branch-roads on *l.* At fork beyond Newburgh keep to *r.* and to *l.* at Glenburnie. Beyond Lindores pass the loch on *r.*, and keep forward over the cross-roads at Collessie; thence unmistakable to New Inn.

## ROUTE 189. NEW INN TO PERTH.

(Via Strathmiglo.)

A good, gently undulating road to Edentown, with rather a stiffish rise and fall, but fair surface on the whole, across the hill to Bein Inn down in Glen Farg; thence to Perth an excellent road.

| Miles from<br>Perth. | Places on the<br>Road.    | Mileage.                |        | General description of the Road.                                                                                                                                                                                                                                                                |

| 3 $\frac{3}{4}$   | Bow of Fife .....              | 1               | 15 $\frac{3}{4}$ | Good surface.                                                                                           |
|                   |                                |                 |                  | Road descends at first, then rises for about $\frac{1}{2}$ m.,                                          |
|                   | CUPAR .....                    | 3 $\frac{3}{4}$ | 19 $\frac{1}{2}$ | is level for a m. and descends towards Cupar.                                                           |
|                   | (Town Hall.)                   |                 |                  | This hill into Cupar is rather lumpy latterly,                                                          |
|                   |                                |                 |                  | otherwise the road surface is good.                                                                     |

**KINROSS TO CUPAR.** *Reverse.*—Leave the town due W. from Bonnygate and keep to *L.* at fork. Thence a fairly straightforward road to Edentown, where keep again to *L.*; unmistakable to Milnathort, where bear *L.* along portion of Route 166 to Kinross.

## ROUTE 191. CUPAR TO PERTH.

Hilly for about 4 m. out of Cupar and then a capital run to Lindores. Surface rather lumpy out of Cupar, but good beyond the cross-roads. The wooded hill known as The Mount, which gave its name to that Sir David Lindsay, "Lord Lyon King-at-Arms," whom Scott has sketched as one of the characters in "Marmion," lies to *L.* before the cross-roads.

Thence a capital gently undulating road, with the vast Tent Moor lying to <i>r.</i> , declining to Burnside, and with easy rise and fall into Tayport. Good surface. (Ferry steamer several times a day from Tayport to Broughty Ferry.) |
|                                | TAYPORT .....                  | 1                                | 11½           |                                                                                                                                                                                                                                                                                                                                                                    |
|                                | (Church.) .....                |                                  |               |                                                                                                                                                                                                                                                                                                                                                                    |

**CUPAR TO TAYPORT. *Reverse.***—Leave the town due S. on an easily-followed road to St. Michael's Inn, where go over the cross-roads and pass rly. and river beyond. Reverse of Route 181 to Cupar.

# ROUTE 193. LEVEN TO ST. ANDREWS.

(Via Upper Largo.)

A very arduous, hilly road beyond Upper Largo, rising from nearly sea level to over 500 ft. in a little over 3 m. Beyond that the hills are nearly all in the rider's favour to St. Andrews. The better road to St. Andrews is via Kennoway; see Route 183 and the note to that route.

| 12                        | Lundin Mill.....                  | 1 $\frac{3}{4}$        |                  | Enter the village bearing to <i>r.</i> at ch. gate and turn <i>l.</i> at d.p.; ascend a long, steep hill by the side of Largo Law. At hill-top turn <i>l.</i> , having a gradual rise for 1 $\frac{1}{2}$ m. further, and descend to Largoward. Roughish surface on the climb out of Upper Largo, then fairly good.                                                                                                                                                                                                                                                                                                                                                                                                              |
| 11                        | Upper Largo .....<br>↑            | I                      | 3 $\frac{3}{4}$  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 7 $\frac{3}{4}$           | Summit.....                       | 3 $\frac{1}{4}$        |                  | Pass over Route 197 and keep forward by Lathones, beyond which, on coming to the plantation turn <i>l.</i> then <i>r.</i> , having a downhill run for 1 $\frac{1}{2}$ m.; keep sharp <i>l.</i> where roads branch on this descent. This is followed by one or two more or less steep rises and falls and a long quick descent (1 in 15 in parts) towards Mount Melville Sta. Here turn <i>r.</i> , cross rly., and bear to <i>l.</i> , with a fairly steep downhill run (gradient same as above) to St. Andrews. Cross the Kinness Burn at Maggie Murray's Br., and at end of Bridge St. turn <i>r.</i> and pass under the old gateway, or West Port, into South St. Town Hall on <i>r.</i> beyond Madras College. Fair surface. |

**LEVEN TO ST. ANDREWS. Reverse.**—Leave westwards by South St., and after passing under the old West Port turn *l.* into Bridge St. and keep forward, having rly. on *r.*, to Mount Melville Sta., where turn *l.* after crossing rly. Beyond the Cameron Burn turn to *r.*, and bear to *l.* then *r.* at road junction in plantation at top of hill. Keep over cross-roads at Largoward and *walk down* the steep hill into Upper Largo. Bear *l.* near ch. gate in that village, then *r.* At Lundin Mill cross br., go up the steep, narrow hill beyond, and keep forward. At the end of the long, straight stretch of road descend a short hill and then turn *l.* to Leven.

## ROUTE 194. ST. ANDREWS TO NEWPORT.

A very easy road, with good surface, to St. Michael's Inn, then rather more hilly with dangerous descent into Newport. The quaint old church at Leuchars is worthy of attention.

| Miles from<br>Newport. | Places on the<br>Road.  | Mileage.                |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                     |

**ST. ANDREWS TO NEWPORT. Reverse.**—Route 181 (reverse) to St. Michael's Inn. Keep forward, having rly. on *r.*, to Leuchars, where bear *r.*, passing *ch.* on *l.*, and keep to *r.* Beyond the level crossing at Guard Bridge turn *l.* and cross R. Eden. Route 182 to St. Andrews.

## ROUTE 195. BURNTISLAND TO CRAIL.

(Via Elie.)

This road, skirting the Fife coast, passes through an interesting succession of fishing villages and summer watering-places. Each place visited has some peculiar characteristic of its own, the quaintest being St. Monans, Pittenweem, and Crail, spots well known to artists and to all who frequent Scottish picture galleries. The gradients on this road are as a rule easy, and the surface, with local exceptions, very good.

| Miles from<br>Crail. | Places on the<br>Road. | Mileage.                |                 | General description of the Road.                                                                                                                                                                                                                             |

|                          | (Town Hall.)               |                       |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

**BURNTISLAND TO CRAIL.** *Reverse.*—Leave Town Hall due westward and bear round to  $r.$  in Upper Kilrenny, then to  $\angle$ . In Wester Anstruther bear  $r.$  at Temperance Hotel. Pass through Pittenweem, and on leaving bear  $r.$  then  $\angle$  and keep to  $\angle$  at fork ( $r.$ , direct road via Colinsburgh). Bear to  $\angle$  at rly. br. near St. Monans, and in middle of Elie High St. turn sharp  $r.$ , passing rly. beyond. About  $\frac{3}{4}$  m. after passing rly. turn sharp  $\angle$  and pass Kilconquhar Sta. on  $\angle$ . From Upper Largo to Leven reverse of Route 193. Beyond Leven Harbour cross river, road bending to  $\angle$  on the ascent beyond. After crossing rly. avoid a road to  $\angle$  and keep forward, passing sta. on  $r.$  Easily-followed road to Dysart—where descend the hill with care—and Pathhead. Reverse of Route 181 to Burntisland.

**ALTERNATIVE ROUTE (VIA COLINSBURGH).** Keep forward beyond the 21st m.s. Undulating road into Colinsburgh; level through the village, out of which road is again undulating, then level. At white iron guide tablet on wall turn  $r.$ , road thence undulating, with intermediate level stretches, to junction with the coast road at d.p. Very good surface. Upper Largo to Colinsburgh,  $3\frac{1}{2}$  m.; to Pittenweem,  $8\frac{1}{4}$ . This is a more direct, but not so interesting, road than by Elie and St. Monans.

## ROUTE 196. LARGO TO CUPAR.

An excessively hilly road—in fact without what one might call a redeeming bit of level. Those who are fond of climbing hills in order to obtain fine views from the summits will find this route quite to their liking. Surface loose in the steeper parts, but fair as a whole.

| Miles from Cupar. | Places on the Road.           | Mileage.       |        | General description of the Road.                                                                                                                                                                                                                                               |
